Logging And Lumbering In Maine:

Logging and Lumbering in Maine Donald A. Wilson, 2001 Known as the Pine Tree State Maine once led the world in lumber production It was the first great lumber producing region with Bangor at its center Today the state has nearly eighteen million acres of timberland and forest products still make up a major industry Logging and Lumbering in Maine examines the history from its earliest roots in 1630 to the present providing a pictorial record of land use and activity in Maine The state s lumber industry went through several historical periods beginning with the vast pine and spruce harvests the organization of major corporate interests the change from sawlogs to pulpwood and then to sustained yields intensive management and mechanized harvesting At the beginning much of the region was inaccessible except by water so harvesting activities were concentrated on the coast and along the principal rivers Gradually as the railroads expanded and roads were constructed into the woods operations expanded with them and the river systems became vitally important for the transportation of timber out of the woods to the markets downstate Logging and Lumbering in Maine traces these developments in the industry taking a close look at the people places forests and machines that made them possible A *History of Lumbering in Maine, 1861-1960* David Clayton Smith, 1972 When one thinks of Maine one usually thinks of trees forests lumber saw pulp and paper mills In many ways to forest and its uses are central factors in Maine history Professor David C Smith has written in other places about that history but this book puts much of that knowledge together in a detailed unfolding of logging from 1860 to 1960 and its influence on the state and its economy The book ranges from a description of life in the woods for the logger through driving the rivers with the product of forest to the saw mill and its manufacture and finally the shipping and sale of the end product in its foreign and domestic destinations Attention is paid to the economy and social structure of the state and the effects of the national economy on the logger The shift in the Maine woods to pulpwood logging and the growth of the paper mill is discussed along with the long and bitter fights for control of the rivers between downriver loggers and upriver papermakers The long fight for the establishment of a state forestry and conservation policy is outlined along with the career of Austin Cary a pioneer forester Life in the Maine woods in the twentieth century is portrayed and such factors as the depression the CCC and the Second World War are also discussed A handsome portfolio of photographs illustrating the lumbering process from the woods to the users of the products demonstrates the ubiquity of the logging business Maine has had its forests from the beginning their utilization is the lifeblood of the state s history This book discusses that lifeblood and illuminates the history of the Pine Tree State Among David Smith s published works are *Research Notes on Logging and Lumbering in Maine* Thomas M. Armstrong, 1831 Research notes by Thomas Armstrong relating to the logging industry in Maine spanning a few centuries with much information relating to J G Deering Sons Company and logging activities along the Saco River Includes newspaper and magazine articles about logging and lumber personal photos maps information on measuring devices academic papers on various topics and lumber

advertisements **History of the Lumber Industry of America** James Elliott Defebaugh,1907 **The History of Lumbering and Logging in Maine** C. I. Arnold,1941 Logging in Maine Albert W. Cooper,1902 **Maine Logging Firms** Maine. Department of Conservation,Maine. Bureau of Forestry,1978* *The Archaeology of the Logging Industry* John G. Franzen,2020-08-18 The American lumber industry helped fuel westward expansion and industrial development during the nineteenth and twentieth centuries building logging camps and sawmills and abandoning them once the trees ran out In this book John Franzen surveys archaeological studies of logging sites across the nation explaining how material evidence found at these locations illustrates key aspects of the American experience during this era Franzen delves into the technologies used in cutting and processing logs the environmental impacts of harvesting timber the daily life of workers and their families and the social organization of logging communities He highlights important trends such as increasing mechanization and standardization and changes in working and living conditions especially the food and housing provided by employers Throughout these studies which range from Michigan to California the book provides access to information from unpublished studies not readily available to most researchers The Archaeology of the Logging Industry also shows that when archaeologists turn their attention to the recent past the discipline can be relevant to today s ecological crises By creating awareness of the environmental deterioration caused by industrial scale logging during what some are calling the Anthropocene archaeology supports the hope that with adequate time for recovery and better global scale stewardship the human use of forests might become sustainable A volume in the series the American Experience in Archaeological Perspective edited by Michael S Nassaney **The Development of Log Transportation in the Lake States Lumber Industry, 1840-1918** William Gerald Rector,1951 *Lumber World Review* ,1925 *Forestry Quarterly* Bernhard Eduard Fernow,1910 Bibliography of forestry v 1 p 163 172 Printed on one side of leaf only Logging Ralph Clement Bryant,1913
