Enlarging The European Union A Computable General Equilibrium Assessment Of:

Enlarging the European Union Hubertus Hille, 2018 European politics has provided clear signals the next round in the process of EU enlargement with the accession of the Central and Eastern European countries CEEC will come Since expectations concerning the costs and benefits of integration are varied it is our aim to contribute to this discussion by undertaking an empirical assessment of integration Firstly the extent of potential free labour mobility between the CEEC and the EU is assessed using an econometric model On that basis different integration scenarios i e trade liberalisation capital transfers and labour migration are simulated using a computable general equilibrium model Our results suggest that migration flows will be moderate and that integration is likely to cause positive welfare effects in the CEEC and negligible effects in the EU

Policy Evaluation with Computable General Equilibrium Models Amedeo Fossati, Wolfgang Wiegard, 2003-09-02 Computable General Equilibrium CGE modelling is a relatively new field in economics however it is rapidly becoming one of the most useful tools for policy evaluation This book applies CGE modelling to some of the most urgent international economic policy problems including the Kyoto Protocol pension reform and income taxation and also analyses the methodological issues that arise

Managing European Union Enlargement Helge Berger, Thomas Moutos, 2004 Leading international economists assess the effects of the 2004 expansion of the European Union In May 2004 the European Union will undergo the largest expansion in its history when ten countries Cyprus the Czech Republic Estonia Hungary Latvia Lithuania Malta Poland Slovakia and Slovenia become members The number of new members and their diversity make this big bang enlargement particularly challenging Not only do these countries vary widely in language culture and geography but also their per capita income is less than half that of existing members EU officials believe that expanded integration will serve the EU s objectives of peace stability prosperity and democracy but the less abstract questions of costs and benefits of enlargement are more complex Each of the chapters in this CESifo volume addresses a different aspect of EU expansion The contributors all leading international practitioners and scholars consider such topics as the effect of euro zone expansion on European Central Bank monetary policy making using the euro as an external anchor for a national currency worker migration and income differentials the Swiss experience with immigration policy in a direct democracy framework detailed sector analysis using a computable general equilibrium model of the world economy investment and job creation and destruction in incumbent member countries and the asymmetric effects of enlargement on high and low income incumbent countries Taken together the chapters provide useful guidance in shaping the EU policies of the future

Industrial and Regional Policies in an Enlarging EU David Bailey, Lisa De Propriis, 2014-10-20 After years of near disrepute in official circles Industrial Policy has made something of a comeback over the last few years and is now very much back on the agenda at national and EU levels driven by concerns over globalisation deindustrialisation unemployment and perceived poor growth in the EU Simultaneously the European Commission's Fourth Report on Economic and Social Cohesion has kicked off the debate over challenges to cohesion the shape of EU Cohesion policy beyond 2013 and how resources should be managed This debate will find added momentum with the imminent mid term review being launched by the Commission Discussions over the success or not of the Lisbon Agenda on going debates over cluster policies and recent developments in policy evaluation have also contributed to a burgeoning academic literature over the last eighteen months This edited volume is especially pertinent given such developments and pulls together a diverse range of contributions from leading authorities in the field to add to these debates and to illustrate connections between them This book was published as a special issue of Policy Studies

Industry Agglomerations and Regional Development in Hungary Cordula Wandel, 2010 In context with the Eastern enlargement of the European Union this research deals with the effects of pre and post enlargement integration policies on

industry concentration and regional development in Hungary Economic processes are analysed empirically and by means of regression analyses with a spatial perspective and in the framework of the new economic geography over a time span of almost two decades The results for the manufacturing industries and for regional specialization show which economic centres played a role for the economic development of the country over time The roles which agglomerations and regional specialization can play are discussed with a view to the problems of cohesion in Hungary the enlarged EU and future EU accession countries The conclusions also take into account the current political and academic debate regarding European regional policy

Central and Eastern European Agriculture in an Expanding European Union Stefan

Tangermann,M. Banse,2000-01-01 The problems caused by the proposed enlargement of the EU to include the associated Central and Eastern European countries CEEC are discussed in this book The two main agricultural issues raised by this are the relative competitiveness of CEEC agricultural policies

Rural Development in the Enlarged European Union Katarzyna Zawalińska,2005

Socioeconomic and Environmental Impacts on Agriculture in the New Europe Serban

Scrieciu,2011-03-13 This book looks at agriculture and the environment placed within the dynamic context of post communist societal change and entry into the European Union EU Scrieciu explores developments in eleven Central and Eastern European CEE countries and argues for agriculture s natural place in these societies The history of these countries is significant in how it has shaped the institutions and influenced the outcomes In many cases during communism agriculture was not considered a strategically An ecological consciousness did not figure high on the agendas of authoritarian regimes After 1990 some post communist farm economies progressed slower than others and environmental pressures mostly diminished with agricultural restructuring In parts of CEE increases in numbers of low input small farms have resulted in some though largely unintended ecological benefits A dual environmental challenge has nevertheless surfaced On one hand environmentally unsustainable practices have been attributed to some low input farming On the other hand risks of farm over intensification and resource overexploitation are on the rise Also environmental regulatory and institutional frameworks are not always effectively in place EU membership is not creating the anticipated benefits for farm growth There are a number of systemic structural barriers preventing many farmers from drawing on Common Agricultural Policy incentives and support The presence of many vulnerable poor farms is clearly problematic particularly economically However small scale farms could be made more acceptable and profitable by ensuring EU policies acknowledge their value and by building institutions to support alternative farm growth strategies aside from the traditional European model of individual corporate farm expansion The voluntary uptake of grassroots rural cooperation and farm associations may represent such an alternative Future European farm policy reforms need to reach the small and vulnerable and better tackle issues of farm equity poverty and agricultural sustainability in the new Europe This is a timely contribution as this type of transition has just begun This book should be of use to students and researchers looking at agricultural and environmental economics post communist rural

