Logika Vseedinstva:

Theology and Philosophy in Eastern Orthodoxy Christoph Schneider, 2021-01-01 Even in the twenty first century critical and creative engagement with modern and postmodern philosophy is a rarity in Orthodox circles The collection of essays presented here by Christoph Schneider makes a significant contribution to overcoming this deficit Eight scholars from six different countries working on the intersection between Orthodox thought and philosophy present their research in short and accessible form The topics covered range from political philosophy to phenomenology metaphysics philosophy of self logic ethics and philosophy of language The authors do not all promote one particular approach to the relationship between Orthodox theology and philosophy Nevertheless taken together their work demonstrates that Orthodox scholarship is not confined to historical research about the Byzantine era but can contribute to and enrich contemporary intellectual debates
