## **Environmental Knowing:**

**Environmental Knowing** Gary T. Moore, Reginald G. Golledge, 1976      **Environmental Publics** Sally Eden, 2016-12-08

How do ordinary people think about the environment as they go about their daily lives Does thinking about the environment make them do things differently This book is the first to explore the idea of environmental publics that is the ways in which ordinary people engage with environmental issues across different practical contexts of work play and home Emphasising the practices of environmental engagement Environmental Publics examines how people consume the environment learn about it campaign for its protection and enjoy it through their leisure time But the book avoids relying on idealisations of consumers or citizens or theoretical constructs about behavioural norms that have traditionally dominated research in this field Instead this book differentiates environmental publics not by who they are but by what they are doing their daily practices It also analyses specifically the geographies of those practices how what people do affects the environment but in different ways across time and space and at different scales aspects of practices that are neglected in the literature With an interdisciplinary perspective this book will be of interest to students and scholars in geography sociology science and technology studies political science and anthropology It is written in an accessible and readable style so as to be useful for preliminary and more advanced courses in environmental management perception and policy as well as in studies of modern society consumption and environmentalism      **Environmental Knowing** Gary T. Childs,2012-12-06 Knowing about Environmental Knowing Gary T. Moore,University of Wisconsin--Milwaukee. Urban Research Center,1978 **Person-environment-behavior Research** Douglas Amedeo,Reginald G. Golledge,Robert John Stimson,2009-01-01 Research into spatial influences on people s everyday activities and experiences presents many conceptual and methodological complexities Written by leading authorities this book provides a comprehensive framework for collecting and analyzing reliable person environment behavior data in real world settings that rarely resemble the controlled conditions described in typical texts An array of research designs are illustrated in chapter length examples addressing such compelling issues as spatial patterns of voting behavior ways in which disabilities affect people s travel and wayfinding how natural and built environments evoke emotional responses spatial factors in elementary teaching and learning and more A special chapter guides the student or beginning researcher to craft a successful research proposal

**Introduction to Sustainable Tourism** Alexandra Coghlan,2023-06-10 Fully revised and updated for a second edition it provides a comprehensive pragmatic and realistic look at integrating sustainability into tourism Includes two new chapters on regenerative tourism and disruptors including the impact of COVID 19 and new material on systems thinking influencing behaviours and green marketing **Advances in Environment, Behavior and Design** Erwin H. Zube,Gary T.

Moore,2013-11-11 This second volume in the Advances in Environment Behavior and Design series follows the pattern of Volume 1 It is organized into six sections user group research consisting of advances in theory place research

sociobehavioral research research and design methods and research utilization The authors of the chapters in this volume represent a range of disciplines including architecture geography psychology social ecology and urban planning They also offer international perspectives Tommy Garling from Sweden Graeme Hardie from South Africa recently relocated to North Carolina Gerhard Kaminski from the Federal Republic of Germany and Roderick Lawrence from Switzerland formerly from Australia Although most chapters address topics or issues that are likely to be familiar to readers environmental perception and cognition facility programming and environmental evaluation four chapters address what the editors perceive to be new topics for environment behavior and design research Herbert Schroeder reports on advances in research on urban forestry For most of us the term forest probably conjures up visions of dense woodlands in rural or wild settings Nevertheless in many parts of the country urban areas have higher densities of tree coverage than can be found in surrounding rural landscapes Schroeder reviews research that addresses the perceived and actual benefits and costs associated with these urban forests

Toward the Integration of Theory, Methods, Research, and Utilization Gary T. Moore, Robert W. Marans, 2013-03-09 This fourth volume in the Advances in Environment Behavior and Design series continues the intent of earlier volumes by exploring new directions in the multidisciplinary environment behavior EB or EBS field The series is organized around a framework of theory methods research and utilization that some say has defined the field for the past 15 years This fourth volume is devoted to chapters that explore the integration of theory quantitative and qualitative research and utilization in policy planning and architecture The authors selected for this volume exemplify the multidisciplinary character of the field they have been selected from architecture environmental psychology environmental studies housing research landscape architecture social anthropology social ecology urban design and urban planning from academe and practice and from Australia Europe and North America HISTORY OF THE ADVANCES SERIES The idea for the series emerged in 1983 at meetings of the Board of Directors of the Environmental Design Research Association EDRA Several publishers were contacted about the possibility of an EDRA Annual Review Eliot Werner at Plenum Press expressed great interest but suggested that an Advances series would be more appropriate since publication could be tied to a less specific timetable EDRA Plenum and the editors signed a contract in June 1984 for three volumes with an open door for oral agreements between Plenum and the editors after that time Four volumes have been published Volume 1 1987 Volume 2 1989 Volume 3 1991 and the current Volume 4 each containing 10 to 12 chapters The Physical Environment and Behavior Joachim F. Wohlwill, Gerald D. Weisman, 2012-12-06 The field of Environment and Behavior This bibliography is aimed at the researcher and advanced student working in the field of environmental psychology as it has come to be designated over the past decade A more appropriate term might be environment behavior studies to suggest the important characteristic of this field as one that transcends the province of the psychologist and brings together workers as well as problems methods and concepts from a great diversity of disciplines and professional fields Among these we may include geography and sociology architecture

landscape architecture and planning forestry natural resource management and leisure and recreation research to name only the most important of the diverse fields from which material for this bibliography has been drawn This is in fact one of the primary reasons for our belief in the value of such a volume The literature in the environment behavior field is scattered through the most diverse sources including not only the major periodical and monographic literature in each of the above mentioned disciplines and professions and others as well but also a variety of more specialized publications of varying degrees of accessibility Thus it seemed to us helpful to the researcher teacher and student in this area to bring this far flung literature together in a single volume that might be used as a guide to the field We aimed at a comprehensive treatment including both basic and applied aspects and relations of behavior both to the man made or artificial and to the natural environment