societal change European integration and the Common Agricultural Policy **Handbook of Computable General Equilibrium Modeling** Peter B. Dixon, Dale Jorgenson, 2013-01-08 Top scholars synthesize and analyze scholarship on this widely used tool of policy analysis in 27 articles setting forth its accomplishments difficulties and means of implementation Though CGE modeling does not play a prominent role in top U S graduate schools it is employed universally in the development of economic policy This collection is particularly important because it presents a history of modeling applications and examines competing points of view Presents coherent summaries of CGE theories that inform major model types Covers the construction of CGE databases model solving and computer assisted interpretation of results Shows how CGE modeling has made a contribution to economic policy **European Agriculture** Frank Fuller, 2007 This book provides an in depth look at Europe s changing agricultural and food markets focusing on the impacts of recent policy reforms enlargement of the European Union EU and trade liberalisation The papers included in this book braid together four important themes in European agriculture and food markets the impacts of EU enlargement on productivity growth and catching up in the Central and Eastern European countries CEECs the influence of food quality standards on market structures in the CEECs and on trade the impacts of common agricultural policy CAP reforms on EU and world markets and the costs of adjusting to CAP reforms in specific sectors The insights provided in these papers into the empirical interactions between policies institutions and market outcomes both domestically and internationally are valuable to policy makers and researchers interested in the future of European agriculture Capital and Trade Flows in Europe and the Impact of Enlargement Claudia M. Buch, Daniel Piazolo, 2000 *Quantitative Assessment of a Free Trade Agreement Between MERCOSUR and the European Union* Ivan Boyer, Andrés Ricardo Schuschny, 2010 This paper assesses the possible effects of a free trade agreement FTA between MERCOSUR a regional trade agreement between Brazil Argentina Paraguay and Uruguay and the EU The study takes into consideration the most important recent FTAs signed among the Latin American countries as well as the latest European Union enlargements Section I of the publication describes the trade relations between MERCOSUR and the EU putting focus on the reasons for negotiating and the recent trade relations between them Section II describes the model the country and the product aggregations and the simulation scenarios Section III details the main results Section IV concludes the study and brings in some insight about the key outcomes and recommendations *A European Public Investment Outlook* Floriana Cerniglia, Francesco Saraceno, 2020-06-12 This outlook provides a focused assessment of the state of public capital in the major European countries and identifies areas where public investment could contribute more to stable and sustainable growth A European Public Investment Outlook brings together contributions from a range of international authors from diverse intellectual and professional backgrounds providing a valuable resource for the policy making community in Europe to feed their discussion on public investment The volume both offers sector specific advice and highlights larger areas which should be prioritized in the policy debate from transport to social capital R D and

the environment The Outlook is structured into two parts the chapters of Part I respectively explore public investment trends in France Germany Italy Spain and Europe as a whole and illuminate how the legacy of the 2008 Global Financial Crisis is one of insufficient public investment Part II investigates some areas into which resources could be channelled to reverse the recent trend and provide European economies with an adequate public capital stock The essays in this outlook collectively foster a broad approach to and definition of public investment that is today more relevant than ever Offering up a timely and clear case for the elimination of bias against investment in European fiscal rules this outlook is a welcome contribution to the European debate aimed both at policy makers and general readers

National Competitiveness of Vietnam Hien Phuc Nguyen,2009 The author presents an empirical study on Vietnam s national competitiveness by using mixed methods research qualitative and quantitative with a combination of hard and soft data The result shows that production resources human infrastructure capital and natural resources have played the most important role in improving competitiveness productivity and living standard in Vietnam in the last two decades The author also analyzed and evaluated the competitiveness of the Vietnamese economy and pointed out the remaining weaknesses of competitiveness compared to the selected regional countries such as shortage of production resources supply a dominance of inefficient state owned enterprises and its slow reform and weak public institutions as well as inefficient government governance These weaknesses have led Vietnam s competitiveness productivity and economic growth to remain low especially compared to China Finally the author attempts to provide some recommendations enhancing the competitiveness productivity and citizens living standard in Vietnam in the long term

Success and Failure of Post-communist Transition Ferdinand Pavel,2001 *Issues and Challenges in Rural Development* Siegfried Bauer,Lila Bahadur Karki,2007

Impact Assessment and Sustainable Development Clive George,Colin H. Kirkpatrick,2007-01-01 Impact assessment of various types is now a widely used policy tool This volume helpfully brings together conceptual discussions and case studies to illustrate how impact assessment can be used to address issues of sustainability It should be of considerable interest both to academic researchers and to practitioners concerned with the implementation of policies to support sustainable development John Weiss University of Bradford UK The translation of the principle of sustainable development into policy and practice and the evaluation of the outcomes of these strategic interventions are some of the most pressing challenges facing policymakers in Europe and beyond By exploring the conceptual and methodological issues relating to the evaluation of sustainable development and analysing European practice and experience the sixteen chapters in this volume provide a coherent and integrated contribution to our understanding of these issues This volume will be of interest to researchers policy analysts and practitioners in the area of impact assessment and sustainable development

Shaping the New Europe M. Landesmann,D. Rosati,2004-04-30 This volume brings together contributions on the major economic policy issues which have opened up as a result of the immanent process of European Union Enlargement The issues analyzed range from modelling

and analyzing the costs and benefits of enlargement to challenges for macroeconomic policy both at the EU level and in the new member countries to the state of affairs in the new member countries with respect to sectoral policy reforms such as those undertaken in the financial sector and in competition policy and the impact of enlargement on Europe's trade policy agenda
