climate change managing forestland alleviating food shortages living with biodiversity and assessing the development projects and policies being implemented Without the involvement of local communities households and ultimately individual people the needed action will not be effectively taken Upland Natural Resources and Social Ecological Systems in Northern Vietnam Volume 2 goes beyond just Northern Vietnam to address the issue of transboundary natural resource management an issue that Vietnam is dealing with in its relations with northern neighbor China and western neighbor Laos as well as the transboundary water governance between Pakistan and India in south Asia with the hope that some of the lessons learned may one day be useful in the case of Vietnam and its neighbors Provides a multi disciplinary case study into a complex environmental situation involving government institutions planning and practices using northern Vietnam as the focus Covers the issues of natural resource management and biodiversity in depth using international case studies Provides examples of measuring the potential climate change impacts on food security in agricultural regions Examines topics such as planning for climate change managing forestland alleviating food shortages living with biodiversity and assessing development projects and policies

**Contested Sustainability Discourses in the Agrifood System** Douglas H. Constance, Jason T. Konefal, Maki Hatanaka, 2018-06-27 The industrial agrifood system is in crisis regarding its negative ecological economic and social externalities it is unsustainable on all dimensions This book documents and engages competing visions and contested discourses of agrifood sustainability Using an incremental reformist to transformation radical continuum framework for alternative agrifood movements this book identifies tensions between competing discourses that stress food sovereignty social justice and fair trade and those that emphasize food security efficiency and free trade In particular it highlights the role that governance processes play in sustainability transitions and the ways that power and politics affect sustainability visions and discourses The book includes chapters that review sustainability discourses at the macro and meso levels as well as case studies from Africa Australia Canada Europe South America and the USA

**Agricultural Sustainability and Environmental Change at Ancient Gordion** John M. Marston, 2017-07-05 This book publishes the results of 220 botanical samples from the 1993 2002 Gordion excavations directed by Mary Voigt Together with Naomi Miller's 2010 volume Gordion Special Studies 5 this book completes the publication of botanical samples from Voigt's excavations The book aims to reconstruct agricultural decision making using archaeological and paleoenvironmental data from Gordion to describe environmental and agricultural changes at the site John M Marston argues that different political and economic systems implemented over time at Gordion resulted in patterns of agricultural decision making that were well adapted to the social setting of farmers in each period but that these practices had divergent environmental impacts with some regimes sponsoring sustainable agricultural practices and others leading to significant environmental change The implications of this book are twofold Gordion will now be one of the best published agricultural datasets from the entire Near East and thus serve as a valuable comparable dataset for regional synthesis of agricultural and environmental change and the methods the

author developed to reconstruct agricultural change at Gordion serves as tools to engage questions about the relationship between social and environmental change at sites worldwide Other books address similar themes but none in the Near East address these themes in diachronic perspective such as we have at Gordion University Museum Monograph 145

**Sustainable Intensification in Smallholder Agriculture** Ingrid Oborn, Bernard Vanlauwe, Michael Phillips, Richard Thomas, Willemien

Brooijmans, Kwesi Atta-Krah, 2017-02-17 Sustainable intensification has recently been developed and adopted as a key concept and driver for research and policy in sustainable agriculture. It includes ecological, economic and social dimensions where food and nutrition security, gender and equity are crucial components. This book describes different aspects of systems research in agriculture in its broadest sense where the focus is moved from farming systems to livelihoods systems and institutional innovation. Much of the work represents outputs of the three CGIAR Research Programs on Integrated Systems for the Humid Tropics, Aquatic Agricultural Systems and Dryland Systems. The chapters are based around four themes: the conceptual underpinnings of systems research; sustainable intensification in practice; integrating nutrition, gender and equity in research for improved livelihoods and systems; and institutional innovation. While most of the case studies are from countries and agro-ecological zones in Africa, there are also some from Latin America, Southeast Asia and the Pacific.

**Reluctant Partners? Non-Governmental Organizations, the State and Sustainable Agricultural Development**

Anthony Bebbington, John Farrington, David J. Lewis, Kate Wellard, 2005-07-15 Combines comprehensive empirical insights into NGOs work in agriculture with wider considerations of their relations with the State and their contribution to democratic pluralism in Africa, Asia and Latin America.

**Disaster Risk** Irasema Alcántara-Ayala, Christopher Gomez, Ksenia Chmutina, Dewald van Niekerk, Emmanuel Raju, Victor Marchezini, Jake Rom Cadag, JC Gaillard, 2022-10-13 The text offers a comprehensive and unique perspective on disaster risk associated with natural hazards. It covers a wide range of topics reflecting the most recent debates but also older and pioneering discussions in the academic field of disaster studies as well as in the policy and practical areas of disaster risk reduction (DRR). This book will be of particular interest to undergraduate students studying geography and environmental studies/science. It will also be of relevance to students/professionals from a wide range of social and physical science disciplines including public health and public policy, sociology, anthropology, political science and geology.

*Redefining Genocide* Doctor Damien Short, 2016-06-15 In this highly controversial and original work, Damien Short systematically rethinks how genocide is and should be defined. Rather than focusing solely on a narrow conception of genocide as direct mass killing, through close empirical analysis of a number of under-discussed case studies including Palestine, Sri Lanka, Australia and Alberta, Canada, the book reveals the key role played by settler colonialism, capitalism, finite resources and the ecological crisis in driving genocidal social death on a global scale.
