Everyday Life A Poetics Of Vernacular Practices:

Everyday Life Roger Abrahams, 2011-06-07 A folklorist and ethnographer who has written about the Southern Appalachians African American communities in the United States and the West Indies Roger D Abrahams goes up against the triviality barrier Here he takes on the systematics of his own culture He traces forms of mundane experience and the substrate of mutual understandings carried around as part of our own cultural longings and belongings *Everyday Life* explores the entire range of social gatherings from chance encounters and casual conversations to well rehearsed performances in theaters and stadiums Abrahams ties the everyday to those more intense experiences of playful celebration and serious power displays and shows how these seemingly disparate entities are cut from the same cloth of human communication Abrahams explores the core components of everyday ness including aspects of sociability and goodwill from jokes and stories to elaborate networks of organization both formal and informal in the workplace He analyzes how the past enters our present through common experiences and attitudes through our shared practices and their underlying values *Everyday Life* begins with the vernacular terms for old talk and offers an overview of the range of practices thought of as customary or traditional Chapters are concerned directly with the terms for intense experiences mostly forms of play and celebration but extending to riots and other forms of social and political resistance Finally Abrahams addresses key terms that have recently come front and center in sociological discussions of culture in a global perspective such as identity ethnicity creolization and diaspora thus taking on academic jargon words as they are introduced into vernacular discussions

Interpretation in Educational Research Paul Smeyers,David Bridges,Nicholas C. Burbules,Morwenna Griffiths,2015-01-06 This handbook focuses on the often neglected dimension of interpretation in educational research It argues that all educational research is in some sense interpretive and that understanding this issue belies some usual dualisms of thought and practice such as the sharp dichotomy between qualitative and quantitative research Interpretation extends from the very framing of the research task through the sources which constitute the data the process of their recording representation and analysis to the way in which the research is finally or provisionally presented The thesis of the handbook is that interpretation cuts across the fields both philosophically organizationally and methodologically By covering a comprehensive range of research approaches and methodologies the handbook gives early career researchers what they need to know in order to decide what particular methods can offer for various educational research contexts fields An extensive overview includes concrete examples of different kinds of research not limited for example to teaching and learning examples as present in the Anglo Saxon tradition but including as well what in the German Continental tradition is labelled pädagogisch examples from child rearing and other contexts of non formal education with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice combined in each case with consideration of the role of interpretation in the process The handbook includes examples of a large number of methods traditionally classified as qualitative interpretive and quantitative used across the area of the study of education Examples are drawn from across the globe thus exemplifying the different opportunities and constraints that educational research has to confront in different societies *Urban Aesthetics in Early Modern London* Christopher
