Ecological Policy and Politics in Developing Countries Uday Desai,1998-04-16 Examines in depth the ecological problems policies and politics of ten major developing countries

Environmental Policies in Developing Countries Hope Johnson,1977 **Environmental Policy and Developing Nations** Stuart S. Nagel,2002 The twelve chapters in this work written by political scientists economists and environmental experts deal with environmental policy in the developing nations of Africa Asia East Europe and Latin America as well as the worldwide environment Part One discusses environmental policy analysis and presents information both on sources of pollution which include manufacturing agriculture and transportation and methods for dealing with pollution which encompass government structures incentives issues of privatization or contracting out and technological fixes The other five parts deal with the developing nations individually and discuss environmental policy as it relates to each one and the unique problems that each one faces

Environmental Policies in the Third World O.P. Dwivedi,Dhirendra K. Vajpeyi,1995-02-28 Analyzes environmental problems and policies in developing countries around the world and discusses new prospects for international cooperation and funding Considers hard political choices who is to blame for environmental decay who should pay to overcome problems and how policies should be administered Experts from different countries offer their perspectives about the role of multilateral agencies the North South dimensions of environmental problems since 1972 internal and external factors that have affected Third World development new measures and opportunities since the Rio Summit conference and case studies of representative countries India China Indonesia Africa Nigeria Chile and Mexico A bibliography enhances this authoritative study for the use of political scientists economists and public administrators for teachers students and professionals

Implementation of Environmental Policies in Developing Countries Jose Puppim de Oliveira,2008-02-28 Environmental policy implementation in developing countries faces a number of institutional obstacles Using the case of protected areas and tourism development in the state of Bahia in northeastern Brazil Jose Antonio Puppim de Oliveira explores how economic development interests tend to have a higher priority on most governments agendas in developing countries Government agencies often fail to implement environmental protection policies mainly because they lack political support have insufficient resources have underdeveloped institutional capacity and tend to overlook the importance of cooperation at the local level Puppim de Oliveira explains how this trend may be reversed by decentralizing policy implementation into the hands of development oriented agencies To make the process work central authorities should offer incentives to ensure increased attention to environmental protection objectives in the development process At the same time an independent body with oversight authority should be in place to prevent development agencies from neglecting environmental concerns

Origins and Evolution of Environmental Policies Tadayoshi Terao,2021-02-26 This unique book traces the origins and evolution of environmental policy formation comparing the differences in this process between developing and developed

countries It focuses on the importance of the state's role and issues of timing and sequence in the creation of environmental policies

Growing Pains Walter Wehrmeyer, Yacob Mulugetta, 2017-10-19 Environmental management is a global phenomenon embracing all businesses in all countries whether or not there already exists an organised response to managing environmental impacts Today there are gross inequalities between the world's richest and poorest nations in terms of income distribution consumption patterns access to resources and environmental impact Yet both the developed north and the developing south are committed at least in words to achieving sustainable development Public awareness of environmental issues in the North has been rising in recent years and further degradation is now largely minimized through more stringent regulatory regimes voluntary agreements and growing consumer and stakeholder pressure on corporations Still the north is continuing to lead an environmentally unsustainable lifestyle as environmental improvements are nullified by overall increases in consumption levels In the south a billion people still do not have access to the most basic needs Poor countries need to accelerate their consumption growth if they are to ensure that the lives of their people are enriched However with rapid economic growth and corresponding increases in consumption now under way their environmental impact is soon to become substantially greater In a world that strives towards stemming global crises such as climate change the path already taken by the rich and high growth economies over the past century cannot be repeated by the south if the desired objective is to create a future that is truly sustainable *Growing Pains* examines environmental management in the south from a number of perspectives It is designed to stimulate the discussion about the role that corporations and national and international organizations play in sustainable development It does not offer panaceas as each country has its own problems and opportunities and after almost 50 years of failed panacea oriented economic development policy transfer from the north to the south it is time to abandon hope for universal solutions and instead look to individual approaches that work The book is divided into five themes globalization the role of business a focus on national strategies trade and the environment and the organizational and structural challenges of sustainable development With contributions from an outstanding collection of authors in both the developed and developing worlds including UNIDO the Thailand Environment Institute Arthur D Little Inc Shell Peru IUCN the Russian Academy of Sciences and IIED this important and unique new book presents a body of work that will provide essential reading for businesses working in developing countries environmental and developmental NGOs and researchers engaged in the debate and sharing of best practice in this increasingly critical subject area

