Job Interviews With William S Burroughs:

The Job William S. Burroughs, 2012-08-02 William Burroughs work was dedicated to an assault upon language traditional values and all agents of control Produced at a time when he was at his most extreme and messianic The Job lays out his abrasive incisive paranoiac maddened and maddening worldview in interviews interspersed with stories and other writing On the Beat movement the importance of the cut up technique the press Scientology capital punishment drugs good and evil the destruction of nations Deadly Orgone Radiation and whether violence just in words is violence enough Burroughs insights show why he was one of the most influential writers and one of the sharpest most startling and strangest minds of his generation **The Job** William S. Burroughs, Daniel Odier, 1984 The Job is William S Burroughs at work attacking our traditional values condemning what he calls the American nightmare and expressing his often barbed views on Scientology the police orgone therapy history women writing poitics sex drugs and death His conversation splices images of death by hanging with elevators and airports the story of his drug addiction and cure with ideas on the use of hieroglyphs **The Job** William S. Burroughs, Daniel Odier, 1989 **The Job Interviews with William Burroughs** William S. Burroughs, Daniel Odier, 1974 *Literature and the Rise of the Interview* Rebecca Roach, 2018 This book traces a literary and cultural history of interviews from the 1860s to today it reveals the ways in which writers have been interview subjects interviewers and have used interviews creatively in their fiction and non fiction **Burroughs Unbound** S. E. Gontarski, 2021-11-18 In addition to contributing significantly to the growing field of Burroughs scholarship Burroughs Unbound also directly engages with the growing fields of textual studies archival research and genetic criticism asking crucial questions thereby about the nature of archives and their relationship to a writer s work These questions about the archive concern not only the literary medium In the 1960s and 1970s Burroughs collaborated with filmmakers sound technicians and musicians who helped re contextualized his writings in other media Burroughs Unbound examines these collaborations and explores how such multiple authorship complicates the authority of the archive as a final or complete repository of an author s work It takes Burroughs seriously as a radical theorist and practitioner who critiqued drug laws sexual practice censorship and what we today call a society of control More broadly his work continues to challenge our common assumptions about language authorship textual stability and the archive in its broadest definition *Making Peace with the 60s* David Burner, 2021-07-13 David Burner s panoramic history of the 1960s conveys the ferocity of debate and the testing of visionary hopes that still require us to make sense of the decade He begins with the civil rights and black power movements and then turns to nuanced descriptions of Kennedy and the Cold War the counterculture and its antecedents in the Beat Generation the student rebellion the poverty wars and the liberals war in Vietnam As he considers each topic Burner advances a provocative argument about how liberalism self destructed in the 1960s In his view the civil rights movement took a wrong turn as it gradually came to emphasize the identity politics of race and ethnicity at the expense of the vastly more important politics of class and distribution of wealth

The expansion of the Vietnam War did force radicals to confront the most terrible mistake of American liberalism but that they also turned against the social goals of the New Deal was destructive to all concerned Liberals seemed to rule in politics and in the media Burner points out yet they failed to make adequate use of their power to advance the purposes that both liberalism and the left endorsed And forces for social amelioration splintered into pairs of enemies such as integrationists and black separatists the social left and mainline liberalism and advocates of peace and supporters of a totalitarian Hanoi Making Peace with the 60s will fascinate baby boomers and their elders who either joined denounced or tried to ignore the counterculture It will also inform a broad audience of younger people about the famous political and literary figures of the time the salient moments and above all the powerful ideas that spawned events from the civil rights era to the Vietnam War Finally it will help to explain why Americans failed to make full use of the energies unleashed by one of the most remarkable decades of our history

Ideal Minds Michael Trask, 2020-11-15 Following the 1960s that decade's focus on consciousness raising transformed into an array of intellectual projects far afield of movement politics The mind's powers came to preoccupy a range of thinkers and writers ethicists pursuing contractual theories of justice radical ecologists interested in the paleolithic brain seventies cultists and the devout of both evangelical and New Age persuasions In *Ideal Minds* Michael Trask presents a boldly revisionist argument about the revival of subjectivity in postmodern American culture connecting familiar figures within the seventies intellectual landscape who share a commitment to what he calls neo idealism as a weapon in the struggle against discredited materialist and behaviorist worldviews In a heterodox intellectual and literary history of the 1970s *Ideal Minds* mixes ideas from cognitive science philosophy of mind moral philosophy deep ecology political theory science fiction neoclassical economics and the sociology of religion Trask also delves into the decade's more esoteric branches of learning including Scientology anarchist theory rapture prophecies psychic channeling and neo Malthusianism Through this investigation Trask argues that a dramatic inflation in the value of consciousness and autonomy beginning in the 1970s accompanied a growing argument about the state's inability to safeguard such values Ultimately the thinkers Trask analyzes John Rawls Arne Naess L Ron Hubbard Hal Lindsey Philip Dick Ursula Le Guin Edward Abbey William Burroughs John Irving and James Merrill found alternatives to statism in conditions that would lend intellectual support to the consolidation of these concepts in the radical free market ideologies of the 1980s

