Current Abstracts , 1996-11 Towards Environmental Sustainability? Emin Tengström, 2018-12-20 First published in 1999 this study consists of an empirical analysis of current Danish Dutch and Swedish national transport policies along with some policy options for the near future intended to reduce the present unsustainable character of the national transport

systems The study deals only with passenger transport primarily on land rather than freight transport There exists a distinct focus on environmental sustainability along with the role of the automobile in transport systems *Ensuring a Sustainable Future* Jody Heymann, Magda Barrera, 2013-09-13 There is very little argument that the world is facing severe environmental challenges Ongoing air and water pollution increasing energy consumption and the depletion of natural resources have all placed considerable stress on the capacity of our environment to support the present quality of human life in a sustainable manner Ensuring a Sustainable Future does what few previous works have it examines these trends disproportionate impact on the poor and the economically viable solutions that can serve to remedy them solutions that simultaneously address environmental and economic problems This gap in previous research evidence and writing has left low income countries often unwilling to take on major environmental problems and many poor communities believing they faced impossible choices between improving the environment in which they live and increasing the jobs and income available Bringing together evidence based recommendations and in depth case studies of successful policies and programs around the world Ensuring a Sustainable Future examines innovative solutions to this crucial challenge In doing so it addresses a comprehensive range of environmental sustainability challenges affecting low middle and high income countries *Sustainable Futures in the Built Environment to 2050* Tim Dixon, John Connaughton, Stuart Green, 2018-02-20 Brings together leading thinking on issues of new professional practice and on the future of a sustainable built environment This book focuses on both construction and development issues and examines how we can transition to a sustainable future by the year 2050 bringing together leading research and practice at building neighbourhood and city levels It deftly analyses how emerging socio economic technological and environmental trends will influence the built environment of the future The book covers a broad spectrum of interests across the scales of buildings communities and cities including how professional practice will need to adapt to these trends The broader context is provided by an analysis of emergent business models and the changing requirements for expert advice from clients Sustainable Futures in the Built Environment to 2050 A Foresight Approach to Construction and Development features chapters covering data and trends including historical data and UK and international case studies policies and practice related to the field current state of scientific understanding key challenges key technological advances including disruptive and systemic technological innovations change issues and critical uncertainties and future visions It provides A strong conceptual framework based on a Foresight approach Discussion of the key data and trends that underpin each chapter Coverage of both construction and property development Specially commissioned chapters by academics and practitioners A synthesis of the main findings in the book and key insights for the future to 2050 Sustainable Futures in the Built Environment to 2050 A Foresight Approach to Construction and Development is an important book for postgraduate students and researchers construction real estate and property development specialists engineers planners architects foresight and futures studies specialists and anyone involved in sustainable buildings Smart Sustainable Cities of the

Future Simon Elias Bibri, 2018-02-24 This book is intended to help explore the field of smart sustainable cities in its complexity heterogeneity and breadth the many faces of a topical subject of major importance for the future that encompasses so much of modern urban life in an increasingly computerized and urbanized world Indeed sustainable urban development is currently at the center of debate in light of several ICT visions becoming achievable and deployable computing paradigms and shaping the way cities will evolve in the future and thus tackle complex challenges This book integrates computer science data science complexity science sustainability science system thinking and urban planning and design As such it contains innovative computer based and data analytic research on smart sustainable cities as complex and dynamic systems It provides applied theoretical contributions fostering a better understanding of such systems and the synergistic relationships between the underlying physical and informational landscapes It offers contributions pertaining to the ongoing development of computer based and data science technologies for the processing analysis management modeling and simulation of big and context data and the associated applicability to urban systems that will advance different aspects of sustainability This book seeks to explicitly bring together the smart city and sustainable city endeavors and to focus on big data analytics and context aware computing specifically In doing so it amalgamates the design concepts and planning principles of sustainable urban forms with the novel applications of ICT of ubiquitous computing to primarily advance sustainability Its strength lies in combining big data and context aware technologies and their novel applications for the sheer purpose of harnessing and leveraging the disruptive and synergetic effects of ICT on forms of city planning that are required for future forms of sustainable development This is because the effects of such technologies reinforce one another as to their efforts for transforming urban life in a sustainable way by integrating data centric and context aware solutions for enhancing urban systems and facilitating coordination among urban domains This timely and comprehensive book is aimed at a wide audience across science academia industry and policymaking It provides the necessary material to inform relevant research communities of the state of the art research and the latest development in the area of smart sustainable urban development as well as a valuable reference for planners designers strategists and ICT experts who are working towards the development and implementation of smart sustainable cities based on big data analytics and context aware computing

