Each chapter focuses on an important area of public policy where there is considerable moral and political disagreement. Topics discussed include: Can we defend inflicting suffering on animals in scientific experiments for human benefit? What limits to gambling can be achieved through legislation? What assumptions underlie drug policy? Can we justify punishing those who engage in actions that harm only themselves? What is so bad about crime? What is the point of punishment? Other chapters discuss health care, disability, safety, and the free market. Throughout the book, fundamental questions for both philosopher and policy maker recur: what are the best methods for connecting philosophy and public policy? Should thinking about public policy be guided by an ideal world or the world we live in now? If there are knock-down arguments in philosophy, why are there none in public policy? Revised throughout to reflect changes in policy and research, this second edition includes four new chapters on risky new technologies, the future of work, poverty, and immigration. Each chapter concludes with Lessons for Philosophy, making this book not only an ideal introduction for those coming to philosophy, ethics, or public policy for the first time, but also a vital resource for anyone grappling with the moral complexity underlying policy debates.

World AIDS Day 2022: Putting ourselves to the test: achieving equity to end HIV Diego Ripamonti, Segundo Ramos León Sandoval, 2024-10-29. Since HIV was first identified in the early 1980s, we have had numerous scientific advancements to improve HIV prevention and treatment. However, there are still 38 million people currently living with HIV, and a proportion of them have developed Acquired Immunodeficiency Syndrome (AIDS). The main issue with HIV and AIDS is inequalities; the communities affected are disproportionately distributed among the Global South. World AIDS Day takes place every year on the 1st of December and was founded in 1988, making it the first global health day to be established. This year, the theme of World AIDS Day is equality. Tackling the inequalities surrounding HIV testing, prevention, care, and stigma among marginalized populations is the only way to not fall behind the targets of the third sustainable development goal of ending the HIV/AIDS epidemic by 2030.
