MOUNTAIN GEOMORPHOLOGY Phil Owens, Olav Slaymaker, 2014-02-04 Mountains represent one of the most inspiring and attractive natural features on the surface of the earth Visually they dominate the landscape However the increasing realization of the fragility of mountain areas because of changes in land use management and climate combined with an understanding of their importance for water and other natural resources has resulted in a growing interest in mountain environments in recent years Hence Mountain Geomorphology represents a timely and unique contribution to the literature Written by a team of international experts this book is divided into three sections which consider historical functional and applied mountain geomorphology from both global and local perspectives Historical mountain geomorphology focuses on the evolution of landforms Functional mountain geomorphology emphasises the interaction between processes and landforms while applied mountain geomorphology concerns the interrelationships

between geomorphological processes and society Mountain Geomorphology is a valuable source of information for students studying mountain geomorphology and also for academics and research scientists interested in mountain environments

Ecology of a Managed Terrestrial Landscape Ajith H. Perera, David L. Euler, Ian D. Thompson, 2011-11-01 The growing popularity of the broad landscape scale approach to forest management represents a dramatic shift from the traditional stand based focus on timber production Ecology of a Managed Terrestrial Landscape responds to the increasing need of forest policy developers planners and managers for an integrated comprehensive perspective on ecological landscapes The book examines the big picture of ecological patterns and processes through a case study of the vast managed forest region in Ontario The contributors synthesize current landscape ecological knowledge of this area and look at gaps and future research directions from several points of view spatial patterns ecological functions and processes natural disturbances and ecological responses to disturbance They also discuss the integration of landscape ecological knowledge into policies of forest management policies particularly with respect to Ontario's legislative goals of forest sustainability Ecology of a Managed Terrestrial Landscape is the first book to describe the landscape ecology of a continuously forested landscape in a comprehensive manner It is written for instructors and students in forest management wildlife ecology and landscape ecology and for forest managers planners and policy developers in North America **Rock Coast Geomorphology** D.M.

Kennedy, W.J. Stephenson, L.A. Naylor, 2014-08-20 Rocky landforms dominate large portions of the world's coast Cliffs and shore platforms form spectacular landscapes yet when compared to other landforms they are relatively unstudied with many contemporary controversies dating back to the mid nineteenth century The past decade has seen a reinvigoration of research driven by advances in technology that now enable precise measurements of erosion to the micron scale and quantification of wave energy onto and through cliff edifices to be made as well as being able to directly date rock surfaces In order to integrate this diverse range of research this volume's regional approach first integrates the latest data with longstanding theory and then analyses this research through the boundary conditions that exist in each area The volume brings together the research leaders in the field includes chapters on nearly all the major rock coasts of the world and identifies future research needs

Treatise on Geomorphology, 2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline The number of peer reviewed papers published in geomorphic journals has grown steadily for more than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary background geography geology ecology civil engineering computer science geographic information science and others has expanded dramatically As more good minds are drawn to geomorphology and the breadth of the peer reviewed literature grows an effective summary of contemporary geomorphic knowledge becomes increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis

addresses a topic that always remains popular within the geosciences and environmental science More specifically the volume conveys a growing legacy of field based learning for young geomorphologists that can be used as a student book for field based university courses and postgraduate research requiring fieldwork or field schools The editors have much experience of field based learning within geomorphology and extend this to physical geography The topics covered are relevant to basic geomorphology as well as applied approaches in environmental and cultural geomorphology The book integrates a physical human approach to geography but focuses on physical geography and geomorphology from an integrated field based geoscience perspective Addresses fluvial and karst landscapes in depth Focuses on field based learning as well as educational geomorphology Conveys experiential knowledge in international contexts **Landscapes of Transition** Kenneth Hewitt, Mary-Louise Byrne, Michael English, Gordon Young, 2013-06-29 This volume had its origins in an international symposium organised by the Cold Regions Research Centre and held at Wilfrid Laurier University in November 1999 The chapters are modified from a selection of the papers at the meeting and reflect reviews and revisions in light of discussions then The original idea for the meeting was to address certain questions that the organisers were encountering in their own work and that we felt had received limited attention in the recent literature The two broad issues we wanted to address were the complex associations of actual landforms and processes in cold regions and how the almost universal legacies of past different cold environments of the late Quaternary affect these landscapes in the present The former involves the problem of identifying landform and sediment complexes and the interrelations of relevant processes We sought to identify this in terms of landform and sediment assemblages appropriate to regional and field oriented concerns Coastal Wetlands: Alteration and Remediation Charles W. Finkl, Christopher Makowski, 2017-07-18 This book delves into human induced and natural impacts on coastal wetlands intended or otherwise through a series of vignettes that elucidate the environmental insults and efforts at amelioration and remediation The alteration and subsequent restoration of wetland habitats remain key issues among coastal scientists These topics are introduced through case studies and pilot programs that are designed to better understand the best practices of trying to save what is left of these fragile ecosystems Local approaches as well as national and international efforts to restore the functionality of marsh systems are summarily approached and evaluated by their efficacy in producing resilient reclamations in terms of climate smart habitat conservation The outlook of this work is global in extent and local by intent Included here in summarized form are professional opinions of experts in the field that investigate the crux of the matter which proves to be human pressure on coastal wetland environments Even though conservation and preservation of these delicate environmental systems may be coming at a later date many multi pronged approaches show promise through advances in education litigation and engineering to achieve sustainable coastal systems The examples in this book are not only of interest to those working exclusively with coastal wetlands but also to those working to protect the surrounding coastal areas of all types Canadian Geography Thomas A.
