The Evolution of an Evolutionist Conrad Hal Waddington,1975 **The Evolutionist at Large** Grant

Allen,2014-07-01 Canadian writer Grant Allen gained prominence as an ardent defender of Darwin s theory of evolution In this volume a select group of Allen s writings on the topic of evolution are presented They range in tone from serious to lighthearted and take the form of essays poems and vignettes **The Theology of an Evolutionist** Lyman Abbott,1897

Rereading Darwin's Origin of Species Richard G. Delisle,James Tierney,2022-02-10 Widely seen as evolution s founding figure Charles Darwin is taken by many evolutionists to be the first to propose a truly modern theory of evolution Darwin s greatness however has obscured the man and his work at times even to the point of distortion Accessibly written this book presents a more nuanced picture and invites us to discover some neglected ambiguities and contradictions in Darwin s masterwork Delisle and Tierney show Darwin to be a man who struggled to reconcile the received wisdom of an unchanging natural world with his new ideas about evolution Arguing that Darwin was unable to break free entirely from his contemporaries more traditional outlook they show his theory to be a fascinating compromise between old and new Rediscovering this other Darwin and this other side of On the Origin of Species helps shed new light on the immensity of the task that lay before 19th century scholars as well as their ultimate achievements **American Socialists and**

Evolutionary Thought, 1870-1920 Mark Pittenger,1993 Reconstructs the history of scientific thought by American socialists showing how ideas about evolution shaped the national movement and its place in the international movement Documents the enthusiasm that lured both Marxists and non Marxists far beyond Darwin and Spencer to a vision of inevitable progress toward socialism Paper edition unseen 24 95 Annotation copyright by Book News Inc Portland OR

The Evolution Delusion Bart

Rask,2021-09-01 Does the field of evolution differ from other sciences The author a reviewer for a major medical journal scrutinized hundreds of scientific references in evolutionary literature adopting the same standards used for studies submitted for medical publication The data show that there are two types of evolution microevolution and macroevolution with a clear boundary between them based upon the presence and absence of empirical evidence respectively The surprising results show that there is a universal disconnect between the data and the conclusions that claim to show the larger changes of macroevolution The author reveals patterns of deviations from standard scientific methods in these studies For the first time evolutionary data have been summarized to describe both what evolution can and cannot accomplish The author shows the reader how to recognize the different ways in which the evidence for microevolution within and between some species differs from the unsupported macroevolution of most species Previous critiques of macroevolution have been debunked by advocates who have cited a multitude of scientific studies This book goes beyond previous critiques by directly addressing the data from these studies to see if they do in fact support macroevolution focused conclusions Many expert counterarguments against this book s thesis are presented and examined in the context of scientific research to reassure the reader that the author has left no stone unturned in the macroevolution debate A theory is proposed as to why there may be no empirical evidence for macroevolution The book concludes with a section entitled What we see differently There the author shows the reader the differences in perspective between the evolutionist and macroevolution critic as they look at and interpret the very same set of data

The Evolutionists Richard Morris,2002-05 Introduced in 1859 Charles Darwin s theory of evolution generated hot debate and controversy Today nearly all reputable scientists agree evolution did happen and natural selection was its main driving force Yet a century and a half after Darwin the theory of evolution is still being fought over with a ferocity that has rarely been equaled in the annals of science What are scientists arguing about And why are their exchanges sometimes so bitter In *The Evolutionists* Richard Morris vividly portrays the controversies that rage today in the field of evolutionary biology With a clear and unbiased eye he explores the fundamental questions about the evolutionary

process that have provoked such vehement disagreement among some of the world's most prominent scientists including Stephen Jay Gould fellow paleontologist Niles Eldredge geneticist John Maynard Smith and zoologist Richard Dawkins A vibrant account of contemporary evolutionary biology **The Evolutionists** is a fascinating look at how controversy and debate shape the scientific process

The Eclipse of Darwinism Peter J. Bowler, 1983 In this pioneering study of the first major challenges to Darwinism Peter J Bowler examines the competing theories of evolution identifies their intellectual origins and describes the process by which the modern concept of evolution emerged Describing the variety of influences that drove scientists to challenge Darwin's conclusions Bowler reevaluates the influence of social forces on the scientific community and explores the broad philosophical ideological and social implications of scientific theories

The Death of Evolution Michael Ebifegha, 2007-04 For over a century evolutionists have been deliberately interpreting all scientific data on origins to fit Darwin's theory of evolution For instance although the evidence in the living world and in all reliable fossil deposits shows abrupt gaps evolutionists interpret these gaps as missing links to justify the numerous transformations that the theory predicts The evolutionist paradigm recently suffered a fatal blow when empirical science ripped off its chapter on junk DNA which Darwinists have idolized as the evolutionary key in unfolding ancestral history and thus the unique testimony against a purely creationist worldview All along just so explanations have persistently been tendered to camouflage the discrepancies In Farewell to Darwinian Evolution Michael Ebifegha presents a historical account of God's creation patent and seal and shows that they corroborate the

scientific evidence Arguing that a report claiming both invention and ownership of the cosmos must override any theory relating to events in the cosmos that were never witnessed Ebifegha insists it is time to bid farewell to Darwinian transformational evolution macroevolution The focus in science he stresses must be limited to microevolution the aspect that underpins modern advances in medicine agriculture and selective breeding Dr Michael Ebifegha is a scholar with international experience He is a graduate of Ahmadu Bello University Nigeria M Sc Applied Geophysics Carleton University Canada M Sc Physics and the University of Toronto B Ed Ph D Physics He is currently a full time science and mathematics instructor at the Toronto District School Board Ebifegha is the author of The Darwinian Delusion Creation or Evolution and most recently 4th Refuting the Myth of Evolutionism and Exposing the Folly of the Clergy Letters Strickberger's Evolution Brian K. The Ultimate Proof of Creation Dr. Jason Lisle, 2009-06-01 It's a bold title *The Ultimate Proof of Creation* But is there such a thing There are many books that contain seemingly powerful arguments for biblical creation But is there an ultimate proof of creation There is an argument for creation that is powerful conclusive and has no true rebuttal As such it is an irrefutable argument an ultimate proof of the Christian worldview biblical creation Master the method outlined in the following chapters and you will be able to defend Christianity against all opposition Learn how to apply the ultimate proof in dialogues with evolutionists how to spot logical fallacies and biblical examples of defending the faith Discover the nature of scientific evidence and its proper role in the origins debate Details how to address theistic evolution day age creationism and other compromised positions of biblical creationism An exceptional book for pastors ministry leaders seminary attendees and students of religion and philosophy This book is a complete guide to defending the Christian faith emphasizing the defense of the Genesis account of creation built on techniques that have been developed over many years and presentations They are