Sustainability Made in Delft, 2006 *Economic Growth and the Environment* Sander M. de Bruyn, 2000-01-31 This text reviews the theoretical and empirical literature on economic growth and the environment giving an in depth empirical treatment of the relationship between the two Various hypotheses are formulated and tested for a number of indicators of environmental pressure *Clean Production* K.B. Misra, 2012-12-06 The world has witnessed several revolutions since the dawn of industrial revolution some two centuries ago During the current century itself three revolutions in the area of communication information processing and quality have taken place and each time the standard of living of man improved beyond predictions But during the same period the world population has also phenomenally increased dwarfing the gains

achieved from the development Increased level of industrial activity to meet the of humanity has caused irreversible damage to the pristine environment that the demand Earth once had Economic disparity between the haves and havenots has widened aggravating the situation further more Ozone layer depletion warming up of Earth s atmosphere and the pollution created by uncontrolled industrial activity to gain economic strength are now assuming the proportion of a catastrophe that may eventually threaten the survival of life on Earth Developed countries blame the Third World countries for the uncontrolled emissions through burning of fossil fuels and for wasting precious resources of energy by using inefficient and uneconomical technologies while the developed countries are equally responsible for avoidable oV er consumption and for the wastage of resources and energy and for not sharing the improved and efficient technologies with the developing countries Thus the wastage by both these set of countries continues unabated After all resources of the world are finite and are meant to be shared by all its inhabitants

Managing a Material World Pier Vellinga,Frans Berkhout,J. Gupta,2012-12-06 As we reach the end of the 20th century the question of how to meet human needs and preferences while safeguarding the global environment is a major concern facing humanity This book reflects the state of the art of thinking on the necessary concepts tools and instruments that are likely to help producers consumers and governments to adjust their policies and practices It covers theories and concepts practical approaches and visions of industry and government The book has been written by a team of authors that includes the most forward thinking researchers and managers on the issue It is a handbook for all those involved

in decisions about product design and eco efficiency about environment and resource use policies Moreover it can serve as a handbook for all those who are studying with the aim to become involved in such issues Environmental Science Richard T. Wright, Bernard J. Nebel, 2004 Global Warming and Social Innovation Andre Faaij, David Jager, Marcel Kok, 2013-06-17 Societies need to reduce emissions of greenhouse gases by 80 per cent in order to counter the risks of climate change This study envisions a climate neutral society one where the output of polluting gases is minimised by social innovations set up in households by local authorities through developments in information and communications technologies and dematerialization and through the shift towards product service systems and emissions trading The work discusses the possibilities for steering and orchestrating this long term transition towards a climate friendly society mapping paths through current dilemmas in climate policy and exploring the legal issues of making this transition **A Subject Index to Current Literature** Australian Public Affairs Information Service, Business and the Environment Richard Welford, Richard Starkey, 1996 This Reader brings together in one volume the most important and innovative articles written on the interaction of business and the environment This is an essential reference not only for students in business schools management studies and environmental courses but for environmental managers and consultants and all those interested in greening the business environment **European Environmental Advisory Councils** H. Wiggering, Sandhövel, 2023-09-20 This book presents edited papers from the Conference on European National and Regional Environmental Advisory Councils and Actors of the European Environmental Policy held in Berlin November 1994 in which 17 environmental advisory councils from 9 EU member states participated The core theme of the Conference was Agenda 21 and its implementation at the national level in which advisory councils play an active role throughout the EU **Sustainability** David Mollica, 2017-03-02 Sustainability is one of the key concepts underlying our thinking about corporate responsibilities particularly with respect to the environment and inter generational justice but also in relation to corporate governance and the long term economic viability The advantages of the discourse of Sustainability are that it brings together contemporary economic and moral imperatives in the context of scientific knowledge Its disadvantages relate to its open ended content its systematic ambiguity and the internal tensions between economic growth human survival and global justice The essays in this volume reflect these strengths and weaknesses from a variety of viewpoints economic scientific social and philosophical They illustrate and illuminate the varied and contested content and utility of this currently popular concept and point to its multiple implications for the development of corporate responsibilities
