## Lecture 1 – Introduction, Word of God, Canon of Scripture

### What Is Systematic Theology? (Pages 21-43)

- Theology is the “study of God”. Systematic theology is putting our study of God into a non-contradictory and logical system that “checks and balances itself”.
- For the purpose of this course is any study that answers the question “What does the whole Bible teach us today?” – about any given topic.
- Its is NOT putting God inside a human system of thought – no one can do that! God’s thoughts are higher than our thoughts! (Isaiah 55:8,9)
- Systematic theology helps us to think rightly about God in a comprehensive, detailed and organized way that addresses all the relevant bible verses on a particular topic.
- Systematic theology is the opposite of disorganized and unbiblical theology.
- It not organizing God, rather it is organizing *our thinking about God* so that it makes sense, and is not contradictory, idiosyncratic, confused, chaotic or downright muddled. The “system” keeps us from going off the rails, it does not contain God or contain all knowledge about God which will be incomplete until we see Christ face to face (1 Corinthians 13:9-12).

PREFACE THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is dependent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not

abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing *Theology and Psychology* Fraser Watts,2017-03-02 Many people are now interested in the relationship between religion and science but links between Christian belief and psychology have been relatively neglected This book opens up the dialogue between Christian theology and modern scientific psychology approaching the dialogue in both directions Current scientific topics like consciousness and artificial intelligence are examined from a religious perspective Christian themes such as God s purposes and activity in the world are then examined in the light of psychology This accessible study on psychology and Christian belief offers students and general readers alike important insights into new areas of the science and religion debate Fraser Watts is Starbridge Lecturer in Theology and Natural Science at the University of Cambridge UK and author of many books including Christians and Bioethics SPCK Science Meets Faith SPCK Psychology for Christian Ministry Routledge and The Psychology of Religious Knowing CUP

**Finney's Systematic Theology** Charles G. Finney,1994-08-01 True to Scripture true to reason and true to life Discover why these writings have been the impetus for revivals around the world Students of revival agree that Charles Grandison Finney spearheaded one of America s greatest revivals and influenced the course of history Church rolls swelled in the wake of Finney s revivals He is often directly or indirectly credited with the conversions of around 500 000 people Finney s theological convictions were born in the fires of revival and shaped by a keen lawyer s mind committed to the full authority of the Bible He gave his life to promote The return to and practice of Biblical Christianity in the power of the Holy Spirit for the sake of God s kingdom and glory The distinctive truths that Finney preached brought such a deep conviction of sin that today s church does well when it studies his position on the moral government of God the nature of man the atonement sovereignty attributes of love unity of moral action and regeneration This expanded volume represents the complete 1878 edition two lectures of truth from the earlier 1847 and 1851 editions a comprehensive introduction from L G Parkhurst Jr plus appendixes a glossary and a scripture index **Psychology and Theology** Richard Allott,2015-07-01 Excerpt from Psychology and Theology Or Psychology Applied to the Investigation of Questions Relating to Religion Natural Theology and Revelation Several very important topics have been discussed in the Congregational Lectures of past years and those lectures as a whole are so valuable that the authors of succeeding courses cannot but feel it a difficult task to preserve the reputation which the series has hitherto sustained With this conviction I have used my best efforts to produce a work worthy to stand by the side of its predecessors I am aware that the theme of the present course will not be so attractive to the public at large as some preceding ones there being perhaps no science more generally neglected than Psychology Still it will be felt to be important by thinking men and especially in relation to many of the controversies of the present day The design of the

course is explained in the Introductory Lecture About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

*A Psychologist Looks at Theology* Wallace L. Emerson, 1940

Paul Tillich and Psychology Terry D. Cooper, 2006 Paul Tillich more than any other theologian of the twentieth century maintained an energetic dialogue with psychology and especially psychotherapy This book explores what Tillich's theology has to offer psychologists and others working in the field of mental health spiritual development and pastoral counseling Tillich's interaction with Carl Rogers Erich Fromm Rollo May and other famous psychologists became an important part of his thinking Tillich frequently pushed psychologists to see the underlying philosophical assumptions of their work This investigation of the underpinnings of psychotherapy then encouraged psychotherapists to become more aware of the ultimate questions about meaning purpose and ethics that informed their work Perhaps the greatest contribution this book offers is a careful narrative and analysis of the meetings of the New York Psychology Group which involved such figures as Tillich Fromm May Rogers Seward Hiltner Ruth Benedict and David Roberts to name just a few This important group which met from 1941 to 1945 dealt with issues that are very much with us today such as whether faith can be psychologically explained the meaning of transcendence the relationship between psychotherapy and ethics the appropriateness of self love and whether human love is parallel with Divine love

**The Integration of Psychology and Theology** John D. Carter, Bruce Narramore, 1979 This volume of the Rosemead Psychology Series examines the relationship of psychology to theology and discusses whether they contradict each other or can be integrated with one another It includes a reference listing annotated bibliography and index

The Dialogue Between Theology and Psychology LeRoy Aden, 1968 Three essays reflect the exploratory nature of Religion and Personality a field still in its infancy in divinity studies Each of the eleven authors applies the insights of psychology both theoretical and clinical to important elements of Christian thought and religious meaning New light is shed on such central concepts as faith guilt and salvation The relation between belief and myth is defined and the old controversy about demythologization receives fresh impetus
