Patrick, Yung Chul Park, Yöng-ch'öl Pak, 1994 The analysis shows how financial development has occurred in two distinct phases Initially interest rates were regulated to remain below market levels entry of new financial institutions was restricted financial markets were segmented and domestic finance was insulated from world financial markets The second phase has seen a steady if sometimes slow removal of these restrictions Foreign Aid and the Development of the Republic of Korea David I. Steinberg, 1985 Import Controls And Export-oriented Development Richard Luedde-neurath, 2019-04-02 This book aims to consider the role of import controls in an export oriented development strategy and is based on a case study of South Korea widely regarded as one of the classic success stories in this respect According to accepted wisdom a strategy of export orientation should be predicated upon a liberal import regime Trade controls should be avoided as they give rise to a host of negative consequences The South Korean experience is often held up as an empirical illustration of how liberal import policies constitute an integral part of export oriented success **Troubled Tiger** Mark L. Clifford, 2016-12-05 This analysis of modern Korea includes the imprisonment and sentencing of two former presidents of South Korea for their role in the Kwangju uprising and on various charges of corruption the death of Kim Il Sung and the resultant North South standoff and recent labour and student protests Research, Realpolitik, And Development In Korea Larry Burmeister, 2019-07-11 This book explores the politics of Korean developmental state and commitment of state agents to rapid industrialization within world political economy focusing the Korean green revolution It assesses how differences in state society relationships affect agricultural research system priorities Asia Pacific Dynamism 1550-2000 Heita Kawakatsu, A. Toward the Rural-based Development of Commerce and Industry Y?jir? Hayami, 1998 A traditional paradigm in development economics assumes that the process of modern economic growth is associated with a major shift in labor from rural hinterlands to urban industrial centers However the logic of economic development does not dictate that industrialization and urbanization are intertwined and inseparable as assumed in the traditional paradigm The studies reported in this volume examine whether an alternative route of economic development might exist in which the modern production base also moves into the rural sector instead of the rural labor force alone moving into the urban sector Part I focuses on historical experiences in Japan such as technical and institutional innovations in rice marketing and the formation of Toyota's relationship with suppliers Part II reports on current developments in East Asia including the rural garment and weaving industries in Northern Thailand and rural entrepreneurship and industrial development in Korea

*Locked in Place* Vivek Chibber, 2011-06-27 Why were some countries able to build developmental states in the decades after World War II while others were not Through a richly detailed examination of India's experience *Locked in Place* argues that the critical factor was the reaction of domestic capitalists to the state building project During the 1950s and 1960s India launched an extremely ambitious and highly regarded program of state led development But it soon became clear that the Indian state lacked the institutional capacity to carry out rapid industrialization Drawing on newly available archival sources Vivek Chibber mounts a forceful challenge to conventional arguments by showing that the insufficient state capacity stemmed

