Public Funding of Higher Education Edward P. St. John, Michael D. Parsons, 2005-09-23 Much of the twentieth century saw broad political support for public funding of American higher education Liberals supported public investment because it encouraged social equity conservatives because it promoted economic development Recently however the politics of higher education have become more contentious Conservatives advocate deep cuts in public financing liberals want to expand enrollment and increase diversity Some public universities have embraced privatization while federal aid for students increasingly emphasizes middle class affordability over universal access In Public Funding of Higher Education scholars and practitioners address the complexities of this new climate and its impact on policy and political advocacy at the federal state and institutional levels Rethinking traditional rationales for public financing contributors to this volume offer alternatives for

The Financing of American Higher Education, 1984 *Financing a College Education* Jacqueline Elizabeth King, 1999 In *Financing a College Education* 15 prominent policy analysts and higher education specialists describe how student costs at U S postsecondary institutions are met why and how student aid policy and practice have changed over the last few years and what enhancements to current programs would make the system more equitable The book s first part describes the massive and unwieldy but vitally important system of federal state private and institutional financial aid for students The second part discusses controversial student aid issues that are currently high on the national agenda in particular the shift away from ensuring access and toward making college more affordable for students from middle class families

Financing Higher Education Worldwide D. Bruce Johnstone, Pamela N. Marcucci, 2010-06-07 No issue in higher education is as salient or as controversial as finance As demand for higher education around the world grows so do the costs associated with it especially as governments shoulder less of the burden Tuition fees rise and student loan debt grows Who pays for these surging costs Who should pay D Bruce Johnstone and Pamela N Marcucci examine the universal phenomenon of cost sharing in higher education where financial responsibility shifts from governments and taxpayers to students and families They find that growing costs for education far outpace public revenue streams that once supported it Even with financial aid and scholarships defraying some of these costs students are responsible for a greater share of the cost of higher education Featuring comprehensive economic and policy data the authors international comparative approach shows how economically diverse countries all face similar cost sharing challenges So who should pay for higher education While cost sharing is both politically and ideologically debated Johnstone and Marcucci contend that for almost all countries it is imperative for the financial health of colleges and universities bringing better efficiency equity and responsiveness *Financing Higher Education Worldwide* combines sophisticated economic explanations with sensitive political and cultural analyses of the financial pressures facing higher education throughout the world

Financing Higher Education Organisation for Economic Co-operation and Development, 1990 The nature of the changes in the patterns of financing and control of higher education systems which have been observed in the Organisation for Economic Cooperation and Development OECD countries over the last decade are discussed In particular the report analyzes the links between expenditure patterns costs and efficiency in higher education in relation to the mechanisms by which institutions receive funds and examines these areas against the background of changing policies for

public financing The report draws extensively on a series of country case studies prepared specifically for the analysis The first chapter provides background information and discusses models and concepts Additional chapters examine the following areas 1 the existing arrangements and recent trends in the funding of higher education institutions in the studied OECD countries 2 the variety of schemes of student financial support in the OECD member countries taking part in the study 3 funding mechanisms and the functions of higher education institutions and 4 future prospect and policy implications based on current observations Contains six tables of analytical data and a resource list of national reports GLR *Financing American Higher Education in the Era of Globalization* William Zumeta, David W. Breneman, Patrick M. Callan, Joni E. Finney, 2021-02-23 This ambitious book grows out of the realization that a convergence of economic demographic and political forces in the early twenty first century requires a fundamental reexamination of the financing of American higher education The authors identify and address basic issues and trends that cut across the sectors of higher education focusing on such questions as how much higher education the country needs for individual opportunity and for economic viability in the future how responsibility for paying for it is currently allocated and how financing higher education should be addressed in the future

Student Financing of Higher Education Donald Heller, Claire Callender, 2013-06-07 The financing of higher education is undergoing great change in many countries around the world In recent years many countries are moving from a system where the costs of funding higher education are shouldered primarily by taxpayers through government subsidies to one where students pay a larger share of the costs There are a number of factors driving these trends including A push for massification of higher education in the recognition that additional revenue streams are required above and beyond those funds available from governments in order to achieve higher participation rates Macroeconomic factors which lead to constraints on overall government revenues Political factors which manifest in demands for funding of over services thus restricting the funding available for higher tertiary education A concern that the returns to higher education accrue primarily to the individual rather than to society and thus students should bear more of the burden of paying for it This volume will help to contribute to an understanding of how these trends occur in various countries and regions around the world and the impact they have on higher education institutions students and society as a whole With contributions for the UK USA South Africa and China this vital new book gives a truly global picture of the rapidly changing situation
