Calvo,2020-02-03 Due to the enormous influence of Adam Smith's *The Wealth of Nations* on Western liberal economics a tradition closely linked to the United States many scholars assume that early American economists were committed to Smith's ideas of free trade and small government Debunking this belief Christopher W Calvo provides a comprehensive history of the nation's economic thought from 1790 to 1860 tracing the development of a uniquely American understanding of capitalism *The Emergence of Capitalism in Early America* shows how American economists challenged adjusted and adopted the ideas of European thinkers such as Adam Smith David Ricardo and Thomas Malthus to suit their particular interests Calvo not only explains the divisions between American free trade and the version put forward by Smith but he also discusses the sharp differences between northern and southern liberal economists Emergent capitalism fostered a dynamic discourse in early America including a homegrown version of socialism burgeoning in antebellum industrial quarters as well as a reactionary brand of conservative economic thought circulating on slave plantations across the Old South This volume also traces the origins and rise of nineteenth century protectionism a system that Calvo views as the most authentic expression of American political economy Finally Calvo examines early Americans awkward relationship with capitalism's most complex institution finance Grounded in the economic debates Atlantic conversations political milieu and material realities of the antebellum era this book demonstrates that American thinkers fused different economic models assumptions and interests into a unique hybrid capitalist system that shaped the trajectory of the nation's economy The Way to Buddhahood □ □,1998 Captures an entire Buddhist tradition both the classic Chinese experienced views of the Tibetan monks through the enlightened words of the greatest living master of the Buddhist scholar monk tradition Original IP Flight ,1918
