Local Approaches To Environmental Compliance:

Local Approaches to Environmental Compliance Adriana Noemi Bianchi, Wilfrido Cruz, Masahisa Nakamura, 2005 The principal obstacles to environmental compliance and enforcement in developing countries revolve around constraints that are political, economic and institutional. As demonstrated in the Japanese case studies, effective responses have often required consensus and commitment at the local government and community levels. Although there are many instances when implementation is hindered by lack of technical skills or lack of the needed technology, the underlying constraints are rarely technological.

Local Approaches to Environmental Compliance World Bank Institute, 2005 The case studies set out in this publication consider how the experience of Japan in its approach to urban and industrial environmental management and the enforcement of environmental protection standards can provide useful lessons relevant to developing countries. The case studies highlight the role played by local government involvement, community participation and private industry initiatives in helping to deal with the significant pollution problems caused by Japan's rapid industrial expansion during the 1960s and 1970s.

Ensuring Environmental Compliance Trends and Good Practices OECD, 2009-05-19 This report examines the strategies and instruments that governments use to ensure compliance with pollution prevention and control regulations, particularly in the industrial sector.

Manual on Compliance with and Enforcement of Multilateral Environmental Agreements Carl Bruch, United Nations Environment Programme, 2006 This Manual expands upon Guidelines on Compliance with and Enforcement of Multilateral Environmental Agreements (MEAs). Many States participated in the development and negotiation of the Guidelines, which were adopted by the UNEP Governing Council in 2002. While this Manual is not a negotiated document, it also is the result of a collaborative process involving a wide range of numerous individuals around the world. These people assisted in drafting case studies and other contributions, reviewing the text and suggesting substantive and formatting changes.
