Life-Destroying Diagrams Eugenie Brinkema,2022-01-14 In *Life Destroying Diagrams* Eugenie Brinkema brings the insights of her radical formalism to bear on supremely risky terrain the ethical extremes of horror and love Through close readings of works of film literature and philosophy she explores how diagrams grids charts lists abecedaria toroids tempos patterns colors negative space lengths increments and thresholds attest to formal logics of torture and cruelty violence and finitude friendship and eros debt and care Beginning with a wholesale rethinking of the affect of horror orienting it away from entrenched models of feeling toward impersonal schemes and structures Brinkema moves outward to consider the relation between objects and affects humiliation and metaphysics genre and the general bodily destruction and aesthetic generation geometry and scenography hatred and value love and measurement and ultimately the tensions hazards and speculative promise of formalism itself Replete with etymological meditations performative typography and lyrical digressions *Life Destroying Diagrams* is at once a model of reading without guarantee and a series of generative experiments in the writing of aesthetic theory

Monthly Vital Statistics Report ,1987 **Psychology, Human Growth and Development for Social Work** Emma Zara O'Brien,2020-04-09 An engaging and accessible introduction to understanding human behaviour and development from a psychological perspective Written by a psychologist with extensive teaching experience it offers a clear and systematic exploration of psychological concepts and research and discussion of their relevance for social work practice The psychological framework provides thematic coherence for a uniquely wide range of material from brain development to communication skills psychiatric diagnoses to forms of discrimination With a logical and intuitive structure it s perfect for Human Growth and Development modules and other Social Work modules with psychological content enabling students to see how different elements of theory and research connect together for practical application

Signals in the Noise: Encountering the Limits of Materialist Science - An Exploration of Consciousness and Reality Robert DeFilippis,2023-10-15 *Signals in the Noise* An Exploration of Consciousness and Reality How Current Research is Challenging Materialist Science The *Signals in the Noise* groundbreaking theories about consciousness are meticulously explored presenting an avant garde perspective that stands to challenge our traditional materialist viewpoints The author leads us on an intellectual journey questioning established materialist scientific norms and bringing forward evidence that defies materialist theories of consciousness The book emphasizes that consciousness persists and can even be enhanced when brain activity decreases supported by numerous research studies involving psychedelics near death experiences and other instances when brain functions are diminished This

new understanding suggests that consciousness transcends the physical confines of our biological makeup challenging conventional notions about its origin and nature Furthermore the book introduces a transformative perspective on the universe proposing that what we perceive as material is merely a function of our sensory systems Based on the author's review of current theories of the composition of the cosmos we now know everything that exists is composed of energy with physicality representing deeper qualities that lie out of our reach Drawing on proven quantum physics the author presents the theory that the universe's interconnectedness is a product of coherent quantum fields from which everything emerges and takes on the character of separateness and materiality in the 4D or manifest level we experience In a radical departure from mainstream materialist thought *The Signals in the Noise* argues that consciousness is a universal phenomenon occurring in varying degrees of complexity across all organisms The author posits that while the presence of proto consciousness is universal the consciousness we experience emerges in the fourth dimensional or manifest level an idea that if widely accepted can redefine our understanding of life and existence Finally the author criticizes the materialist worldview stating that this ingrained belief system creates many societal political religious and environmental problems He argues that our obstinate adherence to materialist orthodoxy drives our trajectory toward planetary destruction Catalyzed by our capitalist system of consumption this materialist belief system hinders our ability to recognize and correct the adverse effects of our actions *The Signals in the Noise* is a compelling critique of the materialist worldview challenging our understanding of consciousness existence and our place in the universe It underscores the urgency to redefine our perspectives to avert the catastrophic trajectory that our current beliefs are driving us toward This book is a radical and thought provoking read for anyone interested in consciousness quantum physics and the future of our planet

Eschatology and the Technological Future Michael S. Burdett, 2014-12-05 The rapid advancement of technology has led to an explosion of speculative theories about what the future of humankind may look like These technological futurisms have arisen from significant advances in the fields of nanotechnology biotechnology and information technology and are drawing growing scrutiny from the philosophical and theological communities This text seeks to contextualize the growing literature on the cultural philosophical and religious implications of technological growth by considering technological futurisms such as transhumanism in the context of the long historical tradition of technological dreaming Michael Burdett traces the latent religious sources of our contemporary technological imagination by looking at visionary approaches to technology and the future in seminal technological utopias and science fiction and draws on past theological responses to the technological future with Pierre Teilhard de Chardin and Jacques Ellul Burdett's argument arrives at a contemporary Christian response to transhumanism based around the themes of possibility and promise by turning to the works of Richard Kearney Eberhard Jüngel and Jürgen Moltmann Throughout the author highlights points of correspondence and divergence between technological futurisms and the Judeo Christian understanding of the future

Political Routes to Starvation Bas Dianda, 2019-03-15 This book seeks to

reclassify famine by offering an in depth look at the phenomenon that continues to affect millions of people across the world every year Defined as a widespread scarcity of food Dr Basilio Dianda argues that the causes of famine cannot be reduced exclusively to a shortfall in agricultural output or to economic dynamics Instead an analysis of famine must take into account political and economic factors as well as agricultural climatologic and demographic data Political Routes to Starvation is the result of an all encompassing analysis of eighty famines from across the globe This extensive piece of research demonstrates that there are not only multiple factors at play in the genesis of a food crisis but also in its evolution to starvation Dianda contends that in order to fully understand the causes of famine it is necessary to reinstate a hierarchy between foundation and concomitant causes especially when cross comparing cases Importantly Dianda maintains that only a comprehensive approach to famine can appropriately answer the questions What is famine How does famine occur Why does famine kill

The Lives and Deaths of Jubrail Dabdoub Jacob Norris,2023-01-24 This is the fantastical yet real story of the merchants of Bethlehem the young men who traveled to every corner of the globe in the nineteenth century These men set off on the backs of donkeys with suitcases full of crosses and rosaries to return via steamship with suitcases stuffed with French francs Philippine pesos or Salvadoran colones They returned with news of mysterious lands and strange inventions clocks trains and other devices that both befuddled and bewitched the Bethlehemites With newfound wealth these merchants built shimmering pink mansions that transformed Bethlehem from a rural village into Palestine s wealthiest and most cosmopolitan town At the center of these extraordinary occurrences lived Jubrail Dabdoub The Lives and Deaths of Jubrail Dabdoub tells the story of Jubrail s encounters offering a version of Palestinian history rarely acknowledged From his childhood in rural Bethlehem to later voyages across Europe East Asia and the Americas Jubrail s story culminates in a recorded miracle in 1909 he was brought back from the dead To tell such a tale is to delve into the realms of the fantastic and improbable Through the story of Jubrail s life Jacob Norris explores the porous lines between history and fiction the normal and the paranormal the everyday and the extraordinary Drawing on aspects of magical realism combined with elements of Palestinian folklore Norris recovers the atmosphere of late nineteenth century Bethlehem a mood of excitement disorientation and wonder as the town was thrust into a new era As the book offers an original approach to historical writing it captures a fantastic story of global encounter and exchange
