Environmental Science With Olc:

Environmental Science William P. Cunningham, Mary Ann Cunningham, Barbara Woodworth Saigo, 2003-03 This book is intended for use in a one or two semester course in environmental science human ecology or environmental studies at the college or advanced placement high school level Because most students who will use this book are freshman or sophomore nonscience majors the authors have tried to make the text readable and accessible without technical jargon or a presumption of prior science background At the same time enough data and depth are presented to make this book suitable for many upper division classes and a valuable resource for students who will keep it in their personal libraries after their formal studies are completed The goal of this book is to provide an up to date introductory view of essential themes in environmental science along with emphasis on details and case studies that will help students process and retain the general principles

Principles of Environmental Science William P. Cunningham, Mary Ann Cunningham, 2001-05 As environmental science textbooks have gotten larger and more encyclopedic over the years an increasing number of instructors have called for a smaller less expensive book that concentrates on the core principles of the discipline Principles of Environmental Science Inquiry and Applications emphasizes how science can help us find solutions for important environmental issues While not attempting to describe every possible environmental dilemma or scientific field of study this new text focuses on the major topics we face and how scientists search for answers to questions about them Students are provided a solid grounding in scientific principles and then encouraged to think analytically and creatively on their own

Emerging Nanostructured Materials for Energy and Environmental Science Saravanan Rajendran, Mu. Naushad, Kumar Raju, Rabah Boukherroub, 2019-02-07 This book provides the fundamental aspects of the diverse ranges of nanostructured materials 0D 1D 2D and 3D for energy and environmental applications in a comprehensive manner written by specialists who are at the forefront of research in the field of energy and environmental science Experimental studies of nanomaterials for aforementioned applications are discussed along with their design fabrication and their applications with a specific focus on catalysis energy storage and conversion systems This work also emphasizes the challenges of past developments and directions for further research It also looks at details pertaining to the current ground breaking of nanotechnology and future perspectives with a multidisciplinary approach to energy and environmental science and informs readers about an efficient utilization of nanomaterials to deliver solutions for the public

Beyond Access Stephanie J. Waterman, Shelly C. Lowe, Heather J. Shotton, 2023-07-03 This book argues that two principal factors are inhibiting Native students from transitioning from school to college and from succeeding in their post secondary studies It presents models and examples of pathways to success that align with Native American students aspirations and cultural values Many attend schools that are poorly resourced where they are often discouraged from aspiring to college Many are alienated from the educational system by a lack of culturally appropriate and meaningful environment or support systems that reflect Indigenous values of

community sharing honoring extended family giving back to one's community and respect for creation The contributors to this book highlight Indigenized college access programs meaning programs developed by not just for the Indigenous community and are adapted or developed for the unique Indigenous populations they serve Individual chapters cover a K-12 program to develop a Native college going culture through community engagement a crash course offered by a higher education institution to compensate for the lack of college counseling and academic advising at students' schools the role of tribal colleges and universities the recruitment and retention of Native American students in STEM and nursing programs financial aid educational leadership programs to prepare Native principals superintendents and other school leaders and finally data regarding Native American college students with disabilities The chapters are interspersed with narratives from current Indigenous graduate students This is an invaluable resource for student affairs practitioners and higher education administrators wanting to understand and serve their Indigenous students
