Wefing, Peichl/Achatz/Schumer**

## Log Id Bgw Dresden:

BGW Dresden Theo Boss,1997 An exploration of LOG ID s construction of the environmentally sound economical Dresden Health and Welfare Building *Kisho Kurokawa* Kishō Kurokawa,Dennis Sharp,Catherine Slessor,Tomio Ōhashi,1999 The completion of the first phase of Kuala Lumpur International Airport in 1998 resulted in two 4000 m runways and a 335 000 m<sup>2</sup> main terminal building The airport can handle 25 million passengers a year By 2020 however the airport will be able to handle 120 000 000 passengers a year It is not surprising that everyone should wonder why Malaysia would need an international airport of that size The reason is the intense strategic competition that has already started Unquestionably the world will have an entirely new high speed transportation system by 2025 at the latest This will be the HSST Hypersonic Speed Transport which will carry between 300 and 500 passengers at speeds up to Mach 3.5 The HSST will be meaningless for short routes Therefore the required international hub airports will be limited to two in North America one in Central and South America one in Africa two in Europe one in Russia and three in Asia Like China and South Korea Malaysia is very eager to obtain one of the three Asian international hub airports because a country with such an airport and the associated infrastructure is very likely to become a financial information tourism and advanced industrial centre The airport is an integral part of a future linear capital corridor which was also developed by Kurokawa The area surrounding the airport will be used for an experiment in artificially restoring the tropical rain forest Creating such a forest is the most effective method for blocking out noise from the airport This is the basis of the architect s concept for a symbiosis between airport and forest In addition the architect believes that this is effective for expressing the identity of Malaysia as tropical rain forests are the typical vegetation of the country Kurokawa was a key figure of Japanese Metabolism he has played an essential role in this movement not only through projects and buildings but also through theoretical writings Since then he has been one of the leading architects in Japan **Kisho Kurokawa** Dennis Sharp,2002 Known as the Big Eye the Oita Stadium is one of the chosen venues for the next World Cup in 2002 It will be reused for the second stage of the Japan Inter Prefectural Athletic Competition in 2008 after the World Cup continuing to grow in the future to become a large scale all purpose sports park for Oita The whole site covers an area of 225 ha and has several facilities outside the main football stadium These include general fitness training and lodging centres a botanical pool two multipurpose athletic fields two rugby and soccer practise pitches a softball field tennis courts and other game areas The main stadium features an open track for athletic events as well as the football pitch It can also be used year round for public events aided by its retractable roof For soccer matches spectator seats are placed right up to the edge of the pitch to bring them close to the action To change over for track events a retractable seating system was developed The stadium sits elegantly on its site enhanced by the gentle curves of its spherical design The choice of the sphere Kurokawa says is an expression of abstract symbolism This spherical shape also enables the retractable portion to move along its curved surface The use of Teflon membrane panels with 25 percent light

permeability obviates the need for artificial lighting during daylight hours In order for the pitch to get proper exposure to sunlight the elliptical roof opening runs along the north south axis A main arch with perpendicular horizontal sub members follows the elliptical shape of the roof opening Between the roof and the spectator seating below the surrounding mountains can be seen from a slender ventilation clearstorey set just below the roof line This slit of space is designed to create a feeling of openness inside the stadium Since the original design an idea emerged for a moving camera to be located on the main beam to deliver special dynamic images for television audiences around the world *Heinz Tesar: Christus, Hoffnung Der Welt, Donau City, Wien* Immo Boyken, Heinz Tesar, 2002-03-20 Heinz Tesar built this church as a spiritual centre an oasis in the diaspora for Donau City a new residential and commercial centre of Vienna *Arup* Greg Pearce, 2001 Situated on a newly created waterfront site at the heart of the central Hong Kong business district this building has been designed as a comprehensive inter modal transport facility **Frank O. Gehry** Gottfried Knapp, Christian Richters, 2000 Text in English and German After his deconstructive beginnings in the eighties and nineties Frank Gehry increasingly practised a very plastic form of architecture His expressively sculptural cultural buildings the Vitra Design Museum in Weil am Rhein his project for the Walt Disney Concert Hall in Los Angeles and above all the Guggenheim Museum in Bilbao see Opus 32 have shaped the architectural awareness of our period and provided exemplary artistic alternatives to the architectural canon of Modernism Within Gehry's rapidly growing volume of work the comparatively small energy forum for the Minden Ravensburg Electricity Company EMR plays a particularly striking role insofar as the extraordinarily complex brief almost contradictory functions had to be blended in a very cramped space compelled the architect to use highly differentiated forms and materials In this way something like a primal model of sculptural building emerged a massively fissured subtly lit structure that explains itself inside with amazing naturalness making visitors gasp with its changing spatial situations as an exhibition and events centre exploding all conventions as an office building and translating the theme of energy into sensual forms by architectural means as the electricity company's technical distribution centre The old dictum form follows function acquires a new and radical quality in the architecture of the Energieforum In addition to the presentation of the energy forum in Bad Oeynhausen this book contains an illustrated survey of all other buildings by Frank Gehry in Europe *Schneider + Schumacher, KPMG-Gebude, Leipzig* Fabian Wurm, 1999 Building in historical context does the new have to live in the shadow of the old **Peichl/Achatz/Schumer. Munchner Kammerspiele, Neues Haus** Heinrich Wefing, Peichl/Achatz/Schumer, 2002-03-20 This volume shows the extension of one of Munich's most significant Art Nouveau buildings erected in 1901 by Richard Riemerschmid *Bolles + Wilson* Lars Lerup, Mirko Zardini, 2003 The Luxor is a significant milestone in the oeuvre of Bolles Wilson As a major public building it pursues themes first tested in the 1993 new city library in Münster a characteristic plan form an intervention that redefines its context and a synthesis of the abstract with a spatial warmth an ambience that communicates directly and subliminally to a wide audience base The architecture of

