*Managing for Excellence in the Public Sector* G. Van der Wal, D. F. P. Du Toit, 1999-12-31. This book provides public administration instructors with a holistic South African perspective presented by means of a systems approach, the addressing of current and future distinctive issues and challenges, and the presentation of specific remedies, the application of proven private sector principles to the public sector, and the use of case studies to place theoretical knowledge within a practical frame of reference.

*Applied Industrial Energy and Environmental Management* Zoran Morvaj, Dušan Gvozdenac, 2008-10-13. Industrial energy systems channel fuels and power into a variety of energy types such as steam, direct heat, hot fluids and gases, and shaft power for compressors, fans, pumps, and other machine-driven equipment. All of these processes impact the environment and are impacted by external energy and environmental policies and regulations. Therefore, many environmental management issues are closely related to energy use and efficiency. *Applied Industrial Energy and Environmental Management* provides a comprehensive and application-oriented approach to the technical and managerial challenges of efficient energy performance in industrial plants. Written by leading practitioners in the field with extensive experience of working with development banks, international aid organizations, and multinational companies, the authors are able to offer real case studies as a basis to their method. The book is divided into three main parts. Part one describes Energy and Environmental Management Systems (EEMS) in current use and management techniques for energy and environmental performance improvement. Part two focuses on the engineering aspects of industrial energy management, describing main industrial energy systems and how to analyse and improve their energy performance. Part three is the TOOLBOX on an accompanying website which contains data analytical methods and questionnaires as well as software programs to support the practical application of the methods elaborated on in the first two parts of the book. This book will be a valuable resource to practising energy and environmental management engineers, plant managers, and consultants in the energy and manufacturing industries. It will also be of interest to graduate

engineering and science students taking courses in industrial energy and environmental management      **Environmental Management** Marc Lane, Richard Marcantonio, 2022-09-22 A textbook and manual on environmental management that provides theory and practical skills needed to address current issues and trends      *Environmental Management in a Low Carbon Economy* Stephen Tinsley, 2014-03-14 Each government recognises that there is a potential loss of competitive advantage of its business sector if future economic growth strategies are not aligned with a low carbon future Some multinational organizations recognise this imperative and the importance of aligning business activities to a more sophisticated and flexible environmental management system that also incorporates quality safety occupational health and corporate ethics An organisation's Environmental Management System EMS has traditionally been designed to address legislative and regulatory requirements It has now become a measure of an organisation's attitude to balancing environmental economic cultural and social needs of its trading communities By using real world case studies this text positions EMS as a core and critical management tool and a key requirement for businesses long term survival It provides fundamental building blocks to implement an environmental management system and clearly illustrates how it can be positioned within an organization to deliver innovative products and services to compete in a low carbon economy

*Environmental Management in a Low Carbon Economy* will prepare students and professionals alike with the ability and understanding to implement an environmental management system which in turn will aid organizations in facilitating their transition to operate in a low carbon economy      **Combating Plastic Pollution in Terrestrial Environment S.** Suriyanarayanan, Shivaraju H.
