**Models for Research and Understanding** Stanislaw Raczynski, 2023-01-01 This introductory textbook reference addresses the fundamental and mostly applied kinds of models The focus is on models of dynamic systems that move and change over time However the work also proposes new methods of uncertainty treatment offering supporting examples Topics and features Chapters suitable for textbook use in teaching modeling and simulation Includes sections of questions and answers helpful in didactic work Proposes new methodology in addition to examining conventional approaches Offers some cognitive more abstract models to give a wider insight on model building The book's readership may consist of researchers working on multidisciplinary problems as well educators and students It may be used while teaching computer simulation applied mathematics system analysis and system dynamics      *Value Management* Roger H. Davies, 2016-02-17 Change programmes in both private and public sectors have a poor record of delivering their intended value The reasons given most often for their failure include lack of executive support or buy in from key users loose requirements definition weak programme management and plain wishful thinking They rarely include technical limitations Value Management puts forward the view that the true problem lies in failing to understand the causal links between the intended stakeholder outcomes and the actual programme outputs Repeating the pattern of failure can be avoided by asking two questions Before implementation what capabilities must a change programme deliver when and in what order so as to cause intended value against a defined purpose with speed and certainty During and after implementation what minor adjustments and or major shifts are needed to be certain that the programme remains on purpose and on value and two answers to be given Target time and align change programmes to deliver maximum intended value to stakeholders the baseline business case track and respond to changes during and beyond implementation to ensure that the programme actually delivers or exceeds intended value value realisation The authors show how by asking and answering these questions direction and delivery of any programme can be clarified and greater economic value achieved      **Integrated Models for Information**
