

The 5 steps in Data Analysis

1

Determine the subject of your analysis

Think about why you want to do an analysis

2

Examine different data sources

Determine relevant data sources and compare them

3

Filter the data

Determine what information is relevant to your analysis and select only the relevant elements

4

Analyze the data

View and examine your data in a scientific manner, use the appropriate tools

5

Interpret the results

Evaluate results and find out what they are useful for, then apply your findings
