Activity Theory in Formal and Informal Science Education Katerina Plakitsi, 2013-09-04 The purpose of this book is to establish a broader context for rethinking science learning and teaching by using cultural historical activity theoretic approach Activity theory already steps in its third generation and only a few works have been done on its applications to science education especially in Europe The context takes into account more recent developments in activity theory applications in US Canada Australia and Europe The chapters articulate new ways of thinking about learning and teaching science i.e. new theoretical perspectives and some case studies of teaching important scientific topics in compulsory education The ultimate purpose of each chapter and the collective book as a whole is to prepare the ground upon which a new pedagogy in science education can be emerged to provide more encompassing theoretical frameworks that allow us to capture the complexity of science learning and teaching as it occurs in and out of schools The book captures the dialogic and interactive nature of the transferring the activity theory to both formal and informal science education It also contributes to the development of innovative curricula school science textbooks educational programs and ICT's materials As a whole the book moves theorizing and practicing of science education into new face and uncharted terrain It is recommended to new scholars and researchers as well as teachers researchers

Student Work and Teacher Practices in Science Christine Y. O'Sullivan, Andrew R. Weiss, 1999 In 1996 the National Assessment of Educational Progress NAEP assessed the knowledge and skills of students in the areas of earth science life science and physical science It also collected information related to the background of students grades 4 8 and 12 their teachers grades 4 and 8 and the schools they attended grades 4 8 and 12 This report is intended primarily for science teachers hence the results presented relate directly to student performance classroom practices and school climate This report also discusses students attitudes and beliefs about science The report is divided into four parts In the first part chapter 1 an overview of the assessment is provided This includes information about the framework used in the development of the assessment a description of how the assessment was administered to students and an explanation of how to interpret NAEP results In the

second part chapters 2 3 and 4 examples of questions and student responses are presented These chapters are divided by grade The third part chapters 5 and 6 contains information collected from students teachers and school administrators about classroom practices student motivation and parental involvement in learning Finally the fourth part contains appendices offering a fuller description of the procedures used for the NAEP 1996 science assessment appendix A scoring guides for questions discussed in chapters 2 3 and 4 appendix B and standard errors for the statistics presented in the report appendix C WRM
