Entropy Infinity God:

Entropy, Infinity, and God Daniel Hershey, 1997 Entropy Theory Of Aging Systems: Humans, Corporations And The Universe Daniel Hershey, 2009-08-14 Entropy is a measure of order and disorder If left alone aging systems go spontaneously from youthful low entropy and order to old high entropy and disorder This book presents the commonality of entropy principles which govern the birth maturation and senescent history of aging humans corporations and the universe Mainly we introduce an entropy theory of aging based on the non equilibrium thermodynamic ideas of Ilya Prigogine leading to the thermodynamic concepts of Excess Entropy EE and Excess Entropy Production EEP We describe the aging process in humans in terms of the EE and EEP concepts This book also describes the informational entropy theory and equations of Claude Shannon and the six Hershey parameters which trace and mark the lifecycle of corporations To conclude this volume uses classical and informational entropy concepts equations and calculations to explain the birth evolution and death of our aging universe and all of this in relation to the concept of Infinity a *Uncertaintyism* Keith Ferreira, 2005-02 Uncertaintyism is the philosophical belief that states that uncertainty is the only certainty Uncertaintyism is one of many articles in this book of philosophical articles **The Divine Light** Sorin Cerin, 2010-11-10 Everything have started by some few dreams which not just that I would never forget my entire life but more than that I don't think it was just dreams in the right sense of the notion dream I was conscious during the rest that I was sleeping What it could be said that I was dreaming is nothing else than a real experience in a space from where I can come back anytime in the world where I am sleeping I was at the beginning somewhere on the fringe of an unknown town in the night While I have looked at the multicolored lights from any distance I started to become easier so easy that I felt in a moment I could fly Sorin Cerin **God Is Mathematics** Dr. Thomas Stark, What's the most radical idea possible the one least likely to be understood by humanity the one so far beyond humanity's level of intelligence that whoever champions it is likely to be regarded as insane Go on if you're smart you ought to be conceive of a connection so unobvious so invisible to the masses so improbable in relation to any other idea that it will be almost universally rejected That idea despised mocked and reviled by practically everyone will be the No 1 candidate for being the authentic answer to existence Pythagoras was the genius that delivered this idea 2 500 years ago when he said All things are numbers The last connection that the average person would ever make when they look at the world is that what they are actually seeing beyond the level of superficial appearance is nothing but numbers That is the ultimate unthinkable thought God is Mathematics **Bible of the Light** Sorin Cerin, 2011-02-12 Some time ago I published The Theory of Universal Genesis in the book The Divine Light this text became the first chapter in the Bible of the Light It is a dialogue between myself and the Divine Light that appeared to me in a lucid dream and which inspired me to write all this Bible of the Light is an anthology composed of several books published along the time as and new books which for the first time will be published For many years I felt that I will receive these revelations from the Divine Light and that I will publish such a work

entitled Bible of the Light To those wishing to is heal through the holy breath of Divine Light them I wish to they find the tranquility and peace through these pages No matter how unhappy would be some through Bible of the Light will understand that everything is just a passing cloud and that the true eternal life is alongside the Divine Light that is the true God Amen This Bible will make the definitive peace between God and Satan in the man soul because Satan is the Evil without which the Good identified through God and would lose any luster All churches of the world would disappear if would not more existed Satan The spiritual peace between Satan and God lead for the first time to a healthy society where the folly pride vanity and hypocrisy alongside with many other evils will disappear and once with these and servants of a Good who can not understand the Evil Here you will find out to whom and how should you pray if you necessarily want to do it If is necessary to yourself pray or not Who is God and what wants Him from us but and who we are and what we want from God from inside us Amen

