Environmental Policy And Direct Taxation In Europe:

Environmental Policy and Direct Taxation in Europe Peter H. J. Essers, Paul A. Flutsch, Manon A. Ultee, 2000-03-08
This work examines the extent to which income taxation is influenced by the issue of environmental protection in EU Member States. Reports from seven countries belonging to the EUCOTAX European Universities Cooperating on Taxes network – Belgium, France, Germany, Italy, The Netherlands, Spain, and the United Kingdom – investigate the relationship between environmental policy and direct taxation. The analysis covers two broad issues: the measure incorporated into personal and corporate income tax regimes to stimulate environmental protection and the treatment of fiscal liabilities with respect to environmental legislation. The work is part of a project supported by the European Commission and the London Institute for Public Policy Research, aimed at stimulating debate about environmental tax reform in Europe. The project was coordinated by Professor Tulio Rosembuj of the University of Barcelona and Professor Peter Essers of Tilburg University, The Netherlands.

Environmental Taxation in Practice Thomas Sterner, 2017-05-15
Since the 1980s, market-based instruments for environmental policy have become increasingly important. Focusing on environmental taxation in practice, this volume collects key contributions on a wide range of topics, including comparisons of environmental taxation schemes in different countries, political economy issues, and key aspects of concrete implementation. It presents a wealth of ex ante and ex post analyses intended as a source of guidance for policy implementation and research. The volume features a full-length introduction locating the literature on environmental taxation in practice in a wider context of theoretical and applied issues.

Critical Issues in Environmental Taxation Claudia Dias Soares, Janet Milne, Hope Ashiabor, Kurt Deketelaere, Larry Kreiser, 2010-10-07
Critical Issues in Environmental Taxation is an internationally refereed publication devoted to environmental taxation issues on a worldwide basis. It seeks to provide insights and analysis for achieving environmental goals through tax policy. By sharing the perspectives of the authors in response to the diverse challenges posed by environmental taxation issues, effective approaches used in one country may be considered and possibly implemented by governmental authorities in other countries. Each volume contains pioneering and thought-provoking articles contributed by the world's leading environmental tax scholars. This eight-volume includes 42 articles on environmental tax issues which were presented at the Tenth Global Conference on Environmental Taxation. It features articles in six areas relating to environmental tax reforms, experiences and potential market-based instruments for climate protection, market-based instruments for environmentally sound management of energy, market-based instruments for environmentally sound management of water, market-based instruments for environmentally sound management of urban areas, and evaluation of market-based environmental policies. The quality of the articles published in Volume VIII reflects the excellent and inspiring work of leading scholars and practitioners in the field of environmental taxation.

A

critical and contextual overview of European environmental law examining today's key environmental challenges alongside traditional topics *European Access*, 2001 *The European Commission* Gerhard Sabathil, Klemens Joos, Bernd Kessler, 2008 *The European Commission* is a detailed and comprehensive guide to the workings of the European Commission. This straightforward and accessible new title demystifies procedures, practices and policies which up until now have been perceived by many as baffling and oblique. Written in a style that is both uncomplicated and user friendly, the authors equip readers with all the information about the background of the Commission, its administrative structure, its policies, external relations and general and internal services. Packed with numerous handy tables and figures, *The European Commission* will serve to help readers to gain a full understanding of how the machinery of the Commission functions and how the daily work processes are carried out. This is both an essential and fascinating handbook for all those working in the political arena.

Private Regulation and Enforcement in the EU Madeleine de Cock Buning, Linda Senden, 2020-06-25 Globalisation and technological innovation have been fuelling the need for increasing levels of trust in private actors such as companies or special interest groups to regulate and enforce significant aspects of people's daily lives from environmental and social protection to the areas of food safety, advertising and financial markets. This book investigates the trust vested in private actors from the perspective of European citizens. It answers the question of whether private actors live up to citizens' expectations or whether more should be done as to the safeguarding of citizens' interests. Several cross-cutting studies explore how private regulation and enforcement are embedded in EU law. The book offers an innovative approach to private regulation and enforcement by focusing on the specific EU context which, unlike the national and transnational ones, has not yet been widely explored. This context merits a stand-alone analysis because of the unique normative framework of the EU as a particular polity itself but also in relation to its Member States. With an overall analysis of the main aspects of private regulation and enforcement across different policy fields of the EU, the book adds a missing tile to the mosaic of public/private governance studies. **New Environmental Policy Instruments in the European Union** Ian Bailey, 2017-07-05

The use of legislation by EU governments to define environmental standards for industry has been criticised for its poor track record in arresting the decline in the quality of Europe's environment. Environmental economists in particular have proposed that legislation should be supplemented or replaced by New Environmental Policy Instruments (NEPIs) such as eco taxes, environmental charges, tradable permits and voluntary agreements. This book focuses on practical experiences with NEPIs in the EU and tests their application using the case study of the Packaging and Packaging Waste Directive. It traces the ways in which member states have adapted NEPIs to suit their preferred styles of environmental policy, then assesses their performance and how NEPIs have both assisted and hindered the EU environmental programme. It suggests options for ensuring that the environmental programme does not become fragmented by the use of NEPIs and discusses the implications of EU enlargement. *Handbook of Research on Environmental Taxation* Janet E. Milne, Mikael Skou Andersen, 2012-01-01

Behavioral and Distributional Effects of Environmental Policy Carlo Carraro,Gilbert E. Metcalf,2009-02-15

Most people would agree that it makes sense to tax a company that pollutes in a way that directly reflects the amount of environmental and social damage it has done Yet in practice such taxes are fraught with difficulty and have far reaching implications A company facing a new tax may lay off workers for example exacerbating an unemployment problem This volume focuses on such external issues and examines in detail the trade offs involved in designing policies to

deal with environmental problems Reflecting the broad nature of the subject the contributors include leading economists in the areas of public finance industrial organization and trade theory as well as environmental economists Integrating both theoretical and empirical methods they examine environmental policy design as it relates to location decisions compliance costs administrative costs effects on research and development and international factor movements Shedding light on an extraordinarily complex and important topic this collection will be of interest to all those involved in designing effective environmental policy

New Instruments for Environmental Policy in the EU Jonathan Golub,1998-06-04 New Instruments for Environmental Policy in the EU provides a comprehensive analysis of the debate over new forms of environmental regulation in the European Union The conclusions draw attention to critical aspects of instrument design as well as the difficulty of accommodating national policy diversity without contravening EU and international tr
