Enlightenment And Alienation:

Enlightenment & Alienation Colin E. Gunton, 2006-12-01 IN THIS CRITIQUE OF THE LEGACY OF THE Enlightenment for Christian theology Colin Gunton focuses on the concepts of truth freedom and faith He argues that in these areas the emphasis of Enlightenment thought on knowledge which is observable and objective has alienated us from understanding or believing in whatever cannot be seen or scientifically deduced and cut us off from reality from ourselves and from God But the trinitarian structure of Christian belief contains within itself the resources to overcome this alienation and achieve an integrated perspective Gunton finds in the doctrine of the Trinity especially in Jesus Christ in whom the mysterious and divine joined the physical and observable a way to give validity both to scientific frames of thought and to religious belief

Colin Gunton, Tim Keller, and the Trinitarian Challenge to Individualism Steve Pearson,2025-08-05 In today s market driven world the relationship between faith and work is vital for every Christian in the workforce This book examines how much Christian thinking on the subject needs a radical shift Traditionally the focus has been on how Christians can influence the marketplace often overlooking the profound ways the market shapes our theology With a fresh perspective the book centers on identity contrasting today s individualism with the relational model of the Trinity It argues that the market can erode our Christian identity and distort our theology often without us being aware Through the insights of British theologian Colin Gunton who explored the Trinity s connection to

identity and the work of Timothy Keller on faith and work the book reveals a crucial truth our understanding of identity is not relational enough To truly engage meaningfully at the intersection of faith and work our foundational theology must be reframed

Revelation and Reconciliation Stephen Williams, 2021-01-01 This substantially revised second edition of *Revelation and Reconciliation* first published by Cambridge University Press in 1995 gives a fresh account of the intellectual breakdown of Christianity in the West In contrast to the familiar focus on epistemological questions and the collision between reason and revelation Stephen Williams argues that underlying this collision is a deeper conflict between belief in human moral self sufficiency and Christian belief in reconciliation in history Taking issue with thinkers including the philosopher of science Michael Polanyi and the theologian Colin Gunton the argument proceeds by examining the contributions of Descartes Locke Barth and Nietzsche before coming to conclusions on the theological reading of intellectual history and the prospects of revitalising a contemporary Christian belief in reconciliation in history Students of both theology and the history of modern thought will find in Williams analysis an alternative interpretation of the balance of forces in post Reformation Western thought with implications for how they should be addressed

Organisations and Humanisation Myrte van de Klundert, Robert van Boeschoten, 2016-06-23 The term humanisation was introduced in humanistic studies to develop a humanist way of thinking about organisations and human relations It stems from a need to think about questions of justice and living a good life in practice but not from some absolute or abstract point of view As it is often framed humanisation is concerned with working towards a more human type of organisation Organisation studies are concerned with understanding organisations and their role in our society and developing perspectives and methods to improve them while humanisation theories on the other hand do not represent a managerial blueprint as they tend to incorporate notions of situated knowledge sense making and relational value drawing our attention to specific processes rather than offering universal truths Although Critical Management Studies counters mainstream managerialism it still tends to produce the same kind of truths that are supposed to apply to all organisations Much of the existing management literature is related to control and offers strategies on how to do things but this is not about prescriptions rather how to explore possibilities from both theoretical and practical perspectives It offers managers as well as theoreticians of organisations the possibility to question their grounding principles In the variety of contributions to this book the authors reflect on their understanding of what it is to be human and whether this can be found in the way that organisations are run They consider the value of humanisation to understand and intervene in organisations and the challenges they face **Being and Freedom** John Skorupski, 2021-04-08 Being and Freedom is a panoramic account of ethics in Europe from the French Revolution to the end of the nineteenth century In this period the influence of ethics ran far beyond philosophy eventually dominating politics and religion in the West Developments came from France Germany and Britain this is the first book to treat them together as a Europe wide phenomenon paying attention to the context of events and ideas from which they emerged Skorupski begins by examining the philosophical conflict at the heart of the French revolution between the individualism of the Enlightenment and two very different forms of holistic ethics the old regime s ethic of service and the radical democracy of the Rousseauian left Responses analysing freedom and modern social relations came from a series of French liberal thinkers In Germany the reaction was to two revolutions seen as inaugurating modernity the political revolution in France and the philosophical revolution of Kant Here the fate of religion was critical and with it the metaphysics of being and freedom Skorupski traces this story from Kant to Hegel s idealist version of ethical holism In

Britain Enlightenment naturalism remained the prevailing framework It took different forms common sense and the theory of the sentiments in Scotland utilitarianism in England From all these elements came a synthesis of European themes by John Stuart Mill comparable in range but opposed to that of Hegel The final chapter is an assessment of this period s ethical ideas They remain the core of late modern ethics and the contested ground on which ethical disagreements take place today
