Data Analytics Applications in Education Jan Vanthienen,Kristof

De Witte,2017-09-29 The abundance of data and the rise of new quantitative and statistical techniques have created a promising area data analytics This combination of a culture of data driven decision making and techniques to include domain knowledge allows organizations to exploit big data analytics in their evaluation and decision processes Also in education and learning big data analytics is being used to enhance the learning process to evaluate efficiency to improve feedback and to enrich the learning experience As every step a student takes in the online world can be traced analyzed and used there are plenty of opportunities to improve the learning process of students First data analytics techniques can be used to enhance the student s learning process by providing real time feedback or by enriching the learning experience Second data analytics can be used to support the instructor or teacher Using data analytics the instructor can better trace and take targeted actions to improve the learning process of the student Third there are possibilities in using data analytics to measure the

performance of instructors Finally for policy makers it is often unclear how schools use their available resources to produce outcomes By combining structured and unstructured data from various sources data analytics might provide a solution for governments that aim to monitor the performance of schools more closely Data analytics in education should not be the domain of a single discipline Economists should discuss the possibilities issues and normative questions with a multidisciplinary team of pedagogists philosophers computer scientists and sociologists By bringing together various disciplines a more comprehensive answer can be formulated to the challenges ahead This book starts this discussion by highlighting some economic perspectives on the use of data analytics in education The book begins a rich multidisciplinary discussion that may make data analytics in education seem as natural as a teacher in front of a classroom **A Critique of**

Pure Teaching Methods and the Case of Synthetic Phonics Andrew Davis,2017-11-16 A Critique of Pure Teaching Methods and the Case of Synthetic Phonics examines how research into the effectiveness of teaching methods can and should relate to what takes place in the classroom The discussion brings to light some important features of the way we classify teaching activities The classifications are unlike those we use in natural science for instance how we classify drug dosages This point has very important implications for what should be considered the appropriate relationships between educational research and classroom practice Andrew Davis applies the results of this discussion to the teaching of early reading focussing in particular on the approach known as synthetic phonics He provides a philosophical investigation into the nature of reading and into the concepts that feature in approaches to teaching it such as the idea of building words from letter sounds the nature of words themselves and reading for meaning He concludes with a discussion of why this matters so much reflecting on how stories and books can be part of a child s emerging identity within the family He explores how values of family life should be weighed against the importance of achievements in school and argues for the claim that school reading policies of certain kinds may have a destructive impact if they are felt to trump the private interests of children and their families **Evidence-Based Teaching** William Buskist,James E. Groccia,2011-12-15 What could be more important to

college and university faculty than teaching well Indeed in the past several years researchers have not only investigated key variables influencing teaching and learning they also have applied empirical findings to develop and refine new systems of teaching and learning approaches that provide the infrastructure for the day to day organization and assessment of student learning over the course of an academic term This volume presents an overview of these systems and offers an assessment of the effectiveness of each relative to both student learning and enjoyment of the learning process Written by leading teaching scholars these systems include the lecture problem based learning case studies team based learning interteaching service learning just in time teaching Web based computer aided personalized instruction and online teaching Each contributor outlines the basic principles of a system describes how to implement the system and reviews the system s overall effectiveness This is the 128th volume of the Jossey Bass higher education quarterly report New Directions for Teaching and
