Individual Agency and Policy Change at the United Nations Ingvild Bode,2015-03-24 This book highlights how temporary international civil servants play a crucial role in initiating processes of legal and institutional change in the United Nations system These individuals are the missing creative elements needed to fully understand the emergence and initial spread of UN ideas such as human development sovereignty as responsibility and multifunctional peacekeeping The book Shows that that temporary UN officials are an actor category which is empirically crucial yet usually neglected in analytical studies of the UN system Focussing on these particular individual actors therefore allows for a better understanding of complex UN decision making Demonstrates how these civil servants matter looking at what their agency is based on Offering a new and distinctive model Bode seeks to move towards a comprehensive conceptualisation of individual agency which is currently conspicuous for its absence in many theoretical approaches that address policy change Uses three key case studies of international civil servants Francis Deng Mahbub ul Haq and Marrack Goulding to explore the possibilities of this specific group of UN individuals to act as agents of change and thereby test the prevailing notion that international bureaucrats can only act as agents of the status quo This book will be of great interest to students and scholars of international organizations and the United Nations

Peacebuilding in the United Nations Fernando Cavalcante,2019-05-06 This book traces the trajectory and different meanings of the concept of peacebuilding in the United Nations since the early 1990s It analyses how that concept gained life in a particular context and the implications of this process for the Organisation's support to societies affected by armed conflict in general and for peace operations in particular Departing from tenets about the influence of ideas in world politics and engaging with the critique of the liberal peace scholarship the book provides a theoretically informed narrative of how peacebuilding acquired different meanings while remaining largely motivated justified legitimated and informed by a proactive and top down agenda of promoting liberal democratic institutions norms and values as a remedy to the challenges faced by societies affected by armed conflict The book will appeal to scholars policymakers and practitioners in peacebuilding and post conflict development Mapping the End of Empire Aiyaz Husain,2014-04-14 By 1945 Washington and London envisioned a new era in which the U S shouldered global responsibilities while Britain focused its regional interests narrowly Mapping the End of Empire reveals how Anglo American perceptions of geography and

The United Nations, intra-state peacekeeping and normative change Esref Aksu, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This study explores the normative dimension of the evolving role of the United Nations in peace and security and ultimately in governance What is dealt with here is both the UN's changing raison d'être and the wider normative context within which the organisation is located The study looks at the UN through the window of one of its most contentious yet least understood practices active involvement in intra state conflicts as epitomised by UN peacekeeping Drawing on the conceptual tools provided by the historical structural approach this study seeks to understand how and why the international community continuously reinterprets or redefines the UN's role with regard to intra state conflicts The study concentrates on intra states peacekeeping environments and examines what changes if any have occurred to the normative basis of UN peacekeeping in intra state conflicts from the early 1960s to the early 1990s One of the original aspects of the study is its analytical framework where the conceptualisation of normative basis revolves around objectives functions and authority and is closely connected with the institutionalised values in the UN Charter such as state sovereignty human rights and socio economic development This book is essential reading for postgraduate students of IR and international peacekeeping organisations

International Law on Peacekeeping Hitoshi Nasu, 2009 It is generally considered that the UN Security Council has been galvanised since the end of the Cold War However the existence and development of armed conflicts remain the reality in the international scene Is the upsurge in instances of invoking Chapter VII of the UN Charter truly a sign of the invigoration of the Security Council's authority or mere evidence of its failure to prevent the aggravation of armed conflicts To what extent is the Security Council authorised to exercise the peacekeeping power in order to take a more flexible approach to conflict management from an earlier stage of conflict This book explores the potential of the UN peacekeeping power placing Article 40 of the UN Charter at the centre of the legal regime governing peacekeeping measures It traces the origins of peacekeeping measures primarily in the experience of the League of Nations and identifies Article 40 of the Charter as the primary legal basis for and the legal restraints upon the exercise of the peacekeeping power It examines the regulatory framework within which the United Nations particularly the Security Council is authorised and may even be required to direct peacekeeping measures to prevent the aggravation of armed conflicts It suggests that the legal accountability of the

Security Council in directing peacekeeping measures will be enhanced by utilising procedural mechanisms for self regulation

