Environmental Management in Development Michael E. Colby, 1990 In the past quarter century environmental management has increasingly become a concern of governments More recently the traditional split between developers and conservationists has begun to break down Conceptions of what is economically and technologically practical ecologically necessary and politically feasible are rapidly changing This report discusses the implications of five paradigms of environmental management in development The author notes that the remedial legalistic approach of environmental management is breaking down Instead interest in the more economically integrated approach of resource management has recently taken hold Several interdependent forces indicate that improving the economic management of pollution and resources may be a necessary but insufficient measure to create the conditions for sustainable development The perception of tradeoffs between development and environmental quality persists in the present debate but its necessity is greatly

exaggerated according to this paper Finally it is noted that paradigms may be impervious to evidence and institutions and societies too difficult to change Whether when and how these issues are resolved may be modern civilization s most significant test

**Corporate Environmental Management 1** Richard Welford,2014-04-23 Presents a comprehensive analysis of the role of business in safeguarding the environment It introduces the general issues and context and then gives a detailed critical examination of all the key tools of corporate environmental management including environmental management systems and standards environmental policies guidelines and charters environmental auditing life cycle assessment the measurement of environmental performance and environmental reporting The book emphasises systems based environmental management and also considers how such an approach might be integrated within local authorities and small and medium sized companies It then extends the systems approach to cover continuous environmental improvement building a corporate environmental profile and moving towards sustainability Written in a clear and informative style with checklists explanatory notes and references for further reading the book draws on the existing environmental strategies of a number of leading firms Each chapter is written by contributors involved in ongoing research and consultancy in their specialist area This is the most authoritative guide available to contemporary approaches to corporate environmental management Its how to focus makes it essential reading not only for students and researchers but for managers faced with the challenge of introducing environmental management strategies into their own organizations RICHARD WELFORD is Professor of Corporate Environmental Management and Director of the Centre for Corporate Environmental Management at the University of Huddersfield He is also Professor of Sustainable Management at the Norwegian School of Management and a Director of ERP Environment He is co author of The Earthscan Reader in Business and the Environment 1996 author of Corporate Environmental Management 2 1997 and Hijacking Environmentalism 1997 and editor of the journal Business Strategy and the Environment Originally published in 1998