Novel Arguments Richard Walsh,1995-09-29 Novel arguments argues that innovative fiction by which is meant

writing that has been variously labeled postmodern metafictional experimental extends our ways of thinking about the world and rejects the critical consensus that under the rubrics of postmodernism and metafiction homogenizes this fiction as autonomous and self absorbed Play self consciousness and immanence supposed symptoms of innovative fiction s autonomy are here reconsidered as integral to its means of engagement The book advances a concept of the argument of fiction as a construct wedding structure and content into a highly evolved and expressive experimental form Close readings of five important innovative novels by Donald Barthelme Ishmael Reed Robert Coover Walter Abish and Kathy Acker show how they articulate matters of substance social engagement and ideological currency by virtue of the act of innovation Walsh deftly argues for a new understanding of fictional cognition at the theoretical level and in an act of great critical creativity discards altogether the flattening totalities of received postmodern formulations Dill Pickle 2019 Butte College Academic Magazine,2019-09-10 This magazine showcases academic writing across various disciplines from students at Butte College in Northern California Spring 2017 Spring 2019 **Rhetoric and Ethics in the Cybernetic Age** Jeff Pruchnic,2013-08-15 It has become increasingly difficult to ignore the ways that the centrality of new media and technologies from the global networking of information systems and social media to new possibilities for altering human genetics seem to make obsolete our traditional ways of thinking about ethics and persuasive communication inherited from earlier humanist paradigms This book argues that rather than devoting our critical energies towards critiquing humanist touchstones we should instead examine the ways in which media and technologies have always worked as crucial cultural forces in shaping ethics and rhetoric Pruchnic combines this historical itinerary with critical interrogations of diverse cultural and technological sites the logic of video games and artificial intelligence the ethics of life extension in contemporary medicine the transition to computer automated trading in world stock markets the state of critical theory in the contemporary humanities along with innovative analyses of the works of such figures as the Greek Sophists Kenneth Burke Martin Heidegger Michel Foucault Friedrich Nietzsche and Gilles Deleuze This book argues that our best strategies for crafting persuasive communication and producing ethical relations between individuals will be those that creatively replicate and appropriate rather than resist the logics of dominant forms of media and technology Critical Vices Nicholas Zurbrugg,Warren Burt,2005-07-15 This book of Nicholas Zurbrugg s challenging and provocative essays charts the most exciting developments in late 20th century multimedia art Zurbrugg challenges Jean Baudrillard s Fredric Jameson s and Achille Bonito Oliva s unfavorable accounts of postmodern techno culture Interweaving literary and cultural theory and visual studies Zurbrugg demonstrates how multimedia visionaries such as Bill Viola and Robert Wilson are notable exceptions to the neutering of mass media culture bringing together the modernist and postmodern avant garde *Queer Experimental Literature* Tyler Bradway,2017-05-09 This volume argues that postwar writers queer the affective relations of reading through experiments with literary form Tyler Bradway conceptualizes bad reading as an affective politics that stimulates queer relations of erotic and political belonging in

the event of reading These incipiently social relations press back against legal economic and discursive forces that reduce queerness into a mode of individuality Each chapter traces the affective politics of bad reading against moments when queer relationality is prohibited obstructed or destroyed from the pre Stonewall literary obscenity debates through the AIDS crisis to the emergence of neoliberal homonormativity and the gentrification of the queer avant garde Bradway contests the common narrative that experimental writing is too formalist to engender a mode of social imagination Instead he illuminates how queer experimental literature uses form to redraw the affective and social relations that structure the heteronormative public sphere Through close readings informed by affect theory *Queer Experimental Literature* offers new perspectives on writers such as William S Burroughs Samuel R Delany Kathy Acker Jeanette Winterson Eve Kosofsky Sedgwick Alison Bechdel and Chuck Palahniuk *Queer Experimental Literature* ultimately reveals that the recent turn to affective reading in literary studies is underwritten by a para academic history of bad reading that offers new idioms for understanding the affective agencies of queer aesthetics