The United Nations and peacekeeping, 1988-95 Chen Kertcher, 2016-06-17 Using more than 600 UN documents that analyse the discussions in the UN Security Council General Assembly and Secretariat The United Nations and peacekeeping 1988 95 presents innovative explanations on how after the Cold War UN peacekeeping operations became the dominant response to conflicts around the globe This study offers a vivid description of these changes through the analysis of the evolution in the concept and practice of United Nations peacekeeping operations from 1988 to 1995 The research is anchored primarily in United Nations documents which were produced following the diplomatic discussions that took place in the General Assembly the Security Council and the UN Secretariat on the subject of peacekeeping in general and in the cases of Cambodia Former Yugoslavia and Somalia in particular These large and complex operations were the testing ground for the new roles of peacekeeping in democratisation humanitarian aid resettlement of refugees demobilisation of armed forces economic development and advancement of good government Peacebuilding and International Administration Niels van Willigen, 2013-07-18 This book provides a detailed historical and political analysis of the role and effectiveness of international administration in statebuilding It analyses how the international administrations in Bosnia and Herzegovina and Kosovo have attempted to create sustainable political institutions and to what extent they have been successful in doing so In the 1990s large and ambitious international administrations were established to administer territories that had been left without an effective government in the wake of violent conflict International administrations to a greater extent than peacebuilding operations exercise extensive authority and take over the governance of a country Though they combine the state and nationbuilding programs of regular peacebuilding with the political power normally reserved for sovereign states there remains a question of how effective or successful international administrations are and whether they lead to a sustainable peace The author argues that despite years of international administration the political institutions remain weak and rely heavily on international support dominated by an ethnic nationalist ideology with little domestic support Peacebuilding and International Administration will be of interest to students and scholars of international relations security studies conflict resolution and international organizations UN Peacekeeping Operations and the Protection of Civilians Conor Foley, 2017-09-07 This book is based on the author's experience of working for more than two decades in over thirty conflict and post conflict zones It is written for those involved in UN peacekeeping and the protection of civilians It is intended to be accessible to non lawyers working in the field who may need to know the applicable legal standards relating to issues such as the use of force and arrest and detention powers on the one hand and the delivery of life saving assistance according to humanitarian principles on the other It will also be of interest to scholars and students of peacekeeping international law and international relations on the practical dilemmas facing those trying to operationalise the various conceptions of protection during humanitarian crises in recent years Modern War and the Utility of Force Isabelle

Duyvesteyn, Jan Angstrom, 2010-04-05 This book investigates the use and utility of military force in modern war After the Cold War Western armed forces have increasingly been called upon to intervene in internal conflicts in the former Third World These forces have been called upon to carry out missions that they traditionally have not been trained and equipped for in environments that they often have not been prepared for A number of these new types of operations in allegedly new wars stand out such as peace enforcement state building counter insurgency humanitarian aid and not the least counter terrorism The success rate of these missions has however been mixed providing fuel for an increasingly loud debate on the utility of force in modern war This edited volume poses as its central question what is in fact the utility of force Is force useful for anything other than a complete conventional defeat of a regular opponent who is confronted in the open field This book will be of much interest to students of strategic studies war and conflict studies counter insurgency security studies and IR Isabelle Duyvesteyn is an Associate Professor at the Department of History of International Relations Utrecht University in the Netherlands Jan Angstrom is a researcher at the Swedish National Defence College

Historical Dictionary of Multinational Peacekeeping Terry M. Mays, 2010-12-16 As long as there have been wars there have been peace processes to settle them In the 12th century BC the Egyptians and Hittites concluded one of the earliest peace treaties still in existence Peacekeeping as understood as a modern concept emerged out of the League of Nations after World War I The League fielded many international military operations that were essentially deployments by the victorious Allied powers to oversee local plebiscites Peacekeeping operations have evolved to become essential elements in most international attempts to guide belligerents through a peace process Peacekeeping operations can be great examples of the international community cooperating to help settle a crisis Historical Dictionary of Multinational Peacekeeping Third Edition is a single source research guide for current and completed peacekeeping operations With an extensive chronology an introductory essay an appendix with the mandates for three UN peacekeeping operations a research oriented bibliography based on numerous categories of peacekeeping operations and issues related to peacekeeping 32 photographs of UN EU and NATO peacekeeping operations and over 500 cross referenced dictionary entries on peacekeeping operations people organizations countries and events associated with peacekeeping and brief descriptions of all currently fielded operations as well as those that have completed their missions dating back to the League of Nations in 1920

Organizing Peacebuilding Anna Herrhausen, 2009 Coordination between different United Nations UN entities has become an issue of increasing concern for scholars and practitioners With the UN taking on ever more ambitious roles in countries emerging from conflict no single unit can master the task of post conflict reconstruction alone However efforts at reorganizing the way the UN works in peacebuilding have not yielded the desired result of ensuring a more effective UN presence To offer fresh inputs for the debate *Organizing Peacebuilding* looks at coordination from a theoretical perspective It develops a framework for interorganizational coordination and applies it to the UN and to two selected case examples the UN missions in Kosovo and

Afghanistan The research suggests that in order to improve coordination the UN should acknowledge its network character and cultivate those social and structural control mechanisms which facilitate coordination in networks **The**

International Dimensions of Internal Conflict Michael Edward Brown, 1996 Internal conflicts threaten many countries and regions globally The first part of this book examines the sources of internal conflicts and the ways these may affect neighbouring states and the international community The second part covers specific problems policy instruments and key actors
