Godbolt, 1984 The Mouse in Biomedical Research, 2006-11-30 Diseases the second volume in the four volume set The Mouse in Biomedical Research departs from the first edition by discussing specific disease causing microorganisms rather than the format used in the first edition which discussed infectious diseases affecting specific organs and tissues As such the volume consists of 26 chapters subdivided into RNA viruses and DNA viruses as well as bacterial mycotic and parasitic infections These chapters not only provide updates on pathogenesis epidemiology and prevention of previously recognized murine pathogens but also include information on newly recognized disease causing organisms mouse parvovirus cilia associated respiratory bacilli and Helicobacter spp A separate category consisting of 3 chapters discusses zoonoses tumor pathology of genetically engineered mice and spontaneous diseases in commonly used mouse strains Planning and Designing Research Animal Facilities Jack Hessler, Noel Lehner, 2011-04-28 Research institutions have or are planning to build expand and renovate animal research facilities to keep up with the demands of biomedical research caused in part by growth in the use of genetically altered rodents and the upsurge of research in infectious diseases Properly designed facilities greatly facilitate effective management and high quality day to day animal care that is required to optimally support animal research and testing There are multiple solutions to address the myriad of factors that influence the design and construction of animal research facilities There is no best design applicable for all facilities and arguably not even a single best design for a given facility For this reason Planning and Designing Research Animal Facilities is not intended to be a how to book The goal is to cover the basic programmatic requirements of animal research facilities provide ideas for meeting

those requirements while hopefully stimulating the creative process in which designers in consultation with those who work in animal research facilities generate even better ideas That is how progress has been made and will continue to be made Facilitates communication between the parties involved in planning and designing animal facilities by providing contemporary information and stimulating creativity that will help lead to wise decisions and advance the knowledge base for planning design and constructing animal research facilities
