Rural Areas in Transition Norman Walzer, Christopher Merrett, 2022-12-23 This volume explores new opportunities to reshape local economies in rural areas during the next decade by exploring successful efforts already underway. While reported population declines can paint a bleak picture for rural areas, a different story can be told in looking at the numbers of households, employment, and housing markets. In fact, many rural areas have had steady employment and healthy housing markets. Rural attractions often include proximity to natural recreation areas, personal safety, social interaction, less expensive housing, and high quality education. This book shows that rural areas are in a major long-term transition and that local leaders who take advantage of these opportunities in their community and economic development strategies can create a very positive future for residents. Students and policymakers in local economic development, sociology of population change, business finance, political economy, and geography will find this a useful resource.

These entrepreneurs share their first hand advice, anecdotes and best practices in tackling the key challenges of winning in the China market from negotiating with government and winning necessary start up approvals to hiring and keeping the right staff to collecting payments and to safeguarding intellectual property. In addition, the experiences of the entrepreneurs will be juxtaposed against insights from experienced China consultants who assist start ups in operating in China. Thus the book will balance extensive on the ground business advice against the insights of consultants who have risen to prominence in the China business environment by advising SME business operators on succeeding in China.

Scaling Lean Ash Maurya, 2016-06-14 Is your big idea worth pursuing? What if you could test your business model earlier in the process before you've expended valuable time and resources? You've talked to customers. You've identified problems that need solving and maybe even built a minimum viable product. But now there's a second bridge to cross. How do you tell whether your idea represents a viable business? Do you really have to go through the whole cycle of development, failure, iteration, tweak, repeat? *Scaling Lean* offers an invaluable blueprint for modeling startup success. You'll learn the essential metrics that measure the output of a working business model, give you the pulse of your company, communicate its health to investors and enable you to make precise interventions when things go wrong. You'll also learn how to ballpark the viability of a business model using a simple five minute back of the envelope estimation. Stop using current revenue as a measure of progress; it forces you to fly blind and often to overpromise to your shareholders and instead embrace the metric of traction which helps you identify the leading indicators for future business model growth, set progressive goals that set you up for exponential long term success by implementing a staged 10X rollout strategy like one employed by Facebook and Tesla. Stop burying your breakthrough insights in failed experiments but rather illuminate them using two week LEAN sprints to quickly source, rank and test ideas. Ash Maurya, a serial entrepreneur and author of the startup cult classic *Running Lean*, pairs real world examples of startups like Airbnb and Hubspot with techniques from the manufacturing world in this tactical handbook for scaling with maximum efficiency and efficacy. This is vital reading for any startup founder graduating from the incubator stage.