A Handbook of Globalisation and Environmental Policy, Second Edition Frank Wijen, K. Zoeteman, J. Pieters, Paul van Seters, 2012-01-01 Acclaim for the first edition This is undoubtedly a useful collection of essays for environmental policy makers and anyone interested in the relationship between national government and transnational forces the collection brings together some interesting perspectives and should prove a useful complement to the existing political sociology of the environment International Sociology Review of Books The Handbook of Globalisation and Environmental Policy is a very

important book More than 40 experienced authors including some of the most important international thought leaders of our time have confronted a crucial question How can and should national governments come to grips with the need for global action on a wide range of increasingly urgent environmental challenges that exceed their authority and capability Through close examination of numerous case studies a balanced perspective that takes government business and civil society into account and fresh interdisciplinary thinking about a range of policy tools the Handbook offers a treasure trove of new concepts and new perspectives The authors conclude that by acknowledging the ongoing erosion of national sovereignty and accepting the growing need to work together in supranational forums national governments can in fact increase their capacity to shape their own destiny Lawrence Susskind Massachusetts Institute of Technology US In an increasingly interdependent world global forces affect both the design and effectiveness of environmental policy This Handbook provides an unusually creative and comprehensive guide not only to the nature of these forces and their impacts but also to how a better understanding of these forces can provide a foundation for improving the effectiveness of environmental policy Tom Tietenberg Colby College US In the current era of globalisation national governments are increasingly exposed to international influences that present new constraints and opportunities for domestic environmental policies This comprehensive revised Handbook pushes the frontiers of theoretical and empirical knowledge and provides a state of the art examination of the multifaceted effects of globalisation on environmental governance Including substantially revised as well as new contributions from leading authorities the Handbook offers an insightful overview of recent developments at the intersection of globalisation and national environmental policy It covers themes including national regimes trade rules types of goods federalism innovation standards citizen consumers developing countries policy networks partnerships and carbon trading The Handbook s depth and scope will appeal to a broad and varied readership across academics students and policy makers interested in public and private governance environmental economics international relations environmental politics and law sociology and political science

Environmental Law in Development N. Niessen, 2006-01-01 an important addition to the small but growing published literature on the development of environmental law in developing countries It will be of interest to academics and those involved in law development in Indonesia and the other developing countries Jennifer Mohamed Katerere Journal of Environmental Law This book asks whether environmental law and policy in developed countries can be successfully transferred to developing countries It questions whether developing countries are indeed ready and able to implement new ideas from the developed world such as the integration of environmental law and use of market oriented instruments The authors draw insights from the case of Indonesia where they have experience of drafting environmental legislation and which is itself in the early stages of development Through these insights they seek to understand why environmental law that has been well developed in theory can in practice be difficult to monitor and adequately enforce Indeed a further question central to the book is why developing environmental law does not necessarily

