Byrne, E. Philip Davis, 2003-08-28 Differences in financial structure result in contrasting financing and economic behavior This book confronts theory and empirical

research with aggregate financial data across the G7 spanning 1970 through 2000. It compares the contrasting patterns and development of financial structures with the main theoretical and empirical results in economic literature. The resulting data analysis traces portfolios over a turbulent period characterized by considerable economic and financial instability marked financial liberalization far reaching technical change and volatile asset prices. *Financial Structure and Economic Growth - Case of Vietnam* Huan Nguyen, 2014. This paper estimates the actual role of the financial structure for economic growth in Vietnam by using Granger causality test and VAR Cholesky technique. The results show that there is almost no evidence on the relationship between stock market development and economic growth. Instead Vietnam's financial structure mainly bases on the banking system and major source of capital in the economy flows through this channel with total outstanding bank loans equivalent to 100% of the GDP. Meanwhile Stock market does not perform well in mobilizing medium and long term capital with the market capitalization only about 30% of the GDP of the economy.

Financial Structure and Economic Growth Nexus Revisited Lan Chu Khanh, 2019. This paper empirically reassesses the long debated relationship between financial structure and economic growth. Specifically we examine whether the effect of financial structure on economic growth is affected by the financial structure disproportion banking crisis economic volatility and level of financial development. We employ the generalized method of moments estimation to a large panel of 100 countries over the 1971-2015 period. Although the main result supports market based view the positive effect of stock market development relative to banking system decreases significantly if financial structure is unbalanced. Our findings are robust to a variety of sensitivity check including different measures of financial structure periods and model specifications.
