Anthony Blair, Charles A. Willard, A. Francisca Snoeck Henkemans, 2012-12-06 This volume of the Argumentation Library contains a collection of twenty six theoretical contributions to the study of argumentation Together they provide an overview of recent developments in the theory of argumentation which does justice to the theoretical variety in the field In Anyone Who Has a View the subject of argumentation is approached from different angles Both the formal and informal logical approaches and the rhetorical and communicative approaches are represented in various ways We are convinced that the collection of essays as a whole will be of interest not only to those engaged directly in the study of argumentation but also to scholars from a variety of disciplines who are interested in the recent developments in this field The book opens with an essay by the informal logician Robert C Pinto For all the differences between them James B Freeman Harvey Siegel Ralph H Johnson Hans V Hansen and J Anthony Blair are also prominent members of that movement Some informal logicians either eschew or simply do not use formal methods in their approach to argumentation while others such as David Hitchcock use both formal and informal methods Erik C W Krabbe is a logician who proudly defends a formal dialectical approach to argumentation Daniel H Cohen Frans H van Eemeren Peter Houtlosser Fred J Kauffeld C Scott Jacobs Christian Kock Christian Plantin Sorin Stati Chris Reed Douglas N Argumentation Raymond S. Nickerson, 2020-12-17 Drawing from the study of human reasoning Argumentation describes different types of arguments and explains how they influence beliefs and behaviour Raymond Nickerson identifies many of the fallacies biases and other flaws often found in arguments as well as stratagems schemes illogical and alogical tactics that people regularly use to persuade others Much attention is given to the evaluation of arguments Readers will learn a new schematic for evaluating arguments based on cognitive science As a source for understanding and evaluating arguments in decision making it is ideal for courses on cognition reasoning and psychology

Logic and Argumentation Mehdi Dastani, Huimin Dong, Leon van der Torre, 2020-03-27 This book constitutes the refereed proceedings of the Third International Conference on Logic and Argumentation CLAR 2020 held in Hangzhou China in April 2020 The 14 full and 7 short papers presented were carefully reviewed and selected from 31 submissions The papers cover the focus of the CLAR series including formal models of argumentation logics for decision making and uncertain reasoning formal models of evidence confirmation and justification logics for group cognition and social network reasoning about norms formal representations of natural language and legal texts as well as applications of argumentation on climate engineering Fundamentals of Argumentation Theory Frans H. van Eemeren, Rob Grootendorst, Ralph H. Johnson, Christian Plantin, Charles A. Willard, 2013-11-05 Argumentation theory is a distinctly multidisciplinary field of inquiry It draws its data assumptions and methods from disciplines as disparate as formal logic and discourse analysis linguistics and forensic science philosophy and psychology political science and education sociology and law and rhetoric and artificial intelligence This presents the growing group of interested scholars and students with a problem of access since it is even for those active in the field not common to have acquired a familiarity with relevant aspects of each discipline that enters into

this multidisciplinary matrix This book offers its readers a unique comprehensive survey of the various theoretical contributions which have been made to the study of argumentation It discusses the historical works that provide the background to the field and all major approaches and trends in contemporary research Argument has been the subject of systematic inquiry for twenty five hundred years It has been graced with theories such as formal logic or the legal theory of evidence that have acquired a more or less settled provenance with regard to specific issues But there has been nothing to date that qualifies as a unified general theory of argumentation in all its richness and complexity This being so the argumentation theorist must have access to materials and methods that lie beyond his or her home subject It is precisely on this account that this volume is offered to all the constituent research communities and their students Apart from the historical sections each chapter provides an economical introduction to the problems and methods that characterize a given part of the contemporary research program Because the chapters are self contained they can be consulted in the order of a reader s interests or research requirements But there is value in reading the work in its entirety Jointly authored by the very people whose research has done much to define the current state of argumentation theory and to point the way toward more general and unified future treatments this book is an impressively authoritative contribution to the field

