Handbook of Environmental Economics Karl-Goran Maler, 2005-12-09 Many of the frontiers of environmental economics research are at the interface of large scale and long term environmental change with national and global economic systems This is also where some of the most of challenging environmental policy issues occur Volume 3 of the Handbook of Environmental Economics provides a synthesis of the latest theory on economywide and international environmental issues and a critical review of models for analyzing those issues It begins with chapters on the fundamental relationships that connect environmental resources to economic growth and long run social welfare The following chapters consider how environmental policy differs in a general equilibrium setting from a partial equilibrium setting and in a distorted economy from a perfect economy The volume closes with chapters on environmental issues that cross or transcend national borders such as trade and the environment biodiversity conservation acid rain ozone depletion and global climate change The volume provides a useful reference for not only natural resource and environmental economists but also international economists development economists and macroeconomists

Empirical Studies of Environmental Policies in Europe John W. Maxwell, Jürgen von Hagen, 2012-12-06 John W Maxwell and Jiirgen von Hagen Kelley School of Business Indiana University ZEI University of Bonn Indiana University and CEPR Prior to the 1970 s economic studies of the natural environment were chiefly concerned with the optimal extraction of natural resources such as oil coal and timber This focus reflected the commonly held belief that the natural environment was sufficient to sustain the world s population in relative comfort at least in developed nations and was there for the taking By the late 1960 s however the spectacular levels of economic growth that had taken place since the Second World War began to exact a visible toll on the natural environment This visibility prompted growing concern for the environment among activists government officials academics and the public This concern has followed a general upward though cyclic trend to the present day Remarkable events during this trend include the issuing of the Brundtland report and the world environmental summits held in Rio and Kyoto Concern for the natural environment has impacted the discipline of economics resulting in the birth of the field of environmental economics that has recently eclipsed in popularity its parent field of natural resource economics

Balancing Agricultural Development and Deforestation in the Brazilian Amazon Andrea Cattaneo, 2002 Since the 1970s federal policies promoting migration and encouraging agricultural development of large farms logging and ranching have led to the deforestation of vast areas of the Amazon rainforest Though these policies have largely been replaced deforestation continues What effects do current macroeconomic and regional policies and events have on deforestation and on the well being of settlers on the agricultural frontier This report identifies

the links between the agriculture and logging sectors in the Amazon economic growth poverty alleviation and natural resource degradation in the region and in Brazil as a whole It considers the effects of currency devaluation building roads and other infrastructure in the Amazon property rights adoption of technological change and fiscal incentives and disincentives to deforest The results are sometimes counterintuitive but shed new light on why slowing deforestation is so difficult and on the trade offs between environmental and economic goals