result in an efficient environmental policy Taking a comparative perspective and using a multi faceted methodology that draws on constitutional and administrative law human rights law criminal and liability law and international law as well as law and economics the authors conclude with an outline of some of the lessons that can be learnt by other jurisdictions seeking to develop environmental law Lawyers environmental engineers and social scientists involved in environmental law and policy in developing countries will find much to interest them in this book as will those concerned with development studies or with a particular interest in the case of Indonesia Environmental Policies in Developing Countries Joon Koo Lee,Gill C. Lim,1982 **Guide to Sustainable Development and Environmental Policy** William L Ascher,Natalia Mirovitskaya,2002-03-29 A compilation of definitions terms and critical commentary on aspects of sustainable development and environmental policy with a strong emphasis on policy tools policy practices and systems of international environmental governance *Development of Environmental Policy in Japan and Asian Countries* T. Terao,K. Otsuka,2016-01-13 By examining the issues of environmental policy formation and implementation linked to economic development and reviewing the Japanese experiences and the examples of other Asian countries this book reveals factors of dynamism between environmental policy and social change in a domestic regional and global context **Comparative Perspectives on Environmental Policies and Issues** Robert A. Dible,2014-01-10 Comparative Perspectives on Environmental Policies and Issues presents tools and concepts about environmental policies in several developed and developing countries It explores a broad survey of ecological modernization theory ecological feminism theory environmental justice theory the concept of sustainability and research on environmental policies Data were collected through surveys interviews and focus groups and are used to analyze social economic and environmental impact on people The book specifically discusses how the earth s basic life supporting capital soils forests species fresh water and oceans is degraded or depleted to provide for human needs and how air pollution and acid precipitation are causing widespread injury to humans forests and crops Realistically over taxing of natural resources and ecological systems throughout the world has promoted economic growth and created increasing opportunities for people while also advancing social injustice The use of the environment to accomplish social and economic transformation raises fundamental issues for the study of environmental policy and the natural ecological system As human beings exploit the natural environment to meet present needs they often will destroy resources needed for the future generations Thus environmental policies are enacted to ensure that social and economic impacts of the environment are compatible with the limits of natural systems Offering an intuitive and crystal clear explanation of the key concepts and principles of environmental policies and sustainable development this volume is suitable not only for environmental science students but also for instructors practitioners researchers and academics **Environmental Economics and Policy Making in Developing Countries** Ronaldo Seroa da Motta,2001 In developing countries where growth expectations are high least cost environmental policies are crucial since they can reduce the conflict between economic growth and the

environment This volume provides an analysis of topics such as the general problems of growth and conservation

Environmental Policies in Developing Countries Shang Xu (Ph. D. in applied economics),2019 In summary this dissertation provides key insights into the relationships between economic wellbeing and the natural environment The theory and methods developed in this work are innovative and improve our understanding of individuals responses to environmental changes especially in developing countries

Handbook of Global Environmental Policy and Administration Dennis Soden,Brent R. Steel,1999-07-16 Presenting case studies involving Rwanda Nepal Australia Japan and Mexico including real time policy and administrative questions this versatile reference text provides a wide perspective on national and international environmental problems and policies featuring discussions with a regional emphasis as well as global significance Pooling the work of over 60 international contributors in disciplines ranging from anthropology to political science the Handbook of Global Environmental Policy and Administration illustrates how environmental concerns are incorporated into administrative functions and policy processes

business **Origins and Evolution of Environmental Policies** Tadayoshi Terao, Tsuruyo Funatsu, 2021-02-11 This unique book traces the origins and evolution of environmental policy formation comparing the differences in this process between developing and developed countries. It focuses on the importance of the state's role and issues of timing and sequence in the creation of environmental policies. Expert contributors provide new insights into how the environment as a concept and environmental policies have evolved. They analyse how latecomer public policy is related to the dilemma between industrial development and maintaining high environmental standards especially in developing countries. Chapters also examine these processes in a variety of regions with rich records of environmental policies and trajectories of change. Taking a historical and path dependence approach, the book emphasises the significance of the role of administrative systems, policy coordination and timing in the success or failure of environmental policies. This book will be a valuable resource for academics and students of environmental studies, public policy, public administration and regional studies. Its synthesis of empirical data and case studies from countries including China, Taiwan, Thailand, the US and Germany will also be beneficial for policymakers.
