highly valuable in addition to traditional health care services but we know very little about how people actually join such a group This book offers a microanalysis of an online support group on eating disorders specifically the communication through textual messages between newcomers and regular members and members nicknames The study uses an ethnomethodological and conversation analytical approach to show that members of online support groups treat the group as a community in which their illness identity is highly relevant It appears that members invoke community norms regarding legitimacy for newcomers Newcomers are expected to admit that they are ill but this is a very difficult step for those who have not yet fully adopted the sick role Parsons 1951 In the field of eating disorders it is particularly difficult for people that tend to promote the glamorization of eating disorders The insecurity and anxiety that newcomers display as they enter the online group could probably be relieved when a special entry subforum would be installed in which they can take time and space to actually recognize that they are ill