Reflections on Theoretical Issues in Argumentation Theory Frans H. van Eemeren, Bart Garssen, 2015-08-08 This volume presents a selection of papers reflecting key theoretical issues in argumentation theory Its six sections are devoted to specific themes including the analysis and evaluation of argumentation argument schemes and the contextual embedding of argumentation The section on general perspectives on argumentation discusses the trends of empiricalization contextualization and formalization offers descriptions of the analytical and evaluative tools of informal logic and highlights selected principles that argumentation

theorists do and do not agree upon In turn the section on linguistic approaches to argumentation focuses on the problem of distinguishing between explanation and argument while also elaborating on the role of verbal indicators of argument schemes All essays included in this volume point out notable recent developments in the study of argumentation Crucial Concepts in Argumentation Theory F. H. van Eemeren, 2001 *Crucial Concepts in Argumentation Theory* is a collection of essays that discuss a series of important issues in the study of argumentation The essays describe the concepts that are crucial to argumentational research and the various ways these concepts have been approached The essays explore such issues as points of view unexpressed premises argument schemes argumentation structures fallacies argument interpretation and reconstruction and argumentation in law Each of the essays provides interested readers with an overview of the literature that can serve as a point of departure for further study *Commonsense Justice* Norman J. FINKEL, Norman J Finkel, 2009-06-30 For the first time in our history U S prisons house over a million inmates enough to populate a city larger than San Francisco Building prisons is the new growth industry as the American public reacts to a perceived increase in violence and politicians take a hard line toward crime But this eagerness to construct more prisons raises basic questions about what the community wants and will tolerate and what the Supreme Court will sanction In this timely book Norman Finkel looks at the relationship between the law on the books as set down in the Constitution and developed in cases and decisions and what he calls commonsense justice the ordinary citizen's notions of what is just and fair Law is an essentially human endeavor a collection of psychological theories about why people think feel and behave as they do and when and why we should find some of them blameworthy and punishable But is it independent of community sentiment as some would contend Or as Finkel suggests do juries bring the community's judgment to bear on the moral blameworthiness of the defendant When jurors decide that the law is unfair or the punishment inappropriate for a particular defendant they have sometimes nullified the law Nullification represents the jury's desire not to defeat but to perfect and complete the law It is the no confidence vote of commonsense justice refusing to follow the path the law has marked out and pointing to a new path based on what seem to be more just grounds Finkel brings to life the story behind the jury and judicial decisions interweaving anecdotes case law and social science research to present a balanced and comprehensive view of important legal and social policy issues **On Reasoning and Argument** David Hitchcock, 2017-04-06 This book brings together in one place David Hitchcock's most significant published articles on reasoning and argument In seven new chapters he updates his thinking in the light of subsequent scholarship Collectively the papers articulate a distinctive position in the philosophy of argumentation Among other things the author develops an account of material consequence that permits evaluation of inferences without problematic postulation of unstated premises updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion advances a general theory of relevance provides comprehensive frameworks for evaluating inferences in reasoning by

analogy means end reasoning and appeals to considerations or criteria argues that none of the forms of arguing ad hominem is a fallacy describes proven methods of teaching critical thinking effectively **Fallacies** Hans V. Hansen, Robert C. Pinto, 2010-11 Since 1970 when Charles Hamblin issued a challenge for philosophers logicians and educators in general to begin work anew in fallacies a serious literature on fallacies has indeed developed Part of this literature deals with the theory of what fallacies are another part of it contains rigorous analyses of particular fallacies However most is still not readily accessible to the researcher teacher or student of the field As a result the best work on fallacies is not finding its way into the classroom nor is it informing the educational and intellectual experiences available to most college and university students A major purpose of this book is to make the post Hamblin work on fallacies available to a wider audience in a single convenient volume The editors have brought together for the first time the most important historical writings on fallacy theory from Aristotle to John Stuart Mill and the most recent and most important theoretical and pedagogical developments in the field since Hamblin's landmark 1970 book All but a few of the essays included are new contributions for this anthology and an extensive annotated bibliography is included for researchers and students of fallacies and fallacy theory *Inside Arguments* Henrique Jales Ribeiro, 2012-04-25 This volume includes a collection of eighteen essays that provide a decisive input to the study of logic and argumentation theory by some of the finest specialists in these areas covering the main schools of thought and contemporary trends at the beginning of the 21st century In these essays the authors clarify the status of what we currently call ambiguously and problematically logic and argumentation theory and discuss the no less controversial issue of the relationship between these two concepts when applied to the study of argumentation and its problems At the same time they take stock of the most recent developments of argumentation theory considered as an ongoing research subject It is the first time in the last few decades that a work this comprehensive and up to date on such matters has been published This volume is an essential tool for all of those interested in the study of the relations between logic and argumentation particularly at the university level It provides not only an introduction to these subjects but also the necessary framework for further specialised research development in the future
