Mammisis of Egypt Ali Abdelhalim Ali, Dagmar Budde, 2023-12-04 Birth Houses Mammisis are important components of late Egyptian temple complexes but have not been investigated in detail since the fundamental study of Francois Daumas published in 1958 In the meantime new archaeological findings as well as re evaluations of theology and piety in Greco Roman Egypt have considerably expanded our traditional understanding of these extraordinary buildings Therefore reassessment of phenomena and expanded research approaches need to be undertaken This book presents the printed versions of the lectures given by international Egyptologists at the IFAO in Cairo on March 27 28 2019 as part of the 1st Colloquium on Mammisis of Egypt In the publication criteria and reconsiderations are put up for discussion that can be decisive for the identification and definition of Mammisis The spectrum of topics ranges from theological basics including the significant birth cycle and typical features through historical development and cultic events to the architecture of these temple buildings Special motifs theoretical and iconographic concepts and finally the persistence of certain rites in modern Egypt are also covered One chapter introduces current scientific projects and their methods that are dedicated to selected mammisis or chapels Coptos Deir el Medina Edfu Kom Ombo Philae Bahariya Kellis Jebel Barkal Numerous illustrations complement the contributions They contain new material from excavations that is being published for the first time
