Clampitt,2008 When Lea County was created in 1917 from Eddy and Chaves Counties in the far southeastern corner of New Mexico it was virtually a blank canvas for new settlers with few roads towns or amenities At that time the area was little more than vast pasture lands for cattle though a handful of hardy folk had already established homesteads in the region But on June 13 1928 that all changed when oil was discovered and almost overnight an influx of new settlers arrived and development began in earnest Oil wells were drilled on ranchers property and saloons stores and hotels sprang up especially in the city of Hobbs The oil boom drove the early economy of Hobbs and Lea County and of southeastern New Mexico but through boom and bust the community has endured and today more than 50 000 residents call it home **Spirit Leveling in Georgia, 1896 to 1914, Inclusive** Robert Bradford Marshall,1916 *The Wolf's Tooth* Cristina Eisenberg,2013-03-05 Animals such as wolves sea otters and sharks exert a disproportionate influence on their environment dramatic ecological consequences can result when they are removed from or returned to an ecosystem In *The Wolf's Tooth* scientist and author Cristina Eisenberg explores the concept of trophic cascades and the role of top predators in regulating ecosystems Her fascinating and wide ranging work provides clear explanations of the science surrounding keystone predators and considers how this notion can help provide practical solutions for restoring ecosystem health and functioning Eisenberg examines both general concepts and specific issues sharing accounts from her own fieldwork to illustrate and bring to life the ideas she presents She considers how resource managers can use knowledge about trophic cascades to guide recovery efforts including how this science can be applied to move forward the bold vision of rewilding the North American continent In the end the author provides her own recommendations for local and landscape scale applications of what has been learned about interactive food webs At their most fundamental level trophic cascades are powerful stories about ecosystem processes of predators and their prey of what

it takes to survive in a landscape of the flow of nutrients The Wolf s Tooth is the first book to focus on the vital connection between trophic cascades and restoring biodiversity and habitats and to do so in a way that is accessible to a diverse readership

Hodge, 2018-09-04 In the tradition of Ian Frazier s Great Plains and as vivid as the work of Cormac McCarthy an intoxicating singularly illuminating history of the Texas borderlands from their settlement through seven generations of Roger D Hodge s ranching family What brought the author s family to Texas What is it about Texas that for centuries has exerted a powerful allure for adventurers and scoundrels dreamers and desperate souls outlaws and outliers In search of answers Hodge travels across his home state which he loves and hates in shifting measure tracing the wanderings of his ancestors into forgotten histories along vanished roads Here is an unsentimental keenly insightful attempt to grapple with all that makes Texas so magical punishing and polarizing Here is a spellbindingly evocative portrait of the borderlands with its brutal history of colonization conquest and genocide where stories of death and drugs and desperation play out daily And here is a contemplation of what it means that the ranching industry that has sustained families like Hodge s for almost two centuries is quickly fading away taking with it a part of our larger deep rooted cultural inheritance A wholly original fusion of memoir and history as piercing as it is elegiac Texas Blood is a triumph **Spine of the Continent** Mary Ellen Hannibal, 2013-08-06 As climate change encroaches natural habitats are shifting while human development makes islands of even the largest nature reserves stranding the biodiversity within them The Spine of the Continent profiles the most ambitious conservation effort ever made to create linked protected areas from the Yukon to Mexico Backed by blue ribbon scientific foundations the Spine is a grassroots cooperative effort among NGOs large and small

and everyday citizens It aims not only to make physical connections so nature will persist but also to make connections between people and the land In this fascinating and important account Mary Ellen Hannibal travels the length of the Spine and shares stories of the impassioned activists she meets and the critters they love Fly Me to the Moon Dayton Lummis,2013-09-27 To some this collection of commentary and observationsfourth in what now must be called The Notational Quartetmight seem as remote as the proverbial Man in the Moon But the reader will find it very relevant to the changing and troubled times that we find ourselves in The author has steered the reader and vessel to a distant and little known shore where hope for return to point of origin is very much in doubt The boats that left from the same harbor have rowed away from one another St. Nicholas Mary Mapes Dodge,1920
