*Policy in the EU* Andrew Jordan, 2012-04-27 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy. Comprising five comprehensive parts, it includes in depth case studies of contemporary policy issues such as climate change, genetically modified organisms and trans Atlantic relations, as well as an assessment of how well the EU is responding to new challenges such as enlargement, environmental policy integration and sustainability. The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors. *A Handbook of Approaches to Environmental Policy Analysis in Southern Africa*, 2000 Better Environmental Policy Studies Lawrence Susskind, Ravi K. Jain, Andrew O. Martyniuk, 2013-03-05 Environmental policy studies commissioned by government agencies or other stakeholders can play a vital role in environmental decisionmaking; they provide much needed insight into policy options and specific recommendations for action. But the results of even the most rigorous studies are frequently misappropriated or misunderstood and are as likely to confuse an issue as they are to clarify it. *Better Environmental Policy Studies* explores this problem as it considers the shortcomings of current approaches to policy studies and presents a pragmatic new approach to the subject. Reviewing five cases that are widely regarded as the most effective policy studies to have been conducted in the United States in the last few decades, the authors present a comprehensive guide to the concepts and methods required for conducting effective policy studies. The book describes and explains the conventional approach to policy studies and its shortcoming, presents the history, impacts and common elements of five successful policy studies, offers an in depth look at the different tools and techniques of policy analysis, extends the concepts and principles of successful policy studies to their potential uses in the international arena. *Better Environmental Policy Studies* presents a practical, battle tested approach to overcoming the obstacles to formulating effective environmental policy. It is an invaluable resource for students and faculty in departments of environmental studies, public policy and administration and planning, as well as for professional policy analysts and others involved with making decisions and mediating disputes over environmental issues. Dale, Mary R. English, 2012-11-26 Environmental decision making is like politics, mostly local. In fact, making decisions about the environment at the subnational level—in state, regional and local jurisdictions—is a lot like politics. For resolving environmental issues, demands but often resists a balance between deeply held feelings and stark confrontations among opposing views. This volume describes tools that should make the decision maker's lot a bit more tolerable. The authors would be the last to suggest that these decision aiding tools will somehow bring a benign order to issues that reach to people's fundamental values. What they can help do is to keep the debate focused on the important issues.

to serve up useful options and to narrow the range of disagreement Even this is a challenging assignment Still why bother The chief reason is that the locus of environmental decision making has in the past decade or so shifted from the national to the subnational level a convenient if colorless term to denote the hurly burly of environmental controversy outside the Washington Beltway For example New England has taken a regional stand on tropospheric ozone control and California requires automotive pollution controls that some other jurisdictions have partially adopted This shift is a profound but not unexpected result of the way environmental policy has evolved since the modern environmental movement began around the late 1960s Back then the pendulum was swinging the other way **Policy Analysis in Ireland** John Hogan, Mary P.
