Hongwei Wang,Gongzhuang Peng,2023-03-01 This book not only presents the state of the art research on knowledge modelling knowledge retrieval and knowledge reuse but also elaborates the Collaborative Knowledge Management CKM paradigm and the architecture for the next generation of knowledge management systems Although knowledge management has been extensively studied particularly in the fields of business management and engineering design there is a lack of systematic methodologies for addressing the integrated and collaborative dimension of knowledge management during the collaborative process of designing and developing complex systems products processes and services The rapid development of information technologies together with their applications in engineering and management has laid the foundation for a Collaborative Knowledge Management CKM paradigm The book specifically discusses this paradigm from a computational perspective By exploring specific research findings underpinning further CKM research and applications and describing methods related to hot research topics and new research areas the book appeals to professionals researchers and graduate students who are interested in knowledge management and related topics and who have a basic understanding of information technologies computational methods and knowledge management Evolution Samuel Moon,1960

Automotive Development Processes Julian Weber,2009-06-22 The global crisis the automotive industry has slipped into over the second half of 2008 has set a fierce spotlight not only on which cars are the right ones to bring to the market but also on how these cars are developed Be it OEMs developing new models suppliers integrating themselves deeper into the development processes of different OEMs analysts estimating economical risks and opportunities of automotive investments or even governments creating and evaluating scenarios for financial aid for suffering automotive companies At the end of the day it is absolutely indispensable to comprehensively understand the processes of automotive development the core subject of

this book Let's face it More than a century after Carl Benz Wilhelm Maybach and Gottlieb Daimler developed and produced their first motor vehicles the overall concept of passenger cars has not changed much Even though components have been considerably optimized since then motor cars in the 21st century are still driven by combustion engines that transmit their propulsive power to the road's face via gearboxes transmission shafts and wheels which together with spring damper units allow driving stability and ride comfort Vehicles are still navigated by means of a steering wheel that turns the front wheels and the required control elements are still located on a dashboard in front of the driver who operates the car sitting in a seat

Current Issues in Databases and Information Systems Julius Stuller, Jaroslav Pokorný, Bernhard Thalheim, Yoshifumi Masunaga, 2003-06-29 The East European Conference on Advances in Databases and Information Systems ADBIS is the successor of the annual International Workshops with the same title that during 1993-1996 were organized in Russia by the Moscow ACM SIGMOD Chapter Initiated in St Petersburg Russia in 1997 it continued in Poznań Poland in 1998 and in Maribor Slovenia in 1999 The ADBIS Conference became the premier database and information systems conference in Eastern Europe It intended to increase interaction and collaboration between researchers from the East and the West and to provide an internationally recognized tribune for the presentation of research results The International Conference on Database Systems for Advanced Applications DASFAA was first held in Seoul Korea in 1989 to promote database research and development activities in Asian and Australasian countries The Special Interest Group of Database Systems SIGDBS of the Information Processing Society of Japan IPSJ and the Special Interest Group of Database SIGDB of Korea Information Science Society KISS had important roles in the organization of DASFAA Since that time the DASFAA has been held every two years Tokyo in 1991 Daejeon in 1993 Singapore in 1995 Melbourne in 1997 and Taiwan in 1999 The DASFAA became one of the most prestigious international conferences ever held in Asia or Australasia

Product Modelling for Computer Integrated Design and Manufacture Michael Pratt, R.D. Sriram, Michael J. Wozny, 2016-01-09 This state of the art text explores developments in geometric modeling product modeling and their applications In particular it looks at the means by which product geometry emerges from the conceptual stages of design and the use of geometric reasoning for applications downstream of design including manufacture and assembly Much existing design research is either totally geometry based or totally non geometric and the interface between the two areas is of intense interest to

industry as well as being crucial for the successful development of integrated systems for design and manufacture This interface is currently not well understood and the book makes a significant contribution towards its understanding This book is essential reading for technical managers and research and development engineers

An Approach to Modelling Software Evolution Processes Tong Li,2009-03-15 An Approach to Modelling Software Evolution Processes describes formal software processes that effectively support software evolution The importance and popularity of software evolution increase as more and more successful software systems become legacy systems For one thing software evolution has become an important characteristic in the software life cycle for another software processes play an important role in increasing efficiency and quality of software evolution Therefore the software evolution process the inter discipline of software process and software evolution becomes a key area in software engineering The book is intended for software engineers and researchers in computer science Prof Tong Li earned his Ph D in Software Engineering at De Montfort University U K he has published five monographs and over one hundred papers

Managing Technological Innovation: Tools And Methods Tugrul U Daim,2017-03-09 The management of technological innovation is both an art as well as a science the process involves the know how and technological core skills to deliver the functionality on the one hand and with an ear on the ground the ability to identify changes in technologies to come up with new innovations on the other This requires as a result frameworks system tools and methodologies to improve the yield in innovations Managing Technological Innovation provides a set of tools and case studies for R presenting the methods available to better matching of technologies to strategic directions supported with case studies to illustrate the evaluation methods Part 3 covers the development and building of technological portfolios with new products as well as mitigation strategies Part 4 focus on the execution phase of built portfolios the development of new products And finally Part 5 rounds up with a study on the factors which impact the diffusion of technological innovations into the market place This book is a practical guide for R D professions and designers as well as a case study reference for graduate students in pursuit of their project work

The Metaphysics of Evolution David L. Hull, 1989-01-01 This critical collection of essays represents the best of the best when it comes to philosophy of biology Many chapters treat evolution as a biological phenomenon but the author is more generally concerned with science itself Present day science particularly current views on systematics and biological evolution are investigated The aspects of these sciences that are relevant to the general analysis of selection processes are presented and they also serve to exemplify the general characteristics exhibited by science since its inception

Analysis of Evolutionary Processes Fabio Dercole, Sergio Rinaldi, 2008-02-11 Quantitative approaches to evolutionary biology traditionally consider evolutionary change in isolation from an important pressure in natural selection the demography of coevolving populations In Analysis of Evolutionary Processes Fabio Dercole and Sergio Rinaldi have written the first comprehensive book on Adaptive Dynamics AD a quantitative modeling approach that explicitly links evolutionary changes to demographic ones The book shows how the so called AD canonical equation can answer questions of paramount interest in biology engineering and the social sciences especially economics After introducing the basics of evolutionary processes and classifying available modeling approaches Dercole and Rinaldi give a detailed presentation of the derivation of the AD canonical equation an ordinary differential equation that focuses on evolutionary processes driven by rare and small innovations The authors then look at important features of evolutionary dynamics as viewed through the lens of AD They present their discovery of the first chaotic evolutionary attractor which calls into question the common view that coevolution produces exquisitely harmonious adaptations between species And opening up potential new lines of research by providing the first application of AD to economics they show how AD can explain the emergence of technological variety Analysis of Evolutionary Processes will interest anyone looking for a self contained treatment of AD for self study or teaching including graduate students and researchers in mathematical and theoretical biology applied mathematics and theoretical economics