*Visions of Aesthetics, the Environment & Development* Roger M. Downs, Lynn S. Liben, 2013-03-07 Derived from a conference honoring the legacy of Joachim Wohlwill this volume is designed to reflect as many facets of the late scholar's wide ranging work as possible As its title indicates the book identifies three broad areas in which Wohlwill made significant contributions art and aesthetics human environment interaction and concepts of development In each of these areas Wohlwill made seminal contributions helping to shape maintain and even change the direction of research and thought Specific topics addressed here by his colleagues students and contemporaries include the shape of development the intermingling of perception and cognition the balance between innate and acquired processes the relation between environmental and ecological psychology the development of the ability to use external representations of the physical environment and the way world views underpin beliefs about the nature of development

**People and Environment** D.J. Walmsley, G.J. Lewis, 2014-09-19 First published in 1994 This book comprises a second edition of Human Geography behavioural approaches first published in 1984 The first edition attempted to synthesize the massive volume of geographical literature to have appeared mainly since 1960 concerned with both how people come to know the environment in which they live and with the way in which such knowledge influences subsequent spatial behaviour As with the first edition the rationale for advantages of and shortcomings with behavioural approaches are explored at length in both substantive chapters and in a number of detailed examinations of particular aspects of life in advanced Western society

Dwelling, Place and Environment David Seamon, Robert Mugerauer, 2012-12-06 themes among the essays resurface and resonate Though our request for essays was broad and open ended we found that topics such as seeing authenticity interpretation wholeness care and dwelling ran as undercurrents throughout Our major hope is that each essay plays a part in revealing a larger whole of meaning which says much about a more humane relationship with places environments and the earth as our home Part I Beginnings and directions At the start we recognize the tremendous debt this volume owes to philosopher Martin Heidegger 1890-1976 whose ontological excavations into the nature of human existence and meaning provide the philosophical foundations for many of the essays particularly those in Part I of the volume Above all else Heidegger was regarded by his

students and colleagues as a master teacher He not only thought deeply but was also able to show others how to think and to question Since he perhaps more than anyone else in this century provides the instruction for doing a phenomenology and hermeneutic of humanity's existential situation he is seminal for phenomenological and hermeneutical research in the environmental disciplines He presents in his writings what conventional scholarly work especially the scientific approach lacks he helps us to evoke and understand things through a method that allows them to come forth as they are he provides a new way to speak about and care for our human nature and environment

**Environmental Psychology** Mirilia Bonnes, Gianfranco Secchiarioli, 1995-06-22 This textbook provides a clear and comprehensive introduction to the rapidly expanding field of environmental psychology The authors start with a review of the history of environmental psychology highlighting its interdisciplinary nature They trace its roots in architecture ecology and geography and examine the continuing relationship of these subjects to the psychological tradition The book then moves through key contemporary lines of research in the field contrasting models from perception and cognition such as those of Gibson and Brunswick with major social psychological approaches as represented by Lewin Barker and others The book concludes with an analysis of the most promising areas of research and practice

Eurasian Business and Economics Perspectives Mehmet Huseyin Bilgin, Hakan Danis, Ender Demir, Gokhan Karabulut, 2022-01-03 This book presents selected papers from the 33rd Eurasia Business and Economics Society EBES Conference virtually held in Madrid Spain due to the Covid 19 pandemic The theoretical and empirical papers gathered here cover diverse areas of business economics and finance in various geographic regions including not only topics from HR management finance marketing but also contributions on public economics political economy and regional studies

*The Development of Spatial Cognition* Robert Cohen, 2013-08-21 First published in 1985 The present book represents a statement of the state of the art in a very important aspect of spatial cognition its development

Behavior and Environment T. Garling, R.G. Golledge, 1993-01-28 Active researchers in the areas of geography and psychology have contributed to this book Both fields are capable of increasing our scientific knowledge of how human behavior is interfaced with the molar physical environment Such knowledge is essential for the solution of many of today's most urgent environmental problems Failure to constrain use of scarce resources pollution due to human activities creation of technological hazards and deteriorating urban quality due to vandalism and crime are all well known examples The influence of psychology in geographical research has long been appreciated but it is only recently that psychologists have recognized they have something to learn from geography In identifying the importance of two way interdisciplinary communication a psychologist and a geographer have been invited to each write a chapter in this book on a designated topic so that close comparisons can be drawn as to how the two disciplines approach the same difficulties Since the disciplines are to some extent complementary it is hoped that this close collaboration will have synergistic effects on the attempts of both to find solutions to environmental problems through an increased understanding of the many behavior environment interfaces
