Evolution or Creation? Albert J. DeBenedictis, 2011-08-26 Have you ever wondered how the universe originated or whether the universe always existed Have you ever wondered how life began on earth Have you ever heard others discuss origins but felt unable to contribute to the conversation Would you like to defend your views but feel unequipped or inadequate to do so Are you unsure about what to believe Would you like to learn more about the subject of origins If so this book will be a help to you The subject of evolution and creation often causes much contention and controversy The question that may be asked is Why is there so much tension and animosity between those who hold to opposing views regarding the subject of origins Others may ask What do those of opposing views base their beliefs upon Is there any reconciling of the different views The differences I believe in part are due to ones perceptions regarding science and theology This book is not about Christians versus atheists This book is more about creation versus evolution than about Creationism versus Evolutionism This book is about comparing various views opinions and evidence related to evolution and creation Some of the information being presented may be new to you and may take some time to digest Evolutionists generally view creation in the same way that creationists generally view evolution Opposing views are rarely taken seriously as they are a contradiction to ones own bias Whatever your current views are regarding the origins of the universe and life or level of knowledge of origins this book is about considering various sides of the issue of evolution In this book we will be comparing the evidence and arguments and then weighing the pros and cons in an attempt to determine the validity of each view You will however be left to make your own decisions about each subject that is presented This book may either strengthen your current views of origins or may cause you to re think what you currently believe about origins Whatever your views are regarding the origins of the universe and life this book is about considering various sides of the issue of evolution In this book the evidence and arguments will be presented for the reader to determine the validity of each view Subjects such as the origin of the universe the age of the universe the fossil evidence the possibilities of a global flood the origins of life

Stanley Millers Experiment of 1953 the fossils in the strata of the earth the components of evolution Natural Selection Adaptation Mutations Speciation and Genetic Drift Punctuated Equilibrium Haeckels Embryos and Recapitulation Vestiges Pseudogenes Biological Complexity and Intelligent Design Comparing biological similarities and differences between Chimpanzee and human genome Comparing the Human and Ape Fossil Evidence will be examined Multiple top resources of various professions have been included in this book to provide information on the many different subjects discussed Although this book is an in depth study of evolution it was written on the level so that the average teenager or adult will be able to understand what is being presented Difficult words and terms are explained so that you will not need to consult a dictionary every time an unknown word or term appears I attempted to present the subject matter on a level that most people will be able to easily understand The various views and arguments are presented in a manner similar to having a debate The aim of this book is to help either strengthen your current views of origins or cause you to re think what you currently believe It is hoped that at least you will develop a better appreciation for the opposing views and will better understand why those who believe in the opposing views believe as they do I sincerely hope that this book will be beneficial to you whether you are se

God and Evolution Robert James Berry,2000-06 **The 10 Things You Should Know About the Creation vs. Evolution Debate** Ron Rhodes, **Creation and Evolution** Alan Hayward,2005-01-26 Even non Christian scientists are attacking the traditional evolutionary theory still taught in many schools as fact In Creation and Evolution British physicist Dr Alan Hayward draws evidence solely from these non Christian researchers to discredit gradual evolution and Darwin s mechanism of natural selection Hayward also examines in detail young earth theories flood geology and geological testimony to an ancient earth In the end he suggests a surprising interpretation of Genesis that argues for both a historical Adam and creation over eons of time Bowing neither to theistic evolution nor scientific creationism Hayward writes from the perspective of a Christian physicist committed both to a high view of Scripture and to rigorous honesty with scientific data

Evolutionary Creation Denis O. Lamoureux, 2008-06-15 In this provocative book evolutionist and evangelical Christian Denis O Lamoureux proposes an approach to origins that moves beyond the evolution versus creation debate Arguing for an intimate relationship between the Book of God's Words and the Book of God's Works he presents evolutionary creation a position that asserts that the Father Son and Holy Spirit created the universe and life through an ordained and sustained evolutionary process This view of origins affirms intelligent design and the belief that beauty complexity and functionality in nature reflect the mind of God Lamoureux also challenges the popular Christian assumption that the Holy Spirit revealed scientific and historical facts in the opening chapters of the Bible He contends that Scripture features an ancient understanding of origins that functions as a vessel to deliver inerrant and infallible messages of faith Lamoureux shares his personal story and his struggle in coming to terms with evolution and Christianity Like many he lost his boyhood faith at university in classes on evolutionary biology After graduation he experienced a born again conversion and then embraced belief in a literal six day creation Graduate school training at the doctoral level in both theology and biology led him to the conclusion that God created the world through evolution Lamoureux closes with the two most important issues in the origins controversy the pastoral and pedagogical implications How should churches approach this volatile topic And what should Christians teach their children about origins

not aware that many legitimate scientists embrace the Genesis explanation of origins In What is Creation Science two of the most respected members of that group have given us the benefit of their knowledge The book itself though technical in places is remarkably clear and its focus is on a fair dialogue of the issues So much so that many thousands of readers have taken to heart Dr Parker s challenge to Think About It The creation evolution question is not an issue that concerns only biologists on the one hand and religious people on the other In one way or another the issue permeates every field of academic study and every aspect of national life It deals with two opposing basic worldviews two philosophies of origins and destinies of life and meaning Consequently it is or should be of special concern to everyone

Science and Earth History Arthur Newell Strahler,1999 In this comprehensive treatment of the ongoing conflict between creationists and evolutionary scientists well known geomorphologist Arthur Strahler carefully examines creationists claims of scientific evidence for the six day divine creation of the universe followed by the catastrophic flood of Noah as claimed in Genesis The creationists arguments are examined and evaluated against the findings of mainstream science in the fields of cosmology astronomy geophysics geology paleontology and evolutionary biology Updated with a new preface and responses to recent attacks on evolutionary theory Science and Earth History can serve as both a popular overview of earth history and as a scholarly anecdote to the fictions of creationism once again finding their way into classrooms and universities Strahler illuminates the controversy by reviewing the philosophy methodology and sociology of empirical science as contrasted with the belief systems of religion and pseudoscience The author also includes lucid criteria for distinguishing science from pseudoscience and reviews the great discoveries and developments in science that point to the evolution of life over the earth s three billion year history
