*Collaborative Knowledge Management Through Product Lifecycle* Hongwei Wang, Gongzhuang Peng, 2023-03-01 This book not only presents the state of the art research on knowledge modelling knowledge retrieval and knowledge reuse but also elaborates the Collaborative Knowledge Management CKM paradigm and the architecture for the next generation of knowledge management systems Although knowledge management has been extensively studied particularly in the fields of business management and engineering design there is a lack of systematic methodologies for addressing the integrated and collaborative dimension of knowledge management during the collaborative process of designing and developing complex systems products processes and services The rapid development of information technologies together with their applications in engineering and management has laid the foundation for a Collaborative Knowledge Management CKM paradigm The book specifically discusses this paradigm from a computational perspective By exploring specific research findings underpinning further CKM research and applications and describing methods related to hot research topics and new research areas the book appeals to professionals researchers and graduate students who are interested in knowledge management and related topics and who have a basic understanding of information technologies computational methods and knowledge management

**Product Modelling for Computer Integrated Design and Manufacture** Michael Pratt, R.D. Sriram, Michael J. Wozny, 2016-01-09 This state of the art text explores developments in geometric modeling product modeling and their applications In particular it looks at the means by which product geometry emerges from the conceptual stages of design and the use of geometric reasoning for applications downstream of design including manufacture and assembly Much existing design research is either totally geometry based or totally non geometric and the interface between the two areas is of intense interest to industry as well as being crucial for the successful development of integrated systems for design and manufacture This interface is currently not well understood and the book makes a significant contribution towards its understanding This book is essential reading for technical managers and research and development engineers

**Current Issues in Databases and Information Systems** Julius Stuller, Jaroslav Pokorný, Bernhard Thalheim, Yoshifumi Masunaga, 2003-06-29 The East European Conference on Advances in Databases and Information Systems ADBIS is the successor of the annual International Workshops with the same title that during 1993 1996 were organized in Russia by the Moscow ACM SIGMOD Chapter Initiated in St Petersburg Russia in 1997 it continued in Poznań Poland in 1998 and in Maribor Slovenia in 1999 The ADBIS Conference became the premier database and information systems conference in Eastern Europe It intended to increase

interaction and collaboration between researchers from the East and the West and to provide an internationally recognized  
tribune for the presentation of research results The International Conference on Database Systems for Advanced Applications  
DASFAA was first held in Seoul Korea in 1989 to promote database research and development activities in Asian and  
Australasian countries The Special Interest Group of Database Systems SIGDBS of the Information Processing Society of Japan  
IPSJ and the Special Interest Group of Database SIGDB of Korea Information Science Society KISS had important roles in  
the organization of DASFAA Since that time the DASFAA has been held every two years Tokyo in 1991 Daejeon in 1993  
Singapore in 1995 Melbourne in 1997 and Taiwan in 1999 The DASFAA became one of the most prestigious international  
conferences ever held in Asia or Australasia      **On the Origin of Products** Arthur O. Eger, Huub Ehlhardt, 2018-02-15

structural technology Applications in civil mechanical industrial and material science are covered in this book Providing high  
quality scholarly research addressing developments applications and implications in the field of structural health monitoring  
construction safety and management sensors and measurements This volume contains new models for nonlinear structural  
analysis and applications of modeling identification Furthermore advanced chemical materials are discussed with  
applications in mechanical and civil engineering and for the maintenance of new materials In addition a new system of  
pressure regulating and water conveyance based on small and middle hydropower stations is discussed An experimental  
investigation of the ultimate strength and behavior of the three types of steel tubular K joints was presented Furthermore  
real time and frequency linear and nonlinear modeling performance of materials of structures contents were concluded with  
the notion of a fully brittle material and this approach is implemented in the book by outlining a finite element method for the  
prediction of the construction performance and cracking patterns of arbitrary structural concrete forms This book is an ideal  
reference for practicing engineers in material mechanical and civil engineering and consultants design construction
