Environmental Science And Environmental Case Studies:

Case Studies in Environmental Science Larry Underwood, 1998 Case Studies in Environmental Science is designed to promote grassroots awareness of global environmental issues through problem solving analysis and verbal and written discussion of topics that pertain to seven regions of the United States and Canada The twelve case studies present a range of views on selected environmental issues in a non biased approach Thought provoking questions commentaries and readings have been included to stimulate students to investigate the issues in further detail beyond the presentation of each case study The accompanying website provides the students with the tools and resources to go beyond the confines of the book and their geographic region Updated monthly the site will provide up to date links to resources and articles for each case in each region Summaries of significant events in each region and for each issue will be provided with additional Critical Thinking questions designed to demonstrate the interrelationships between regions and issues

Societal Dimensions of Environmental Science Ricardo D. Lopez, 2019-03-07 Societal Dimensions of Environmental Science Global Case Studies of Collaboration and Transformation brings together several key examples of the successes and the challenges that exist for environmental stakeholders trying to strike a balance between science and the societal implications of the issues involved This book provides important methods and approaches necessary for informed decision making and a better understanding of the common threads of learning collaboration negotiation and compromise It also explains that concepts and skills needed to better understand how specific project goals can be best achieved in the rapidly changing field of environmental management by providing practical situations and solutions across a global landscape This book provides anyone who works in a community setting with the necessary tools and strategies for solving environmental problems and achieving the goals of an environmental project of any type and specifically addresses the topic of how to synthesize community engagement and the environmental science It describes current environmental issues and lessons learned of what works and what doesn't work in real situations and why It also highlights key examples which can be used by both management practitioners and research scientists in their specific circumstances Showcasing a unique compilation of the diverse and specific examples from societies in Asia Oceania North America and the Middle East with an equally diverse array of authorship this book serves all policy makers scientists organizers and community members that desire to build better group dynamics for addressing environmental issues

Science and the Global Environment Alan McIntosh, Jennifer Pontius, 2016-09-03 Case Studies for Integrating Science and the Global Environment is designed to help students of the environment and natural resources make the connections between their training in science and math and today's complex environmental issues The book provides an opportunity for students to apply important skills knowledge and analytical tools to understand evaluate and propose solutions to today's critical environmental issues The heart of the book includes four major content areas water resources the atmosphere and air

quality ecosystem alteration and global resources and human needs Each of these sections features in depth case studies covering a range of issues for each resource offering rich opportunities to teach how various scientific disciplines help inform the issue at hand Case studies provide readers with experience in interpreting real data sets and considering alternate explanations for trends shown by the data This book helps prepare students for careers that require collaboration with stakeholders and co workers from various disciplines Includes global case studies using real data sets that allow readers to practice interpreting data and evaluating alternative explanations Focuses on critical skills and knowledge encouraging readers to apply science and math to real world problems Employs a system based approach linking air water and land resources to help readers understand that cause effect may be complex and solutions to environmental problems require multiple perspectives Includes special features such as links to video clips of scientists at work boxed information a solutions section at the end of each case study and practice exercises
