"Fallen from the Symboled World" Wyatt Prunty, 1990-02-22 This study evaluates figure and form in contemporary poetry especially the powers of simile and simile like structures Examining the works of Nemerov Wilbur Bowers Hecht Justice Cunningham Bishop Van Duyn Hollander Pack Kennedy Ammons Creeley and Wright Prunty argues that doubts about language the tradition and theistic assumptions embedded in the tradition have made simile and various simile like arrangements into major modes of thought From Lowell's early interest in the similitudo and the phantasm of Gilson to Husserl's phantasies and Heidegger's interest in similitude to the use made by contemporary poets of simile he shows that metaphor together with slippage mimicry synaphea conjunctions anacoluthon chiasmus and other simile like patternings have proven to be more trustworthy than symbol and allegory Throughout the study Prunty demonstrates that as uncertainty about language has changed from a predicament of mind to a new way of thinking simile and simile like occurrences have provided poetry with variational thought and constitutive power

Living Name Mark Halliday, 2025-03-20 *Living Name* is a collection of essays on American poetry written by an expert practitioner of that art Poet and critic Mark Halliday turns his attention to the work of poets who interest him because they create convincing voices of people dealing with the everyday Instead of trying to survey the vast variety of modern poetry Halliday considers an idiosyncratic selection of poets he finds compelling for their originality of style and exploration of human possibilities including Walt Whitman Kenneth Fearing Kenneth Koch Robert Pinsky Rachel Wetzsteon Tony Hoagland Claire Bateman and Dean Young Each essay includes thorough close readings of individual poems reflecting a commitment to the idea that a poem as a work of art needs to be appreciated as a unified whole Halliday's writing is judicious and meditative but not overly scholarly or academic A long piece at the beginning of the book *Poetry and the Rescue of Particulars* argues that poems often attempt to reclaim the details of our usual routines from the chaotic confusion and noise of daily existence The impulse to write a poem Halliday believes often stems from the notion that representing in poetry a sliver of human life keeps it in the world as a trace of the vanishing moment is retained and endowed with some form of lasting reality Throughout *Living Name* Halliday enacts the allegiances that have driven his criticism for many years to listen for genuine voices in poetry to study whole poems not merely passages and to look for intelligent efforts to illuminate truths of human experience

Yeats as Precursor S. Matthews, 2000-01-27 As both a late Romantic and a modern W B Yeats has proved to be perhaps the most influential poet of the early twentieth century In this original study Steven Matthews traces through close readings of significant poems the flow of Yeatsian influence across time

and cultural space By engaging with the formalist criticism of Harold Bloom and Paul de Man in their dialogues with Jacques Derrida he also considers Yeats's significance as the founding presence within the major poetry criticism of the century

The Columbia Granger's Dictionary of Poetry Quotations Edith P. Hazen, 1992 Why do smokers claim that the first cigarette of the day is the best What is the biological basis behind some heavy drinkers' belief that the hair of the dog method alleviates the effects of a hangover Why does marijuana seem to affect one's problem solving capacity *Intoxicating Minds* is in the author's words a grand excavation of drug myth Neither extolling nor condemning drug use it is a story of scientific and artistic achievement war and greed empires and religions and lessons for the future Ciaran Regan looks at each class of drugs describing the historical evolution of their use explaining how they work within the brain's neurophysiology and outlining the basic pharmacology of those substances From a consideration of the effect of stimulants such as caffeine and nicotine and the reasons and consequences of their sudden popularity in the seventeenth century the book moves to a discussion of more modern stimulants such as cocaine and ecstasy In addition Regan explains how we process memory the nature of thought disorders and therapies for treating depression and schizophrenia Regan then considers psychedelic drugs and their perceived mystical properties and traces the history of placebos to ancient civilizations Finally *Intoxicating Minds* considers the physical consequences of our co-evolution with drugs how they have altered our very being and offers a glimpse of the brave new world of drug therapies
