The Law Within Fuller, Bampfylde,2013-11-05 First Published in 1999 This is Volume XI of thirty eight in the General Psychology series Written in 1926 this book is a endeavour to discover the laws which underlie human nature to bring within the domain of scientific generalization man s various activities whether in industry politics or war in self centred social or religious life in science or in art The Golden Horns John L. Greenway,2008-06-01 As an introduction to modern myth The Golden Horns masterfully encompasses a wide circle of historical and literary materials John Greenway first establishes the theoretical base of his discussion by examining the nature of time in Norse mythic consciousness After suggesting several ways in which the mythic apprehension of reality conditioned medieval Icelandic narrative he then elaborates on the dialectical relationship between myth and reason Maintaining that myth is neither true nor false but always either expressive or not the author then traces the origin rise and fall of two great modern myths of northern birth seventeenth century Swedish Gothicism and the Ossianic craze of the eighteenth century both of which illustrate the singular tension in the modern mind between mythic imperatives and the impulse to de mythologize Finally The Golden Horns traces the romantic belief in a new mythology which synthesizes myth and reason from its early acceptance through its eventual repudiation In his conclusions about the state of myth in the modern world Greenway postulates that we have inherited the romantic respect for myth as truth but lack the romantic faith in transcendence necessary to establish myth s reality Consequently we express our mythic consciousness of who we are in quasi scientific language consciously manipulating mythic symbols for social control **Mind** ,1903 A quarterly review of philosophy **The Freeman** ,1922 The History and Philosophy of Materialism Charles T. Comprehensive Dissertation Index, 1861-1972: Philosophy and religion Xerox University Microfilms, 1973 *From
Darwinian Metaphysics Towards Understanding the Evolution of Evolutionary Mechanisms* Momme von Sydow, 2012
Although Charles Darwin predicted that his theory would give zest to metaphysics even he would be astonished at the variety
of paths his theory has in fact taken This holds with regard to both gene Darwinism a purified Darwinian approach
biologizing the social sciences and process Darwinism found in the disciplines of psychology philosophy of science and
economics Although Darwinism is often linked to highly confirmed biological theories some of its interpretations seem to
profit from tautological claims as well where scientific reputation cloaks ideological usage This book discusses central tenets
of Darwinism historically as well as systematically for example the history of different Darwinian paradigms the units of
selection debate and the philosophical problem of induction as basis of metaphysical Darwinism Crucially the book addresses
the Darwinian claim that evolution is governed by an immutable and unrelentingly cruel law of natural selection
Paradoxically Darwins theory is a static non evolutionary theory of evolution The current book sketches the historical
background and provides suggestions that may help to replace this approach by the idea of an evolution of evolutionary
mechanisms see Escher s Drawing Hands on the cover This view even suggests a tendency to overcome the blindness of the
knowledge acquisition of primordial Darwinian processes and allows for some freedom from external environments This book
first develops a radically Darwinian approach then criticises this approach from within Even Darwinism has a tendency to
transcend itself Although the book addresses several empirical issues it does not challenge particular findings Instead it
builds on many insights of Darwinism and provides a proposal for interpreting known empirical evidence in a different light It
should help pave the way for further developing an understanding of nature that transcends Darwinian metaphysics