this German Australian duo does not fit easily into conventional architectural genres Smallness intimacy and precise details characterise their work just like an increasing number of urban interventions that have made a major impact on cities like Hengelo The Hague or Magdeburg The design of the Luxor Theatre the process of its realisation Bolles Wilson s surrounding urban fields and most importantly the internal life in the building engendered by the architecture are fully presented in this book

**Norman Foster: Commerzbank, Frankfurt Am Main (Opus 21)** Volker Fischer,Horst Grüneis,Ralph Richter,1997 Norman Foster one of the most consistent advocates of architecture based on modern technology achieved a world wide reputation with the headquarters for the Hong Kong and Shanghai Banking Corporation in Hong Kong Stansted Airport in London Century Tower in Tokyo and his telecommunications tower in Barcelona His most important projects in Germany are the conversion of the Reichstag building in Berlin and the new Commerzbank headquarters in Frankfurt am Main

John Fowler, Benjamin Baker, Forth Bridge Iain Boyd Whyte,Colin Baxter,1997-12-16 When the Forth Bridge opened on 4 March 1890 it was the longest railway bridge in the world and the first large structure made of steel Crossing the wide Firth of Forth east of Edinburgh it represents one of the greatest engineering triumphs of Victorian Britain man s victory over the intractable topography of land and water Not surprisingly such a vigorous rebuff of the natural order was condemned at the time by those late Victorians who resisted the march of technology and William Morris described the Bridge as the supremest specimen of all ugliness In response Benjamin Baker insisted that its beauty lay in its functional elegance Contrasting his masterpiece with the only comparable structure of the period the Eiffel Tower he concluded The Eiffel Tower is a foolish piece of work ugly illproportioned and of no real use to anyone

**Carlo Scarpa. Museo Canoviano, Possagno** Judith Carmel-Arthur,Carlo Scarpa,Stefan Buzas,2002-10-18 A photographic study of the extension to the Museo Canoviana in Possagno Italy built by Venetian architect Carlo Scarpa in 1957

International Books in Print,1986 **The British National Bibliography** Arthur James Wells,2000 **Schweger + Partner, Zentrum Fur Kunst und Medientechnologie, Karlsruhe (Opus 34)** Andrea Gleiniger,Bernhard Kroll,1999-03-09

In 1997 the Zentrum fur Kunst und Medientechnologie moved into a former munitions factory built in 1918 Hamburg architects Schweger Partner were commissioned to convert this industrial structure The result is unique as a dialogue was initiated between the four story factory with its extensive atria and its new users

**Avery Index to Architectural Periodicals** Avery Library,1997

**Egon Eiermann, German Embassy, Washington** Immo Boyken,Egon Eiermann,2004 When the German Embassy in Washington was completed in 1964 the architectural critic for the Washington Post wrote that the express aim of those commissioning the building had been to make an architectural statement that would embody the spirit of the young German democracy

**Steidle + Partner** Oliver G. Hamm,2003 Munich is lucky A city that is at the top of the popularity scale needs nothing more than attractive building land There has been a great deal more of this in recent years since industry and commerce have moved off to the periphery barracks have been closed the goods station and the airport have been relocated

and the exhibition centre has gone to the empty site in Riem that was freed up This meant that the Theresienhohe became an urban development area as well Trade exhibition halls were still being built around the historic parkland established as an exhibition park around the turn of the century in the 1980s In 1997 an architectural competition was looking for ideas for an inner city dense mixture of use for culture as a central for housing and commerce The prize winning suggestion by Steidle Partner became the basis for further planning The convincing feature was the instinctive sureness with which the practice imposed scale and urban character of the surrounded quarters on to the former exhibition centre site The development proposal which could be interpreted in many ways but proposed an easily remembered line is continued in the architecture with its sets of buildings staggered against each other The first buildings to be completed included the KPMG head office which emerged from a workshop procedure the ground plan for the complex uses a meander pattern completed at one corner by a high rise residential building which means that the quarter principle of reversible residential and office use is demonstrated within a single block A central entrance courtyard provides access to the office block but there is access from the outside elsewhere as well should the function ever be changed The building rises to seven storeys and is pleasingly disturbing because of the lively colours on its facade of glazed ceramic panels The even staccato of the narrow windows forms a contrast with this Both together give the architecture the appeal of a mysterious musical instrument certainly intended for very young rhythmic music Book jacket **Architectural Publications Index** ,1997 **Nicholas Grimshaw & Partners** Volker Fischer,Waltraud Kruse,2002