mainly from Indian industrialists massive campaign in the years after Independence against a strong developmental state Chibber contrasts India's experience with the success of a similar program of state building in South Korea where political elites managed to harness domestic capitalists to their agenda He then develops a theory of the structural conditions that can account for the different reactions of Indian and Korean capitalists as rational responses to the distinct development models adopted in each country Provocative and marked by clarity of prose this book is also the first historical study of India's post colonial industrial strategy Emphasizing the central role of capital in the state building process and restoring class analysis to the core of the political economy of development *Locked in Place* is an innovative work of theoretical power that will interest development specialists political scientists and historians of the subcontinent **The Park Chung Hee Era** Byung-Kook Kim, Ezra F. Vogel, 2013-03-11 In 1961 South Korea was mired in poverty By 1979 it had a powerful industrial economy and a vibrant civil society that led to democracy eight years later This volume examines the transformation as a study in the politics of modernization contextualizing many historical ambiguities in South Korea's trajectory toward sustainable economic growth *National Economic Policies* D. Salvatore, 2014-06-28 This book presents an overview of national economic policies in the world's most important countries or groupings of countries The purpose of the volume is to examine and compare the policies followed by different types of countries and study their effects Although numerous studies have been published on how individual countries conduct economic policies few if any comparative studies such as the present one have been issued This volume will be of great use to students of comparative economic systems in general and to economists policymakers and the general informed public as a source of reference and comparison **The Economic and Social Modernization of the Republic of Korea** Edward S. Mason, Mahn Je Kim, Dwight H. Perkins, Kwang Suk Kim, David C. Cole, 2020-03-17 Explores the economic and social development of Korea primarily in the twentieth century Includes extensive statistical data Examines the impact of Japanese colonialism and subsequent macroeconomic development industrialization rural development fiscal and financial development income distribution the development of foreign trade the role of education foreign assistance and urbanization Includes 134 tables and 10 figures summarizing historical statistical data *Latin America vs East Asia: A Comparative Development Perspective* Jingyuan Lin, 2019-07-25 This study makes a solid case for the now prevalent contention that the development model of East Asian NICs is less costly i.e. over inflation levels and more equitable income distribution more adaptive to fluctuating world market conditions eg successful adjustment to the two oil crises and more sustainable i.e. high growth rates even in the turbulent 1970s than that of the Latin American NICs In considering these issues this book examines the major Latin American countries economic problems and development experiences in light of the more successful stabilization and development experiences of the East Asian countries Taiwan and South Korea in particular **The Political Economy of the Asian Financial Crisis** Stephan Haggard, 2010-10-01 The Asian crisis has sparked a thoroughgoing reappraisal of current international financial norms the

policy prescriptions of the International Monetary Fund and the adequacy of the existing financial architecture To draw proper policy conclusions from the crisis it is necessary to understand exactly what happened and why from both a political and an economic perspective In this study renowned political scientist Stephan Haggard examines the political aspects of the crisis in the countries most affected Korea Thailand Malaysia and Indonesia Haggard focuses on the political economy of the crisis emphasizing the longer run problems of moral hazard and corruption as well as the politics of crisis management and the political fallout that ensued He looks at the degree to which each government has rewoven the social safety net and discusses corporate and financial restructuring and greater transparency in business government relations Professor Haggard provides a counterpoint to the analysis by examining why Singapore Taiwan and the Philippines escaped financial calamity

The Economics Of Cooperation James Roumasset, Susan Barr, 2019-07-11 This book discusses the nature of institutional development as it promotes market growth It is concerned with the nature of and the prospects for pro market development planning especially in East Asia describing pro market policies that enhance economic cooperation

Post-Conflict Development in East Asia Brendan M. Howe, 2016-04-08 East Asia is a region deeply affected by conflict Colonial ideological and national wars have left their scars and legacies on regional international and national governance Yet East Asian post conflict development experiences have been viewed as remarkably successful The three largest economies of East Asia Japan China and South Korea have all experienced dramatic growth but immediately prior to their periods of expansion all experienced the devastating impacts of international conflicts and or civil upheaval These post conflict development success stories do not however tell the whole tale Other states in East Asia and in particular certain regions within some of these states while apparently emerging from similar conflictual backgrounds have experienced far less positive transitions This volume critically assesses measurements of success in East Asian post conflict development from a human centered perspective This involves a major re evaluation of accepted accounts of domestic governance and international relations in East Asia from both a comparative and inter disciplinary viewpoint Case study rich this volume provides policy prescriptions for East Asian donors and actors in an effort to provide Asian solutions for Asian problems

**Asia's Next Giant** Alice H. Amsden, 1989-09-07 South Korea has been quietly growing into a major economic force that is even challenging some Japanese industries This timely book examines South Korean growth as an example of late industrialization a process in which a nation s industries learn from earlier innovator nations rather than innovate themselves Discussing state intervention shop floor management and big business groups Amsden explores the reasons for South Korea s phenomenal growth paying special attention to the principle of reciprocity in which the government imposes strict performance standards on those industries and companies that it aids She thereby shows how South Korea Japan and Taiwan were able to grow faster than other emerging nations such as Brazil Turkey India and Mexico With its new insights Asia s Next Giant is essential reading for anyone concerned with global competition and the world economy
