## **Local Government Budgeting:**

Local Government Budgeting Gerasimos A. Gianakis, Clifford McCue, 1999-01-30 In an effort to bridge the gap between budget theorists and practitioners this book approaches local government budgeting as the internal resource allocation process of a highly differentiated organization that operates in a very political environment and whose boundaries are particularly permeable during the formal budget process Written by academics with extensive practical experience in local government budgeting and finance this text will be equally useful to practitioners scholars and students Theory building in public budgeting has been dominated by political science and economics and these approaches have not produced theories that can serve as guides to action for practitioners or help them understand their action environments In order to produce theory that has meaning for practitioners researchers should approach the subject as it is experienced by practitioners The long term financial health of local governments requires an integrated approach to public budgeting This book develops theory that illuminates practice It recognizes that the budget process is the only organization wide process that integrates all of the agencies that comprise the government and thus the budget must address the long term consequences of any action The budget process itself is presented as a vehicle to develop the decision premises and organizational values that will support allocative efficiency and productivity

*Budgeting for Local Governments and Communities* Douglas Morgan, Kent S. Robinson, Dennis Strachota, James A. Hough, 2017-09-19 Budgeting for Local Governments and Communities is designed as the primary textbook for a quarter or semester long course in public budgeting and finance in an MPA programme Many currently available texts for this course suffer from a combination of defects that include a focus on federal and state budgeting a lack of a theoretical governance framework an omission of important topics and typically a lack of exercises and datasets for student use Budgeting for Local Governments and Communities solves all of these problems The book is exceptionally comprehensive and well written and represents the efforts of veteran authors with both teaching and real world experience Key Features Special Focus on Local Government Budgeting focuses exclusively on budgeting at the local levels of American government which are responsible for spending 40 percent of the taxes collected from citizens Integration of Theory and Practice teaching cases and chapters capture the lessons learned by professional practitioners who have extensive experience in making local public budgeting work on the ground Polity Approach to Local Budgeting presents an introduction to local budgeting as the central political activity that integrates the resources of the community into a unified whole Budgeting is presented as governance work rather than as a unique set of skills possessed by analysts and financial specialists Legal Historical Economic and Moral Foundations of Local Government Budgeting provides readers with an understanding of how the structures and processes of local budgeting systems are firmly tethered to the underlying core values legal principles and historical development of the larger American federal state and local political systems Electronic Datasets and Budgeting Exercises the text includes access to extensive electronic datasets and practice exercises that

provide abundant opportunities for students to learn through doing Extensive Glossary and Bibliography covers terms on the history and practice of local public budgeting *Local Government Budgeting* Julie M. Brenman, Gregory S. Allison, 2013 The adoption of a budget is one of the most important activities undertaken by local government officials each year The budget serves as the elected board's primary opportunity to establish community priorities and as a tool for planning community services and programs communicating priorities and properly managing finances The budget process however with its big numbers multiple acronyms and counterintuitive rules can be confusing A book in the Local Government Board Builders series this guide is intended to remove the mystery of the budget process and to equip North Carolina's city and county governing bodies with the tools they need to actively participate in the process See the Local Government Board Builders Series webpage for other books in the series and related School of Government publications <https://www.sog.unc.edu/resource/series/local-government-board-builders-series-0>
