## **PROCEEDINGS OF NATIONAL SEMINAR ON**

**MULTIDISCIPLINARY RESEARCH AND PRACTICE VOLUME 2** Dr. M. Kanika Priya, This Conference Proceedings of the National Seminar entitled Multidisciplinary Research and Practice compiled by Dr M Kanika Priya records various research papers written by eminent scholars professors and students The articles range from English literature to Tamil literature Arts Humanities Social Science Education Performing Arts Information and Communication Technology Engineering Technology and Science Medicine and Pharmaceutical Research Economics Sociology Philosophy Business Management Commerce and Accounting Teacher Education Higher Education Primary and Secondary Education Law Science Mathematics Physics Chemistry Zoology Botany Agriculture and Computer Science Researchers and faculty members from various disciplines have contributed their research papers This book contains articles in Three languages namely English Tamil and Hindi As a editor Dr M Kanika Priya has taken up the tedious job of checking the validity and correctness of the research work in bringing out this conference proceedings in a beautiful manner In its present shape and size this anthology will hopefully find a place on the library shelves and enlighten the academics all round the world **Research in Education**, 1973

**Resources in Education**, 1999-10 **Practice-based Design Research** Laurene Vaughan, 2017-01-26 Practice Based Design Research provides a companion to masters and PhD programs in design research through practice The contributors address a range of models and approaches to practice based research consider relationships between industry and academia researchers and designers discuss initiatives to support students and faculty during the research process and explore how

students experiences of undertaking practice based research has impacted their future design and research practice The text is illustrated throughout with case study examples by authors who have set up taught or undertaken practice based design research in a range of national and institutional contexts      *Research into Design for Communities, Volume 2* Amaresh Chakrabarti,Debkumar Chakrabarti,2017-04-13 This book showcases cutting edge research papers from the 6th International Conference on Research into Design ICoRD 2017 the largest in India in this area written by eminent researchers from across the world on design process technologies methods and tools and their impact on innovation for supporting design for communities While design traditionally focused on the development of products for the individual the emerging consensus on working towards a more sustainable world demands greater attention to designing for and with communities so as to promote their sustenance and harmony within each community and across communities The special features of the book are the insights into the product and system innovation process and the host of methods and tools from all major areas of design research for the enhancement of the innovation process The main benefit of the book for researchers in various areas of design and innovation are access to the latest quality research in this area with the largest collection of research from India For practitioners and educators it is exposure to an empirically validated suite of theories models methods and tools that can be taught and practiced for design led innovation The contents of this volume will be of use to researchers and professionals working in the areas on industrial design manufacturing consumer goods and industrial management      History and Precedent in Environmental Design Anatol Rapoport,2013-06-29 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design However although what I am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence In fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways I am advocating There is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations After years of neglect the study of history and the use of historical precedent are again becoming important However that interest has not led to new approaches to the subject nor have its bases been examined This I try to do In so doing I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design Underlying this is my view of Environment Behavior Studies CEBS as an emerging theory rather than as data to help design based on current theory Although this will be the subject of another book a summary statement of this position may be useful
