Political Economy of Financialization and Its Measuring: Indicators of Financialization in OECD Countries Abdilcelil Koç, In the history of capitalism there is a consensus in the literature that the 1980s was a turning point According to many heterodox social scientists the critical development that provides this turning point is that capitalism has entered the financialization process This period that started after 1980 is called Financialized capitalism This period's most important characteristic feature is that the capital accumulation mechanism shifted gravity from the industrial sector to the financial field In the heterodox political economy much literature on financialization has emerged over the past fifteen years However it still does not have a single definition agreed upon Unfortunately a composite financialization index measuring the level of multi dimensional financialization for different countries has not yet been found in the literature In this book first of all the financialization literature of Neo Marxist and Post Keynesian political economy approaches has been scanned and four dimensions of financialization have been determined These are the financialization of the national economy the financial sector non financial firms and households In this context to measure financialization a panel data set covering 22 variables that can represent the four dimensions of financialization OECD countries and the period between 1995 2018 was created The OECD averages of each variable were found through this data set and their long term developments were analyzed In addition the behavior of each variable before during and after the 2008 Global Crisis caused by financialization was also evaluated As a result of the analyzes made it has been seen that these variables are suitable for the creation of a composite financialization index Our greatest wish is that this book will be helpful to students in fields such as economics political science international relations sociology and researchers who aim to measure financialization
