**Computer-Based Learning Environments and Problem Solving** Erik De Corte, Marcia C. Linn, Heinz Mandl, Lieven Verschaffel, 2013-06-29 Most would agree that the acquisition of problem solving ability is a primary goal of education. The emergence of the new information technologies in the last ten years has raised high expectations with respect to the possibilities of the computer as an instructional tool for enhancing students' problem solving skills. This volume is the first to assemble, review, and discuss the theoretical, methodological, and developmental knowledge relating to this topical issue in a multidisciplinary confrontation of highly recommended experts in cognitive science, computer science, educational technology, and instructional psychology. Contributors describe the most recent results and the most advanced methodological approaches relating to the application of the computer for encouraging knowledge construction, stimulating higher order thinking, and problem solving, and creating powerful learning environments for pursuing those objectives. The computer applications relate to a variety of content domains and age levels.

Leatham, 2019-09-12 The purpose of this book is to collect organize and disseminate collective wisdom with respect to designing conducting and publishing quality research in mathematics education This wisdom will be gleaned from among those who over the past several decades have been instrumental in guiding the field in the pursuit of excellence in mathematics education research insightful editors educative reviewers prolific writers and caring mentors Each chapter is written to the novice researcher with the intent of aiding them in avoiding common pitfalls navigating difficult intellectual terrain and understanding that they are not alone in experiencing rejection frustration confusion and doubt This book differs from existing literature in the sense that it is written about the enterprise of designing conducting and publishing research in mathematics education as opposed to being reports of the results of such work It also differs in the sense that it is written with the intent to mentor the rising generation as opposed to capture the state of the field as would happen in a handbook for example It is written for the express purpose of helping the field work collectively to aid in the often isolated enterprise of mentoring new researchers The primary audience is a potentially wide one graduate students novice researchers graduate faculty advisors and mentors or anyone seeking to improve their own abilities to design conduct and publish quality research in mathematics education      *Programming and Problem Solving with C++* Nell B. Dale, Chip Weems, Mark R. Headington, 1998-04 This book continues to reflect our experience that topics once considered too advanced can be taught in the first course The text addresses metalanguages explicitly as the formal means of specifying