The Physics of God and the Quantum Gravity Theory of Everything James Redford,2011-12-19 ABSTRACT Analysis is given of the Omega Point cosmology an extensively peer reviewed proof i e mathematical theorem published in leading physics journals by professor of physics and mathematics Frank J Tipler which demonstrates that in order for the known laws of physics to be mutually consistent the universe must diverge to infinite computational power as it collapses into a final cosmological singularity termed the Omega Point The theorem is an intrinsic component of the Feynman DeWitt Weinberg quantum gravity Standard Model Theory of Everything TOE describing and unifying all the forces in physics of which itself is also required by the known physical laws With infinite computational resources the dead can be resurrected never to die again via perfect computer emulation of the multiverse from its start at the Big Bang Miracles are also physically allowed via electroweak quantum tunneling controlled by the Omega Point cosmological singularity The Omega Point is a different aspect of the Big Bang cosmological singularity the first cause and the Omega Point has all the haecceities claimed for God in the traditional religions From this analysis conclusions are drawn regarding the social ethical economic and political implications of the Omega Point cosmology

Bios Hector C. Sabelli,2005 This book focuses on a prototype of creative causal processes termed BIOS and how the concept can be applied to the physical world in medicine and in social science This book presents methods for identifying creative features in empirical data studies showing biotic patterns in physical biological and economic processes mathematical models of bipolar positive and negative feedback that generate biotic patterns These studies support the hypothesis that natural processes are creative not determined and causal not random and that bipolar feedback plays a major role in their evolution Simple processes precede coexist constitute and surround the complex systems they generate priority of the simple In turn complex processes feedback and transform simpler ones supremacy of the complex *God and the Universe* Arthur Gibson,2013-10-11 Ambitious controversial and absorbing God and the Universe tackles the highly charged issue of God s relevance in the light of new scientific thinking on cosmology Engaging with poststructuralism ethics mathematics and philosophy through the ages this persuasively argued book

Entropic Creation Helge S. Kragh, 2016-04-29 Entropic Creation is the first English language book to consider the cultural and religious responses to the second law of thermodynamics from around 1860 to 1920 According to the second law of thermodynamics as formulated by the German physicist Rudolf Clausius the entropy of any closed system will inevitably increase in time meaning that the system will decay and eventually end in a dead state of equilibrium Application of the law to the entire universe first proposed in the 1850s led to the prediction of a future heat death where all life has ceased and all organization dissolved In the late 1860s it was pointed out that as a consequence of the heat death scenario the universe can have existed only for a finite period of time According to the entropic creation argument thermodynamics warrants the conclusion that the world once begun or was created It is these two scenarios allegedly consequences of the science of thermodynamics which form the core of this book The heat death and the claim of cosmic creation were widely discussed in the period 1870 to 1920 with participants in the debate including European scientists intellectuals and social critics among them the physicist William Thomson and the communist thinker Friedrich Engels One reason for the passion of the debate was that some authors used the law of entropy increase to argue for a divine creation of the world Consequently the second law of thermodynamics became highly controversial In Germany in particular materialists and positivists engaged in battle with Christian mostly Catholic scholars over the cosmological consequences of thermodynamics This heated debate which is today largely forgotten is reconstructed and examined in detail in this book bringing into focus key themes on the interactions between cosmology physics religion and ideology and the public way in which these topics were discussed in the latter half of the nineteenth and the first years of the twentieth century

Pandeism Knujon Mapson, 2017-01-27 Pandeism An Anthology presents the work of sixteen authors new and old examining the implications of the revolutionary evolutionary theological theory of Pandeism the proposition that the Creator of our Universe created by becoming our Universe and that this proposition can be demonstrated through the exercise of logic and reason These authors present a wide range of views originating from their varied experiences from professional theologians and religious educators to lay philosophers with PhDs in the hard sciences Collectively these authors have assembled the most extensive examination of Pandeism put to print in over a hundred years

The Mystery of Godliness, Logos Steve Madison, Wouldn't you want a religion that every logician mathematician philosopher and scientist on earth could embrace a religion fully consistent with all the points made by Kurt Godel when he listed the 14 key religious principles he accepted That religion already exists It's called ontological mathematics predicated on the principle of sufficient reason and Occam's razor and constitutes an a priori rationalist analytic deductive religion metaphysics and physics Mathematics explains all Nobel laureate Paul Dirac said God is a mathematician of a very high order and He used advanced mathematics in constructing the universe In fact God simply is mathematics God is not a non mathematical Being who sometimes does mathematics God is a mathematical Being who does nothing but mathematics hence IS nothing but mathematics God is one
