National Manhood and the Creation of Modern Quebec Jeffery Vacante, 2017-06-15 This intellectual history explores how the idea of manhood shaped French Canadian culture and Quebec s nationalist movement During the latter half of the nineteenth century Quebec was an agrarian society and masculinity was rooted in the land and the family and informed by Catholic principles of piety and self restraint As the industrial era took hold a new model was forged built on the values of secularism and individualism Jeffery Vacante s perceptive analysis reveals how French Canadian intellectuals defined masculinity in response to imperialist English Canadian ideals This national manhood would be disentangled from the workplace the family and the land and tied instead to one s cultural identity The new formulation was crucial in the larger struggle to modernize Quebec s institutions while preserving French Canadian community faith and culture It offered French Canadian men a way to remodel themselves participate in industrial modernity and still assert cultural authority

Prelude to Quebec's Quiet Revolution Michael D. Behiels, 1985-06-01 In this study of the intellectual origins of Quebec's Quiet Revolution of the 1960s Michael Behiels has provided the most comprehensive account to date of the two competing ideological movements which emerged after World War II to challenge the tenets of traditional French Canadian nationalism The neo nationalists were a group of young intellectuals and journalists centered upon Le Devoir and L Action nationale in Montreal who set out to reformulate Quebec nationalism in terms of a modern secular urban industrial society which would be fully master in its own house An equally dedicated group of French Canadians of liberal or social democratic persuasion was based upon the periodical Cit libre one of whose editors was Pierre Trudeau and had links with organized labour Cit libristes sought to remove what they considered to be the major obstacles to the creation of a modern francophone society the all pervasive influence of clericalism inherent in the Catholic church's control of education and the social services and the persistence among Quebec's intelligentsia of an outmoded nationalism which advocated the preservation of a rural and elitist society and neglected the development of the individual and the pursuit of social equality Behiels delineates the divergent societal models proposed by the two movements by focusing upon such themes as the critique of traditional nationalism the roles of church state and labour the response to the new federalism the reform of education and the search for a third party He shows how the rivals combined to help bring down an anachronistic Union Nationale government in June 1960 In one form or another he concludes Cit libre liberalism and neo nationalism have remained at the heart of the political and ideological debate that has continued in Quebec since the Duplessis era

Convergence or Divergence? Simon Langlois, Theodore Caplow, 1994-11-16 Trends in fertility decline intergenerational relations religion and

secularization ecological movements employment and labour market changes personal authority and social conflict are examined This analysis shows an unmistakable convergence of social trends except in the domain of religion But when the interconnection of these trends within each national society is examined unexpected divergences are revealed There are parallel trends in demography organization of production national institutions social practices and life style and divergent trends in social inequality social movements and local institutions Barriers between social classes have eroded and something that might be called multidimensional stratification has emerged the diminution of violence in social conflicts implies an increasing volume of negotiation and all forms of personal authority have been weakened The transformation of the family structure is no doubt one of the most important changes in western civilization The cross national analyses of recent social trends help us to assess both convergence and divergence and to identify emergent singularities Does convergence of trends mean these societies face a common destiny With respect to trends so strong that they act as exogenous variables the answer is yes However with respect to the responses those trends elicit in the context of a particular society the answer is no Massive convergence of trends does not mean that societies face a uniform future
